

On the obverse, all Polish coins feature:

- face value
- image of the Eagle established as the state emblem of the Republic of Poland
- inscription: Rzeczpospolita Polska
- year of issue

Issuing collector items is an occasion to commemorate important historic figures and anniversaries, as well as to develop the interest of the public in Polish culture, science and tradition.

Information on the issue schedule can be found at the [www.nbp.pl/monety](http://www.nbp.pl/monety) website.

Should you have any questions, please contact our consultants at the following phone numbers: +48 22 185 91 96 and +48 22 185 91 59.

Collector coins issued by NBP are sold in the NBP regional branches and at the internet shop.

On 2 June 2015, Narodowy Bank Polski will be putting into circulation collector coins of the series "Monuments of Culture in Poland" – Relics of the palace and religious complex in Ostrów Lednicki, with the face value of 20 zł.

Narodowy Bank Polski is the central bank of the State, responsible for its monetary policy and price stability. The Bank's functions are described in the Constitution of the Republic of Poland and the Act on NBP. NBP holds the exclusive right to issue the currency of the Republic of Poland. As the central bank, it does not provide accounts for the general public, accept deposits from or extend loans to individuals. It acts as a banker to the State budget and public sector entities. NBP also holds and manages the foreign exchange reserves of the State. Finally, it functions as a banker to banks, creating conditions for the operation of the Polish banking system. Narodowy Bank Polski is one of the most important research and analytical centres in the fields of economics and financial markets. For more information on NBP visit: [www.nbp.pl](http://www.nbp.pl)

## Bydgoszcz Canal

Collector coins

# Bydgoszcz Canal

Bydgoszcz Canal, constructed in the years 1773 – 1774, is an exceptional monument of hydrotechnical skill. It connected the basins of the Vistula and Oder Rivers through their tributaries – Noteć and Brda. The construction of the canal took only a year and a half. For this purpose, about 8,000 settlers were hired to perform the main works. At the turn of the 18th and 19th century, masonry locks were built, which can still be admired at the old Bydgoszcz Canal today.

The importance of the Bydgoszcz Canal significantly increased in the second half of the 19th century when the first vessels powered by steam came into use. Before World War I the reconstruction of the canal was started. The new section, commissioned in 1915, connected Brda – through “Okole” and “Czyżkówko” locks – with the old canal. This investment, due to the use of modern locks, enabled the biggest barges at that time to navigate along the canal.

From the end of the 19th century, the surroundings of the old canal became a popular meeting place for Bydgoszcz inhabitants and tourists. There were numerous restaurants, cafés and various attractions waiting for visitors. Military brass bands entertained the public on holidays.

After World War II the role of the Bydgoszcz Canal as a watercourse was undeniable. Unfortunately, its transport capacity decreased over time. At present, it is a part of the international E-70 watercourse; however, due to its outdated equipment, it is classified as a 2nd class watercourse and it awaits revitalisation which would allow it to recover its

former glory. In 2005 the canal was entered in the list of monuments of the Kujawsko-Pomorskie Province and in 2014 – the Year of the Bydgoszcz Canal – efforts aimed at recognising it as a historic monument and entering it in the UNESCO list, were launched.
