Economic developments

The Central Statistical Office estimates that in Q4 2012 the gross domestic product (GDP) has increased by 1.1% yoy compared with 1.4% yoy in Q3 2012 and 4.6% yoy in Q4 2011.

This increase resulted from positive balance of foreign trade, which in turn resulted from positive growth in exports (up by 2.5% yoy) accompanied with a decrease in imports (down by 2% yoy). Impact of this item on the GDP growth stood at 1.8 percentage points versus 2.1 percentage points in Q3 2012.

Negative growth in domestic demand stood at -0.7% thus contributing to a 0.7 percentage points decrease in the GDP.

Individual consumption went down by 1% yoy and public consumption increased by 0.2% yoy. Total consumption contributed to 0.5 percentage points decrease in the GDP.

Decrease in investment has been observed for the second consecutive quarter. Gross expenditure against fixed assets being the measure of investment decreased by 0.3% yoy which contributed to a decrease in the GDP by 0.1 percentage points. Investment rate measured with gross expenditure against fixed assets to the GDP ratio amounted to 28% versus 18.8% in Q3 and 29.2% in the previous year.

Gross added value in the national economy increased by 1% y/y. This increase was influenced by financial results of non-industrial enterprises. Gross added value increased in transportation and storage by 5.4% yoy, information and communication (3.8% y/y) as well as accommodation and catering (2.3% y/y). Decrease in this item was reported mostly in industry (0.2% y/y) and in non-industrial sections the decrease affected construction (down by 2.1% y/y) and trade and repair of motor vehicles (by 1.7% y/y).

According to the Central Statistical Office (CSO) data published in January 2013 the industrial output amounted to 0.3% y/y versus 10.6% y/y decrease a month before. Adjusted for seasonal factors the overall industrial output decreased by 2.1% y/y. Decrease in industrial output prices was reported for manufacturing (0.4% y/y). An increase in industrial output prices was reported for gas electricity and hot water supply (4% y/y) and in mining (also by 4% y/y).

An increase in industrial output, when compared with the corresponding period of the previous year, was reported for 20 (of 34) branches of industry, inter alia⁽¹⁾ food products (up by 7.1% y/y) and furniture (2% y/y). Decrease was reported in other non-metallic mineral products (9.8% y/y), vehicles, trailers and semi-trailers (6% y/y), machinery and equipment (4.7% y/y), rubber and plastics (2% y/y) as well as metal products (0.3% y/y).

In January 2013, construction and assembly production – for enterprises with more than 9 employees – was by 16.1% lower when compared with the corresponding period of the previous year. In December 2012, the above indicator stood at -24.8% y/y. Adjusted for seasonal factors the construction and assembly production decreased by 17.5% y/y.

In January 2013, the annual PPI indicator equaled to -1.2% y/y, versus -1.1% y/y reported a month earlier. Decrease in industrial output prices was reported for manufacturing (1.2% y/y), and in mining (8.8% y/y). An increase in industrial output prices was reported for gas electricity and hot water supply (2.5% y/y).

⁽¹⁾ Branches of manufacturing with average employment over 100 thousand persons.

According to the CSO data for December 2012⁽²⁾, among branches of manufacturing being major employers a decrease in prices was reported for motor vehicles, trailers and semi-trailers (3.7% y/y), other non-metallic mineral products (3.1% y/y), metal products (2.2% y/y), machinery and equipment (0.5% y/y) as well as rubber and plastics (0.4 y/y). Increase in prices, on the other hand, was reported for food products (2.3% y/y).

⁽²⁾ Total industrial output prices and prices for the three major sections combined: 'mining and quarrying', 'manufacturing' and 'electricity, gas and hot water supply' are published by the CSO in advance to detailed data on individual sections.

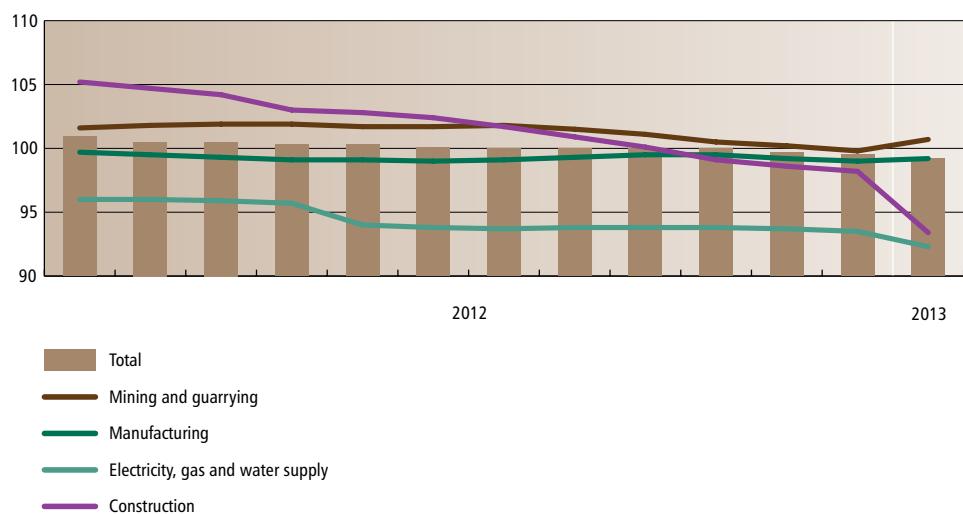

Chart 1.6 Registered unemployment persons (corresponding period of the previous year = 100) and unemployment rate

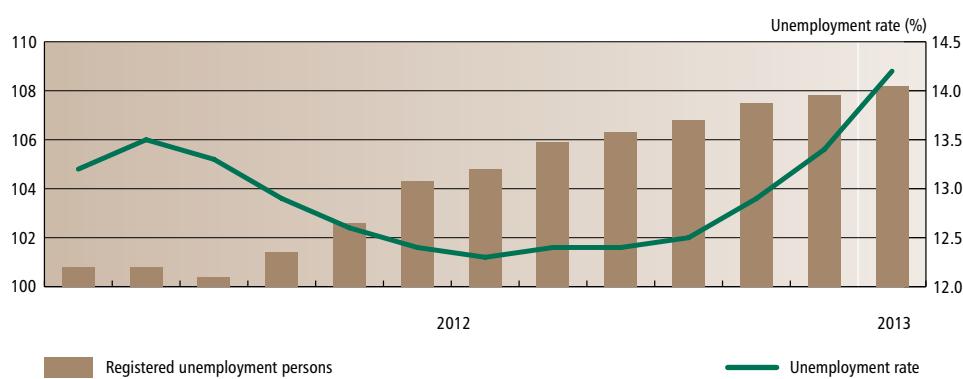

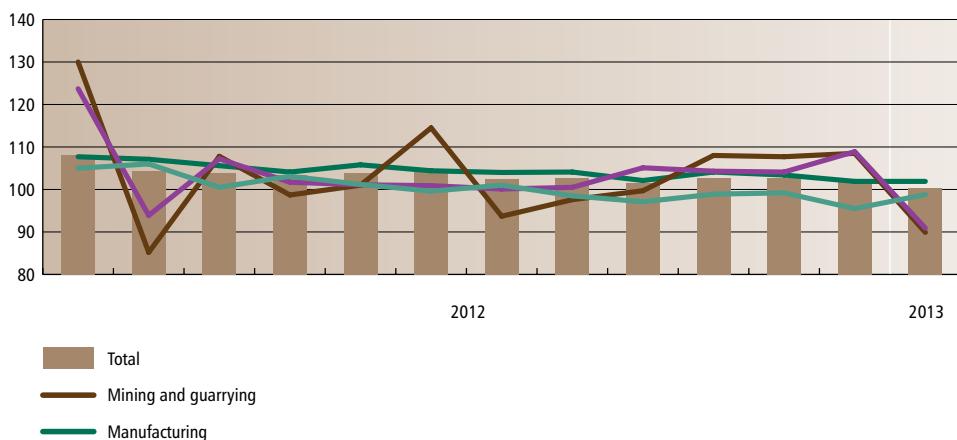

Chart 1.7 Average monthly wages and salaries in enterprise sector (corresponding period of the previous year = 100)

In January 2013, construction and assembly production prices decreased by 1.4% y/y, while in December 2012 they went down by 1.3% y/y.

Increase in the CPI for January 2013 was 1.7% versus 2.4% y/y in the previous month. An increase was reported for food and non-alcoholic beverages (by 3.5% y/y), alcoholic beverages and tobacco (3% yoy), housing maintenance and energy sources (2.6% y/y), and healthcare (2.3% y/y). Decrease in prices was reported in footwear and apparel (5.1% y/y), telecommunication services (1.4% y/y) and transportation (0.8% y/y).

In January 2013, the average employment rate in the enterprise sector stood at 5507 thousand – down by 4.4% (44 thousand) when compared with a year before. Decrease in industrial output prices was reported for manufacturing (0.8% y/y), and in gas electricity and hot water supply (7.7% y/y). Employment rate in mining enterprises went up by 0.7% y/y.

Among branches of manufacturing with high employment, a decrease thereof was reported in machinery and equipment (3.9% y/y), other non-metallic mineral products (3.2% y/y), furniture (2.9% y/y) and food products (0.8% y/y). Increase in employment was reported in motor vehicles, trailers and semi-trailers (2.8% y/y), metal products (2.6% y/y) as well as rubber and plastics (0.6% y/y).

In non-industrial sections a decrease in employment was noted for construction (6.6% y/y) as well as in trade and repair of motor vehicles (0.2% y/y). Increase in employment was reported in information and communication (2.3% y/y) and transportation and storage (1% y/y), administration and support section (0.2% y/y) and in accommodation and catering (0.1% y/y).

The number of registered unemployed amounted to 2295.7 thousand, up by 174.2 thousand (8.2%) when compared with a year ago. The unemployment rate amounted to 14.2%, up by 1 percentage points when compared with the corresponding period of 2012.

Average monthly gross wages and salaries in the enterprise sector stood at PLN 3680.3 and thus were 0.4% higher when compared to a year ago. Increase in average wages and salaries was reported in manufacturing (up by 1.9% y/y). A decrease in wages and salaries was reported for gas electricity and hot water supply (9.1% y/y) as well as in mining (10.1% y/y).

In manufacturing, an increase in average wages and salaries was reported in furniture (3.4 y/y), rubber and plastics (2% y/y), machinery and equipment (1.8% y/y), motor vehicles, trailers and semi-trailers (1.4% y/y) as well as other non-metallic mineral products (0.5% y/y). Decrease in wages and salaries was reported for metals (2.8% y/y) and food products (0.2% y/y).

In non-industrial sections, an increase in average wages and salaries was reported in administrative and support service activities (5.2% y/y), accommodation and catering (3.4 % y/y), transportation and storage (2.3% y/y) and trade and repair of motor vehicles (1% y/y). Decrease in

wages and salaries occurred in construction (1.2% y/y) as well as information and communication (2.8% y/y).

January 2013 brought revenues of the national budget at the level of PLN 25.9 billion, whereas its expenditure amounted to PLN 34.4 billion. The above amounts were lower by 4% and higher by 6. % respectively, when compared with the corresponding period of the previous year, and accounted for 8.7% and 10.3% of the budget assumptions for 2013.

Central budget deficit stood at PLN 8.4 billion versus the assumed annual deficit of PLN 35.6 billion.

Inflows from indirect taxes decreased when compared with last year by 4.4% and amounted to PLN 17.6 billion. Inflows from corporate income tax and personal income tax also went up by PLN 1.5 billion to PLN 1.9 billion and PLN 1 billion to PLN 4 billion respectively.

2

Monetary developments

The Monetary Policy Council during its session on 8-9 January 2013 decreased basic NBP interest rates by 0.25 percentage points to the following levels:

- reference rate – 4%;
- lombard rate – 5.5 %;
- deposit rate – 2,5%;
- rediscount rate – 4.25%.

The MPC Resolution entered into force as of January 10, 2013.

During the January reserve maintenance period⁽³⁾ the POLONIA index deviation against the reference rate equaled to 26 basis points versus 18 basis points in the previous month.

Short-term liquidity of the banking sector measured as a total of the NBP main operations, fine-tuning operations and standing facilities stood at PLN 126.4 billion, up by PLN 9.4 billion when compared with the previous reserve maintenance period.

Average open market operations amounted to PLN 125.8 billion (versus PLN 116 billion in the previous month), of which main operations stood at PLN 124 billion. Throughout the January reserve maintenance period the average daily recourse to the deposit facility totaled PLN 526 million (versus PLN 883 million in the previous period).

In January 2013, average interest rates on zloty denominated loans to non-financial corporations⁽⁴⁾ remained at 6.2%. Interest rates on loans to sole proprietors went up from 8.3% to 8.7%.

As regards zloty denominated loans to households interest rates for loans for house purchases went down from 6.6% to 6.4%, while interest rates for loans for consumption increased from 16% to 16.2%.

Interest rates on deposits of non-financial corporations decreased from 4% to 3.7% while deposits of households went down from 4.2% to 4%.

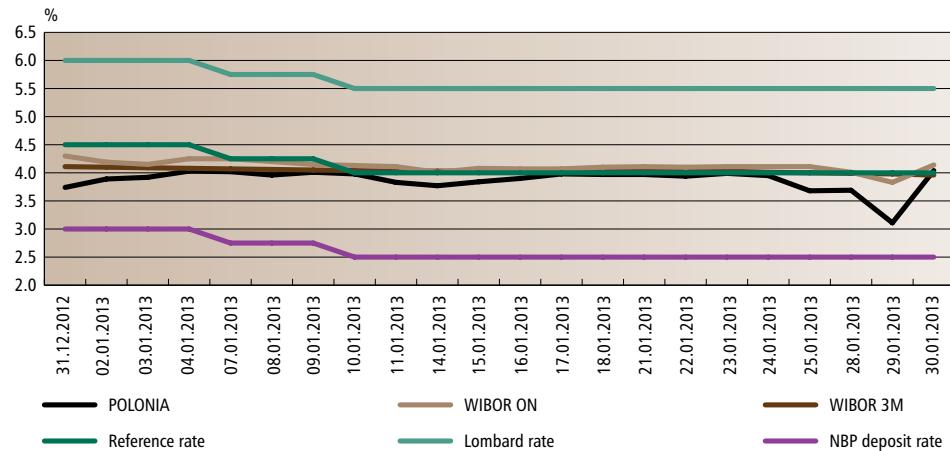

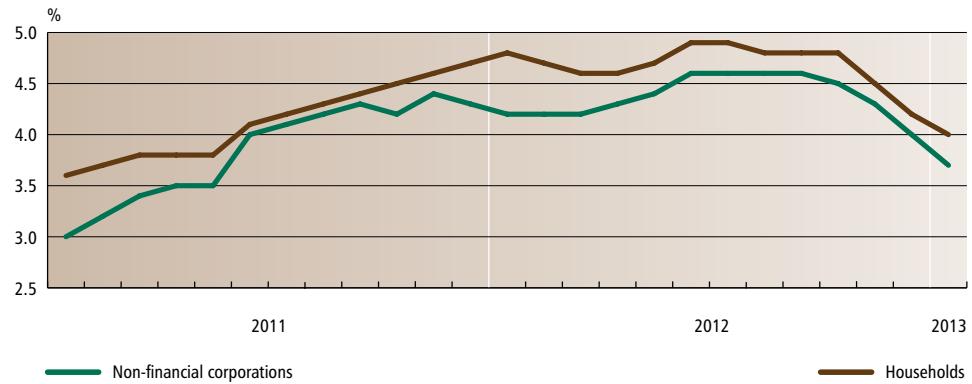

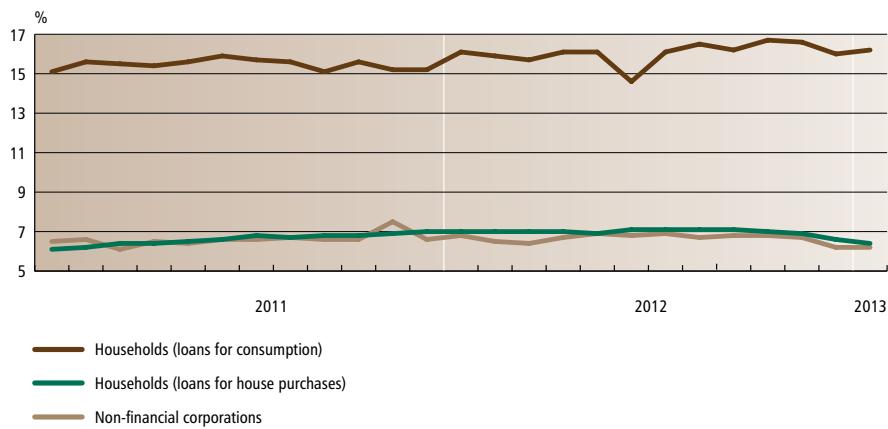

In January 2013, the value of M3 decreased by PLN 8 billion (0.9%) and stood at PLN 913.5 billion. Its annual growth rate decreased by 0.1 percentage points and amounted at 4.4% y/y. The value of monthly transactions amounted to - PLN 9.1 billion⁽⁵⁾.

Components of the M1 aggregate with high liquidity went down by 0.2 percentage points to 3.4% y/y when compared with the previous month. Other components of broad money remained at 5.6% y/y.

⁽³⁾ Reserve maintenance period in question refers to the period from 31.12.2012 to 30.01.2013.

⁽⁴⁾ Interest rates on loans and deposits refer to new business. For further information regarding the calculation of average interest rates on loans and deposits refer to the NBP website at http://www.nbp.pl/homen.aspx?f=en/statystyka/oproc/mir_new/mir_new.html

⁽⁵⁾ Monthly transactions are calculated as the difference in outstanding amounts between two subsequent reporting months adjusted for changes arising from non-transactions, i.e. exchange rate changes, revaluations, reclassifications and other adjustments such as errors in data reported by banks. The methodology for the compilation of transactions is described in http://www.nbp.pl/en/statystyka/m3/Statystyka-transakcji-metodyka_EN.pdf

Chart 2.1 Interest rates on the inter – bank versus basic interest rates of the NBP**Chart 2.2 Average MFI deposit interest rates on new business, PLN denominated****Chart 2.3 Average MFI loan interest rates on new business, PLN denominated**

The value of currency in circulation increased in January 2013 by PLN 1.4 billion (1.4%) and stood at PLN 101.1 billion. Its annual growth rate increased by 1.8 percentage points and amounted to 2.4% y/y.

Chart 2.4 Share of currency in circulation and overnight deposits of domestic residents in M3, M1 and 'M3-M1' growth (corresponding period of the previous year = 100)

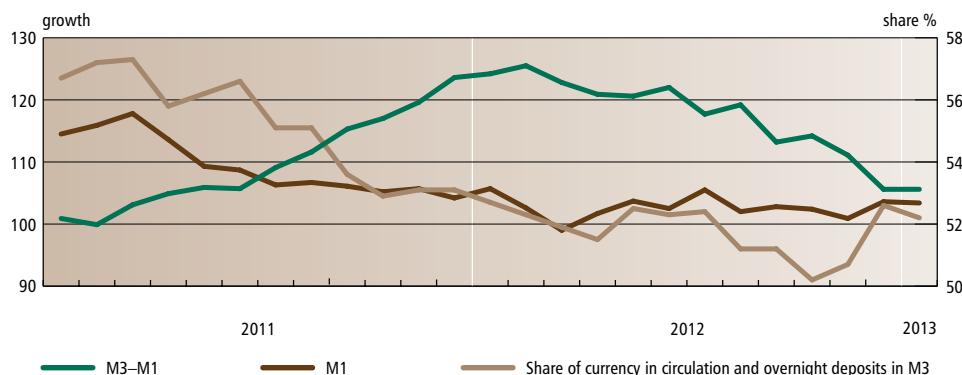

Chart 2.5 Share of currency in circulation in M1

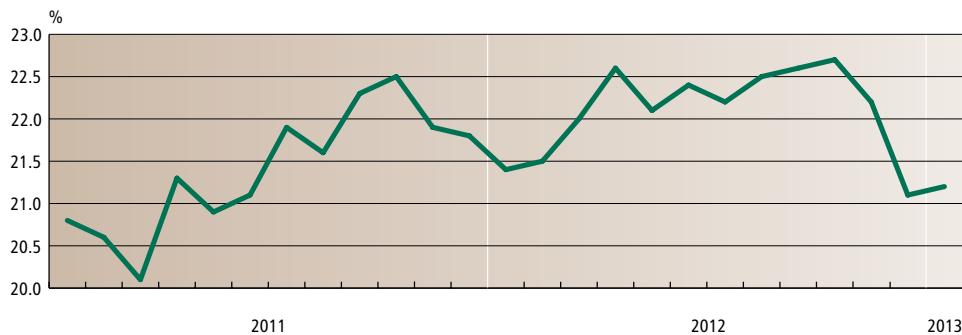

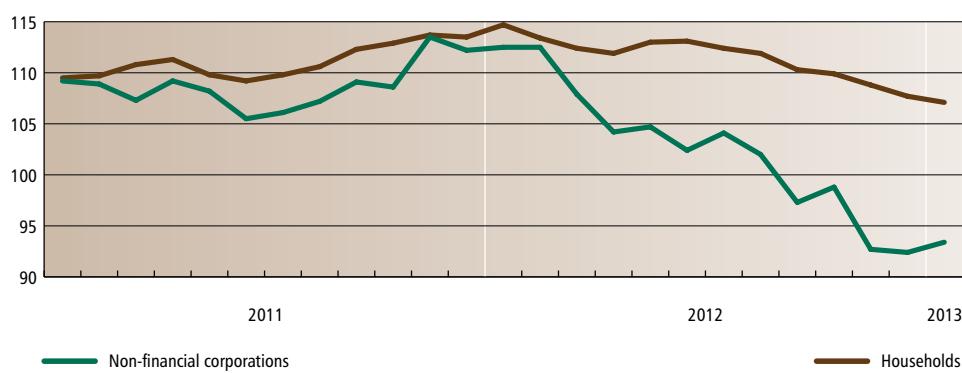

Chart 2.6 Deposits and other liabilities of MFIs to non-financial corporations and households included in M3 (corresponding period of the previous year = 100)

M3 liquidity measured as the share of currency in circulation and overnight deposits in M3 went down by 0.4 percentage points and stood at 52.2%.

M1 liquidity measured as the share of currency in circulation in M1 increased by 0.1 percentage point up to 21.2%.

Chart 2.7 MFI loans and other claims on non-financial corporations and households (corresponding period of the previous year = 100)

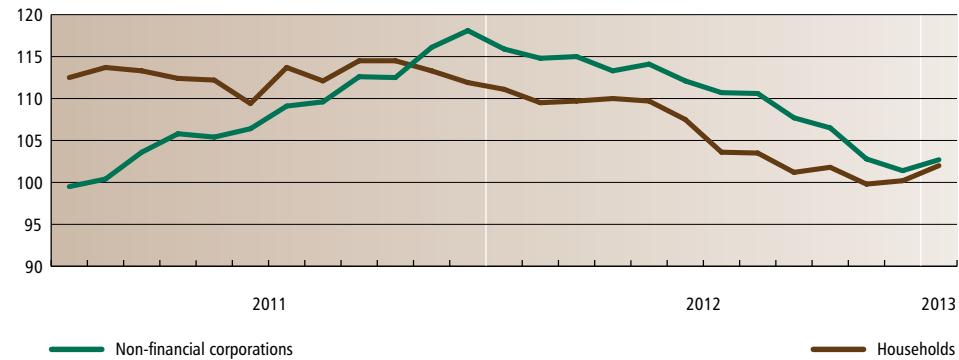

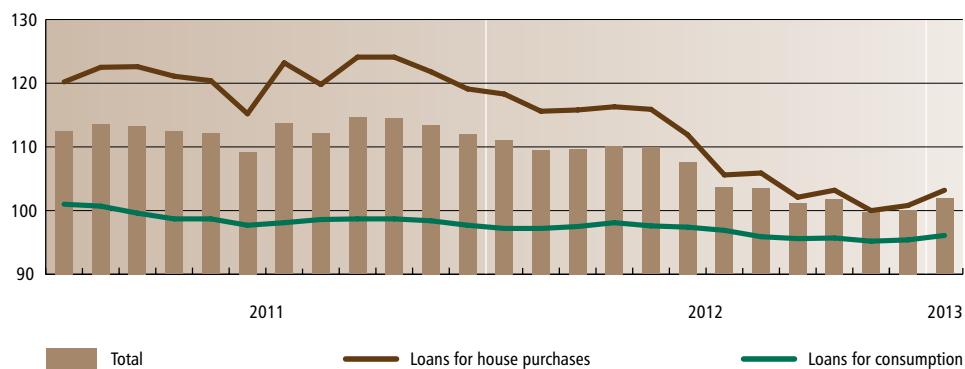

Chart 2.8 Bank loans to households (corresponding period of the previous year = 100)

Deposits and other liabilities included in M3 decreased in January 2013 by 3.2 billion (0.4%) and reached the level of PLN 794.7 billion. Their annual growth rate increased by 0.3 percentage points and stood at 5% y/y.

Increase was reported for deposits of households (up by PLN 6 billion, 1.2%), non-monetary financial institutions (PLN 1.3 billion 2.4%), local government (PLN 0.6 billion, 2.5%) and social security funds (PLN 0.4 billion, 23.9%). Decrease was reported in deposits of non-financial corporations (PLN 11.3 billion, 6%) and non-profit institutions serving households (by 0.2 billion, i.e. 1.1%).

Among counterparts to M3, net credit to domestic sectors⁽⁶⁾ went up by PLN 9.3 billion, i.e. 1%, to the level of PLN 919.5 billion and external assets net increased by PLN 1.7 billion, i.e. 1%, to the level of PLN 171.5 billion. Decrease in credit to central government net by PLN 13.5 billion, 15.5%, to the level of PLN 94.9 billion and increase in long-term loans by PLN 5.8 billion (2.2%) to PLN 266.3 billion negatively affected the money supply.

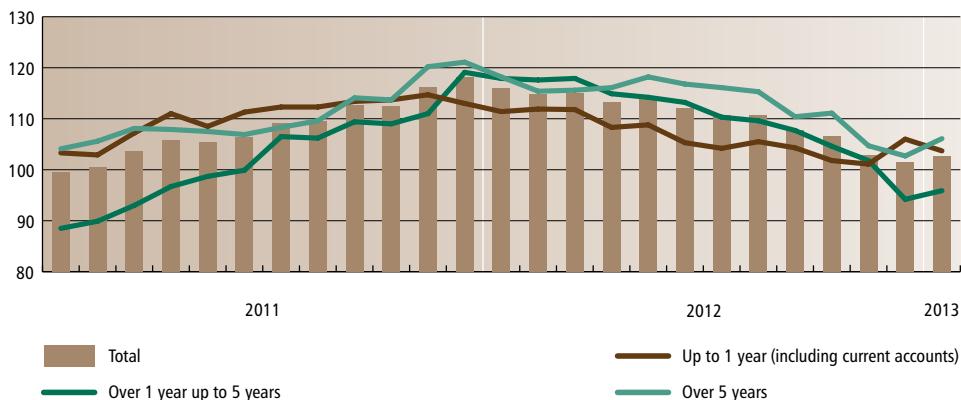

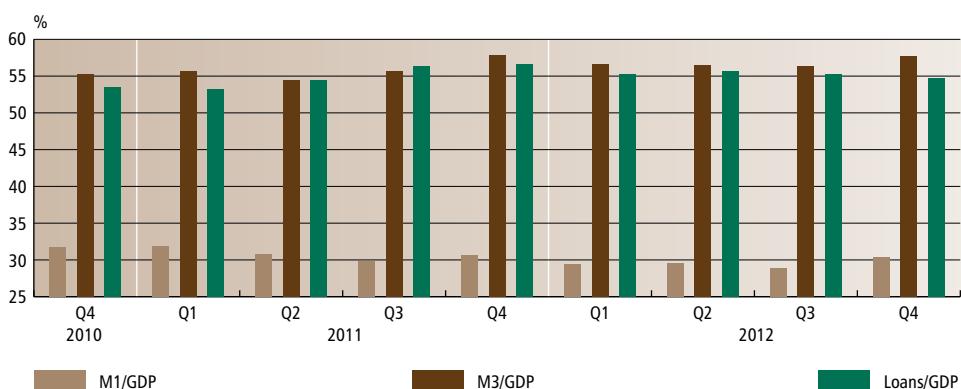

MFI credit to non-financial corporations increased by PLN 0.3 billion (0.1%) and reached PLN 257.3 billion⁽⁷⁾. The value of monthly transactions amounted to PLN -0.9 billion. The annual growth rate in credit to non-financial corporations increased by 1.3 percentage points to 2.7%.

⁽⁶⁾ The category "credit" comprises loans, holdings of debt and equity securities, and other receivables, e.g. debt purchased, guarantees and warrantees. Domestic sectors include non-monetary financial institutions, non-financial corporations, non-profit institutions serving households, local government and social security funds.

⁽⁷⁾ The number does not include MFI holdings of debt and equity securities issued by non-financial corporations.

Chart 2.9 Bank loans to non-financial corporations

(corresponding period of the previous year = 100)

**Chart 2.10 Share of monetary aggregates and MFI loans and other claims on other domestic residents in GDP**

Loans with maturity up to 1 year, including overdrafts, went up by 3.7% y/y (2.3 percentage points decrease in the annual growth rate), and loans with maturity from 1 year up to 5 years decreased by 4.1% y/y (1.6 percentage points increase in the annual growth rate). Loans with maturity over 5 years increased by 6.1% y/y (3.4 percentage points increase in the annual growth rate).

MFI credit to households increased in January 2013 by PLN 0.9 billion (0.2%) and stood at PLN 539.1 billion. The value of monthly transactions amounted to PLN 0.2 billion. The annual growth rate in credit to households increased by 1.8 percentage points to 2%. The growth rate in housing loans was 3.3% y/y (2.3 percentage points increase in the annual growth rate), while the growth rate in consumer loans was negative and stood at -3.9% y/y versus -4.9% y/y in December 2012.

According to data for Q4 2012, the monetization of national economy varied. The M1 to GDP ratio decreased by 1.5 percentage points and stood at 30.4%, and the M3 to GDP ratio decreased by 1.3 percentage points and stood at 57.7%. Credit to domestic sectors to GDP ratio went down by 0.6 percentage points and stood at 54.7% y/y.

In January, the nominal exchange rate of the zloty⁽⁸⁾ depreciated by 2.4% against EUR, 0.1% against CHF and appreciated by 0.4% against USD, by 2.5% against GBP.

⁽⁸⁾ Exchange rate changes between December 2012 and January 2013 are calculated as the difference between end-month average exchange rates quoted by the NBP.

3

Balance of payments in Poland in January 2013

Components of monthly bop are estimated based on monthly and quarterly information reported by residents involved in transactions with non-residents, public statistics surveys as well as administrative data sources. This version of bop is preliminary and may be subject to further revisions.

3.1 Balance on current and capital account

Current account deficit in January 2013 amounted to EUR 1 546 million. The negative balance of the current account has been influenced by: negative balance of income (EUR 1 546 million) and current transfers (EUR 279 million) as well as positive balance of services (EUR 274 million) and trade in goods (EUR 5 million). In the corresponding period of the previous year this balance was also in deficit and stood at EUR 1 994 million. Decreased deficit in current account has been greatly influenced by negative to positive shift in trade in goods. Total balance of current and capital accounts was negative and amounted to EUR 1 539 million.

In January 2013, increase in exports dynamics was higher than increase in imports. In the reference month both exports and imports were estimated at a similar level. Exports was estimated at EUR 12 178 million and imports at EUR 12 173. When compared with data for January 2012 exports in goods increased by EUR 827 million i.e. 7.3% and imports went up by EUR 135 million i.e. 1.1%. Positive balance on trade in goods stood at EUR 5 million, up by EUR 692 million when compared with January 2012.

Credits on services increased when compared with January 2012 by EUR 88 million i.e. 4.4% and stood at EUR 2 069 million. Debits increased by EUR 95 million i.e. 5.6% and stood at EUR 1 795 million. Positive balance of services (standing at EUR 274 million) comprised: positive balance of transportation (EUR 276 million), travel (EUR 77 million), and negative balance on other services (EUR 79 million).

In January 2013, the balance of income was negative and amounted to EUR 1 546 million. In the corresponding period of 2012 this balance was also negative and stood at EUR 1 286 million. In January 2013, balance of income comprised: positive balance of compensation of employees (EUR 53 million) and negative balance of investment income (EUR 1 599 million). The negative balance of investment income was primarily driven by foreign direct investors income on their capital involvement in Polish companies amounting to EUR 1 218 million (including: positive reinvested earnings EUR 848 million, interest on debt instruments - EUR 254 million, and dividends EUR 116 million). Negative balance of income was also influenced by non-residents income on investment in securities (EUR 385 million) as well as interest paid on loans received by Polish entities (EUR 184 million).

3.2 Balance of EU transfers

In January 2013, the balance of EU transfers was negative and amounted to EUR 395 million. Inflow in current transfers (mostly owing to inflow of direct subsidies within European Social Fund and European Agriculture Guidance and Guarantee Fund) and stood at EUR 121 million. Inflow of funds in capital transfers stood at only EUR 26 million. EU membership premiums paid amounted to EUR 542 million net.

Balance of payments

⁽¹⁾ Preliminary information.⁽²⁾ Cumulated data are presented progressively in the 12 month perspective.

3.3 Non-resident investment in Poland

Balance of foreign investment in Poland was positive and amounted to EUR 2 921 million. This balance was determined mostly by net inflow of capital against portfolio and direct investment as well as outflow of capital against other investments.

Balance of foreign direct investment was positive and amounted to EUR 1 198 million. This balance comprised: net outflow of equity capital from Polish direct investment enterprises (EUR 17 million), positive reinvested earnings (EUR 848 million) and net inflow of debt instruments (EUR 67 million).

In January 2013, balance of foreign portfolio investment in Poland was positive and amounted to EUR 2 992 million. This balance resulted mainly from non-resident investment in Treasury bonds (net inflow EUR 2 354 million) issued on domestic as well as foreign markets. Non-resident investment in equity securities stood at EUR 641 million net.

Polish external liabilities in other investment decreased by EUR 1 269 million. This item has been mostly influenced by a decrease in liabilities of the NBP (down by EUR 993 million) as well as enterprise sector (down by EUR 731 million, mostly due trade credits). Liabilities of the banking sector decreased by EUR 232 million (mostly due to loans received). During the period in question liabilities of the local government increased by EUR 687 million.

3

3.4 Polish investment abroad

Polish investment abroad increased by EUR 824 million. Balance of Polish direct investment abroad was positive and stood at EUR 363 million (decrease in assets). In January 2013 an increase in assets has been observed in resident portfolio investment (EUR 520 million) and other investment (EUR 667 million, increase in assets of the banking system amounted to EUR 500 million mostly due to deposits placed with banks abroad).

3.5 Official reserve assets

The NBP's own transactions and NBP client transactions resulted in a decrease in the value of reserve assets by EUR 1 171 million. Valuation adjustments and exchange rate fluctuations led to a further decrease in this item (by EUR 1 766 million).

Official reserve assets as at the end of January 2013 amounted to EUR 79 640 million.

4

Key decisions of the Monetary Policy Council

Resolution No. 1/2013 of the Monetary Policy Council dated on January 9, 2013 on reference rate, interest on refinanced loans, interest on deposits with agreed maturity and rediscount rate at the National Bank of Poland.

– raw and seasonally – adjusted data

**Chart 5.3.9.2 MFI loans to corporations – seasonal adjustment factor**

5.4 Methodological notes

Table 5.1.1 Basic statistical data

Information contained in Table 5.1.1 is derived from the "Statistical Bulletin" of the Central Statistical Office [GUS]. Definitions of the categories presented in the Table can be found in the GUS publications.

1. Data presented in pts. 1, 2, 6, 7, 10 and 12 comprise national economy entities regardless of their ownership type, i.e. public sector entities (state-owned entities, units of local government and mixed ownership, where public sector entities prevail) and private sector entities. The private sector includes units of private domestic ownership (among others: companies, cooperatives, natural persons conducting economic activities, social organizations, associations, foundations), private foreign ownership (among others: foreign enterprises branches, foreign representatives, partnerships with exclusive foreign capital share) and "mixed" ownership with a private sector unit capital majority or lack of sectors majority in unit capital.
2. The corporate sector comprises entities, which conduct their economic activities in the fields of: forestry, including the provision of services; marine fishing; mining, manufacturing; electricity, water and gas production and supply; construction; wholesale and retail trade; repair of motor vehicles, motorcycles as well as personal and household goods; hotels and restaurants; transport, storage and communication; real estate renting and related business activities, renting machines and equipment without an operator and of personal and household goods; computer and related activities; other business activities; sewage and refuse disposal, sanitation management and other sanitation services; recreational, cultural, sporting and other services.
3. According to the Polish Statistical Classification of Economic Activities [PKD], the notion of "industry" applies to the following sections: "mining", "manufacturing" and "electricity, gas and water production and supply".
4. Data on the sold production of industry (pt.1), and the construction and assembly production (pt.2) refer to:
 5. economic entities with more than 9 employees.
6. Data on the value of the sold production of industry (pt. 1) and the construction and assembly production (pt 2) are disclosed net without the due value added tax (VAT) and the excise tax, while they include subsidies for specific purposes to products and services in the so-called base prices.
7. Construction and assembly production data (pt.2) refer to works performed on commission in Poland by the business entities of the construction sector, i.e. classified under "construction" according to the PKD.
8. Information on the sold production of industry (pt.1) and the construction assembly production (pt.2) are disclosed without seasonal adjustments.
9. Data on employed persons include persons employed on a full and part-time basis in the main place of work. Employed persons include: persons employed on the basis of a labour contract; owners and co-owners of units engaged in economic activities including contributing family members; outworkers; agents and persons employed by agents; members of agricultural production co-operatives. Data presented in the Bulletin do not include private farmers or employees of budget entities conducting activity within the scope of national defence and public safety.
10. Unemployment rate (pt 9) is calculated as a percentage share of the unemployed in the civilian population i.e. total of employed and unemployed persons over 15 years of age.

11. Revenues from privatisation do not constitute the current revenues of the state budget; instead they finance the budget deficit (pt. 11).
12. Data on financial results of enterprises (pt. 12) are presented as prescribed by the amended Accounting Act dated 29 September 1994 (uniform text Journal of Laws 2002 No.76, item 694, with later amendments).

Table 5.1.2 Financial market – basic information

Information comprised in Table 5.1.2 has been derived from the National Bank of Poland (save for the data in pt. 5, supplied by the Warsaw Stock Exchange).

1. Interest rates in Table 2 are presented on an annual basis at the level which was binding on the last day of a given month. The average monthly interest rate has been given only for the weighted average yield on purchased T-bills or the NBP money-market bills.
2. As from January 1 2011, the NBP no longer sets the central bank discount rate.
3. Total reserve requirements (pt.2, col. 12) pertain to the volumes declared by banks and binding on the last day of the month. Since 28 February 2002, the total reserve requirements are held exclusively on the NBP accounts.
4. Information on treasury bill tenders (pt. 3, except for the stocks of bills in circulation at the end of the month –col. 18) comprises data from tenders conducted within one month. The average yield on bills purchased is weighted by the share of the sales of bills with different maturities in the total value of bills purchased. The stock of bills in circulation at month end has been determined on the basis of the agreed maturity, calculated from the day after the tender which resulted in the sale of the bill. The above stock does not include bills in circulation which do not stem from tenders.
5. Information on tenders for the NBP money-market bills (pt. 4, except for the stock of bills in circulation at month end – col. 24 comprises data from tenders conducted within one moth. The average yield on bills purchased is weighted by the share of the sales of bills with different maturities in the total value of bills purchased.
6. The below presentation of indices comprises precise data involving the situation of the largest (WIG 20), medium (mWIG40) and small stock companies (sWIG80)
 - WIG20 index has been calculated since April 16, 1994 based on the value of portfolio with shares in 20 major and most liquid companies in the main stock market. The initial value of WIG20 index was 1000 points. It is an price index and thus when it is calculated it accounts only for prices of underlying shares whereas dividend income is excluded. The WIG20 index may not include more than 5 companies from a single exchange sector.
 - mWIG40 index is successor of MIDWIG index and has been calculated since December 31, 1997 and comprises 40 medium size companies listed at WSE. The initial value of index was 1000 points. mWIG40 is an price index and thus when it is calculated it accounts only for prices of underlying shares whereas dividend income is excluded. The mWIG40 index excludes WIG20 and sWIG80 index participants and foreign companies listed at WSE and other markets with the market capitalization at the ranking date above € 1 billion.
 - sWIG80 index is successor of WIRR index that has been calculated since December 31, 1994 and comprised 1% of smaller companies listed at WSE. The initial value of index was 1000 points. sWIG80 is an price index and thus when it is calculated it accounts only for prices of underlying shares whereas dividend income is excluded. The sWIG80 index excludes WIG20 and mWIG40 index participants and foreign

- companies listed at WSE and other markets with the market capitalization at the ranking date above € 100 M.
7. The indices comprise companies from all the quotation markets.
 8. Capitalization refers only to domestic companies.
 9. The P/E ratio shows the relation of the market price to net earnings and is calculated as a quotient of the total market value of companies at month end to their aggregated profits and losses generated within the last 4 quarters, for which financial data are available.
 10. The turnover ratio shows the relation between the value of sold shares to the average value of shares quoted in a given month.
 11. The monthly turnover value and the turnover ratio comprise the continuous quotation and fixing.

Table 5.1.3 PLN/USD and PLN/EUR daily exchange rates

The information has been based on the data of the National Bank of Poland.

1. The NBP average exchange rate is the official exchange rate used for statistical and accounting purposes.
2. The average PLN/USD and PLN/EUR exchange rates and the USD/EUR ratio were calculated as the arithmetic average of the NBP average exchange rates for a month (based on daily exchange rates).

5.4.1 Monetary statistics

The National Bank of Poland releases monetary statistics based on data received from monetary financial institutions (MFI), which comprise banks operating in Poland and branches of foreign credit institutions and foreign banks, credit unions and money market funds⁽¹⁾.

Sectoral classification

1. **financial sector** – comprises the following sub-sectors:
 - monetary financial institutions⁽²⁾ (including the central bank and other monetary financial institutions). *In Poland, the concept of other monetary financial institutions applies to banks, credit unions (SKOK) and money market funds¹*
 - insurance corporations and pension funds;
 - other financial intermediaries (including financial leasing companies, factoring companies, brokerage offices, investment funds, and financial companies created for securitization);
 - financial auxiliaries (including bureaus de change, bourses, hire purchase institutions);
2. **non-financial sector** – comprises the following sub-sectors:
 - state-owned corporations;
 - private corporations and co-operatives;

⁽¹⁾ As from January 2012 the MFI definition does not encompass money market funds as none of the investors fulfill the definition.

⁽²⁾ In accordance with the ECB definition, monetary financial institutions (MFIs) comprise financial institutions whose business is to receive deposits and/or close substitutes for deposits from entities other than MFIs and, for their own account, to grant credits and/or to make investments in securities.

- individual entrepreneurs;
- farmers;
- individuals;
- non-profit institutions serving households.

In the publications of the National Bank of Poland, claims and liabilities of banks to the non-financial sector will be presented in accordance with the EU standards, i.e. sub-divided into three sectors:

3. *households* - comprising:
 - individuals;
 - farmers;
 - individual entrepreneurs⁽³⁾;
4. non-financial corporations - comprising:
 - state-owned corporations;
 - private corporations and co-operatives (including: individual entrepreneurs with more than 9 employees);
 - *non-profit institutions serving households*: (separate legal entities, which serve households. Their principal resources, apart from those derived from occasional sales, are derived from voluntary contributions in cash or in kind from households, from payments made by general governments and from property income);
 - general government- comprises the following sub-sectors:
 - central government (including public governing bodies, government administration bodies, state control and law protection bodies, courts and tribunals, state universities, state institutions of culture and welfare etc.);
 - local government (including local administrative offices [at gmina and poviat level], local parliaments, public elementary schools, institutions of culture financed by local governments, welfare institutions, etc.);
 - social security funds (comprise the Social Insurance Institution and the Agricultural Social Insurance Fund and the funds they manage, and the national healthcare Fund and its branches).

Table 5.1.4 Average MFI Interest Rates on Outstanding Amounts, PLN Denominated

Data on zloty denominated businesses refer to all businesses at the end of the reporting month, these concluded prior to the reporting month and still binding as well as new businesses. This interest rate is a quotient of interest on average zloty denominated business by average volume of businesses per reporting month, commissions and other charges excluded.

The interest rate is calculated based on data received from the following banks (18):

1. Powszechna Kasa Oszczędności Bank Polski S.A.
2. Bank Polska Kasa Opieki S.A.
3. Bank BPH S.A.
4. Bank Handlowy w Warszawie SA
5. ING Bank Śląski S.A.

⁽³⁾ Natural persons conducting business activities on their own account, with a maximum of 9 employees.

6. Bank Zachodni WBK S.A.
7. BRE Bank S.A.
8. Bank Millennium S.A.
9. Bank Gospodarki Żywnościowej S.A.
10. Raiffeisen Bank Polska S.A.
11. BRE Bank Hipoteczny S.A.
12. Krakowski Bank Spółdzielczy
13. Bank Spółdzielczy w Brodnicy
14. Bank Gospodarstwa Krajowego
15. Bank Ochrony Środowiska S.A.
16. BNP Paribas Bank Polska S.A.
17. Credit Agricole Bank Polska S.A.
18. Santander Consumer Bank S.A.

At the end-December 2012, the above banks held 74% of deposits of residents and 72% of credit to households and non-financial corporations.

Table 5.1.5 Average MFI Interest Rates on New Business, PLN Denominated

Information refers to agreements carried out in a given reporting month. Appendices to existing agreements shall be deemed new businesses.

Interest rates in the statistics on new businesses differ from those in Table 5.1.4. The formula is applied to statistical information on new businesses, also known as *Narrowly Defined Effective Rate* (NDER). The concept of *Narrowly Defined Effective Rate* was coined as an opposite to widely understood effective interest rate or *Real Interest Rate* (RIR). The NDER included, the new business statistics provides RIR for the second category of consumer and house purchase loans. As opposed to the NDER, which covers for interest costs of capital the real interest rate incorporates all charges paid by the borrower. These charges are most of all commissions (brokers included) but also compulsory loan insurance premiums against death or unemployment of the borrower.

The Table 5.1.4 sample of banks applies.

Table 5.1.6 Average MFI Interest Rates on New Business, EUR Denominated

General rule of calculating interest rate are the same as for Table 5.1.4 (see star-matched lines) and Table 5.1.5. The Table 5.1.4 and 5.1.5 sample of banks applies as well.

General comments on tables 5.1.8, 5.1.11

1. The figures refer to the end of each reporting month and have been derived from balance sheets received from the banks within the framework of the "Banking Reporting Information system (BIS)" and from the balance sheet of the National Bank of Poland and credit unions (SKOK) and money market funds.
2. The presentation is structured in accordance with the ECB standards.
3. Assets in Tables 5.1.8, 5.1.9, 5.1.10 and 5.1.11 are shown gross of provisions, accumulated depreciation and write downs (except for securities presented at a market price).

4. Apart from external assets/liabilities debt securities issued and partly capital and reserves, all categories reflect operations with residents.

Table 5.1.8 Balance sheet of the National Bank of Poland – assets and liabilities

1. The item **credits, loans and other claims to domestic residents** (assets col. 1) comprises receivables from granted loans, including rediscount, lombard, refinancing for central investments, loans granted from foreign credit facilities, open market operations, other loans and receivables from current and fixed term deposits
2. Debt securities issued by domestic residents (assets col. 5) are securities held by the National Bank of Poland.
3. **Securities and other shares and other equity issued by domestic residents** (assets col. 8) – at the moment in the case of the NBP they include only fixed financial assets (equity).
4. **External assets** (assets col. 11) include all assets of non-residents denominated in zloty and foreign currencies.
5. **Fixed assets** (assets col. 12) include total fixed assets except for financial fixed assets.
6. **Other assets** (assets col. 13) include interest due and not due on the above-listed operations, deferred costs, inter-branch settlements and other assets excluding fixed assets.
7. **Deposits of domestic residents** (liabilities col. 2) represent liabilities on overnight deposits, deposits with agreed maturity, reserve requirements, auction deposits (open market operations), separated funds and other deposits.
8. **Debt securities issued** (liabilities col. 6) represent liabilities on the NBP debt securities issued by the NBP.
9. **Capital and reserves** (liabilities col. 7) in the case of the NBP it comprises equity i.e. authorised capital, as well as reserve fund and provisions, which include specific provisions, accumulated depreciation and valuation allowances.
10. **External liabilities** (liabilities col. 10) include all liabilities of non-residents denominated in zloty and foreign currencies.
11. **Other liabilities** (liabilities col. 11) include interest on the above-mentioned categories of liabilities, deferred income, inter and intra-MFI settlements, other liabilities and financial performance.

Table 5.1.9 Aggregated balance sheet of other monetary financial institutions – assets and liabilities

1. The category **credits, loans and other claims to domestic residents** (assets col. 1) include current accounts, reserve requirements, open market operations, deposits, loans and credits, debt purchased, realised guarantees and sureties, other claims, interest due and claims on securities purchased under repurchase agreements.
2. Debt securities issued by domestic residents (assets col. 5) held by other monetary financial institutions.
3. **Money Market Funds** participation units purchased by other MFIs (assets col. 9).

Starting from January 2012 the list of Polish monetary financial institutions (MFIs) does not include money market funds (MMFs), as no investment fund meets the criteria of MMF definition as set forth in the regulation of the European Central Bank No. 883/2011 of 25 August 2011 amending Regulation (EC) No. 25/2009 concerning the balance sheet of the monetary

financial institutions sector (ECB/2008/32, ECB/2011/12). At present the MFI sectors includes banks and credit unions.

As a consequence of the above change shares/units issued by MMFs deleted from the list of MFIs and held by banks have been reclassified to "Holdings of shares and other equity issued by domestic residents-other domestic residents"

4. **Securities and other shares and other equity issued by domestic residents** (assets col. 10) include shares, investment fund participation units, investment certificates and fixed financial assets (shares).
5. **External assets** (assets col. 13) include all assets of non-residents denominated in zloty and foreign currencies.
6. **Fixed assets** (assets col. 14) include total fixed assets except for financial fixed assets.
7. **Other assets** (assets col. 15) include vault cash i.e. cash and other cash equivalents held at other monetary financial institutions, as well as other claims and interest due and not due from all sectors, settlement accounts, claims on various debtors, deferred income and expenditure, other financial assets, value adjustments, rights issue, other assets, other operations, interest on securities purchased under repurchase agreement.
8. **Deposits and other liabilities to domestic residents** (liabilities col. 1) represent overnight deposits, deposits with agreed maturity, blocked deposits, deposits redeemable at notice, received credit and loans, including refinancing, auction (open market operations) and claims from cash collateral (classified to "with agreed maturities"), other liabilities and claims on repurchase agreements, subordinated claims save for those in securities issued.
9. **Money Market Funds** participation units issued by the MMF (liabilities col.9). Zero-sum in "Money market fund shares/units" results from change indicated in pt. 3 above.
10. **Debt securities issued** (liabilities col. 10) are liabilities on own debt securities issued by other monetary financial institutions and subordinated claims in securities issued (purchased by residents and non-residents).
11. **Capital and reserves** (liabilities col. 11) are divided into: a) core fund comprising share paid-in capital, called-up capital unpaid, own shares, accumulated reserves, general risk provisions, reserve capital and retained earnings, b) supplementary funds i.e. revaluation reserves and other supplementary funds specified in Banking Law Act (assigned both to residents and non-residents) other components of equity capital, c) provisions, including specific provisions, impairment allowances, mortgage notes reserves (resident, non-resident), specific provisions for off-balance liabilities (resident, non-resident), general risk provisions (resident, non-resident).
12. **External liabilities** (liabilities col. 15) include all liabilities of non-residents denominated in zloty and foreign currencies, except for reserves included in point 11, which comprise residents and non-residents as well as issue of debt securities and subordinated claims in securities purchased by non-residents.
13. **Other liabilities** (liabilities col. 16) include interest on the above-mentioned liabilities, settlement accounts, liabilities to creditors, deferred income and expenditure, suspended revenue, other liabilities from financial instruments, other liabilities, exchange rate fluctuations resulting from the conversion of subordinated liabilities, reserves for risk and expenditures not associated with the basic activities of the reporting bank, subordinated liabilities, other operations, interest on subordinated liabilities, value adjustments profit/loss during approval procedures, current year profit/loss.

Table 5.1.9.1 Credits, loans and other claims to domestic residents – households and non-financial corporations

Table 5.1.9.1 includes detailed breakdowns into two key sub-sectors (*households* – with specified *individuals* - and *non-financial corporations*) grouped under “Other domestic sectors” presented in col. 4 – assets (loans and other claims on other domestic sectors) of Table 9 “Aggregated balance sheet of other monetary financial institutions”.

As at the end of December 2012, *households and non-financial corporations* amounted to 95.3% of the assets disclosed in col. 4 Table 5.1.9.

Table 5.1.9.2 Deposits and other liabilities – households and non-financial corporations

Table 5.1.9.2 includes detailed breakdowns into two key sub-sectors (*households* – with specified *individuals* - and *non-financial corporations*) grouped under “Other domestic sectors” presented in col. 4 – liabilities (deposits and other liabilities to other domestic sectors) of Table 5.1.9 “Aggregated balance sheet of other monetary financial institutions”.

As at the end of December 2012, *households and non-financial corporations* amounted to 86.4% of the liabilities disclosed in col. 4 Table 5.1.9.

Table 5.1.10 Consolidated balance sheet of monetary financial institutions – assets and liabilities.

1. Table 5.1.10 comprises a consolidated balance sheet of monetary financial institutions
2. In the assets and liabilities of the above-mentioned balance sheet, domestic inter-MFI operations have been netted out.
3. Starting from January 2012 the list of Polish monetary financial institutions (MFIs) does not include money market funds (MMFs), as no investment fund meets the criteria of MMF definition as set forth in the regulation of the European Central Bank No. 883/2011 of 25 August 2011 amending Regulation (EC) No. 25/2009 concerning the balance sheet of the monetary financial institutions sector (ECB/2008/32, ECB/2011/12). As a consequence of the above change shares/units issued by MMFs deleted from the list of MFIs and held by banks have been reclassified to “Holdings of shares and other equity issued by domestic residents-other domestic residents” (assets col.7) and zero-sum in “Money market fund shares/units” (liabilities kol.8)
4. Other assets (assets col. 10) and currency in circulation (liabilities col. 1) were decreased by cash in vaults of other monetary financial institutions.

Table 5.1.11 M3 and counterparts

Table 5.1.11 presents money supply M3 and its counterparts with a monthly frequency. Each category is broken down by instruments (loans, deposits, securities, etc.) and sectors of the economy. The scope and the presentation format are adjusted to standards used by the European Central Bank. Starting from March 2002, broad money M3 became basic analytical and publication category of money supply in Poland.

Table Monetary aggregates

Currency in circulation (excluding vault cash)	Overnight deposits and other liabilities		Deposits and other liabilities with agreed maturity up to 2 years and blocked deposits	Deposits redeemable at notice up to 3 months	Repurchase agreements	Debt securities issued with maturity up to 2 years	M3
	M1	M2					
Households	Households	Households	Non-monetary financial institutions	Non-monetary financial institutions	Non-monetary financial institutions	Non-monetary financial institutions	
Non-monetary financial institutions			Non-financial corporations	Non-financial corporations	Non-financial corporations	Non-financial corporations	
Non-financial corporations			Non-profit institutions serving households	Non-profit institutions serving households	Non-profit institutions serving households	Non-profit institutions serving households	
Non-profit institutions serving households			Local government	Local government	Local government	Local government

Table 5.1.12 Reserve money and counterparts

The table presents reserve money of the central bank and its counterparts (official reserve assets, refinancing credit, open market operations, net credit to central government, other items net) with a monthly frequency.

Transactions statistics

Starting from end- September 2012, information on transactions and growth rates in key monetary categories has been included in M3 and counterparts – balalce sheet sheet format (including transaction data to be found at www.nbp.pl/Statistics/Monetary and Financial Statistics/M3 and Counterparts/)

Transactions complement data on outstanding amounts with information on developments arising from financial transactions between monetary financial institutions (MIF) and other sectors in the economy. The approach to calculate transactions adopted by the National Bank of Poland (NBP) – consistent with the European Central Bank (ECB) methodology – allows for estimating the value of transactions when actual financial transactions are not reported directly by reporting institutions. The change in outstanding amounts between two subsequent reporting periods is affected by both financial transactions and developments arising from non-transactions. In order to present developments in a certain instrument that are the result of financial transactions only it is necessary – in line with the ECB methodology – to remove from the difference in two subsequent end-month outstanding amounts changes arising from non-transactions. Transaction data provide more accurate and analytically meaningful information on growth rates in monetary categories.

Information on operations other than transactions, i.e. adjustments, cover change in outstanding amounts resulting from:

- A revaluations:
 - revaluations of securities,
 - write offs/write-downs of loans,
- B reclassifications and other adjustments, e.g. reporting errors and other statistical factors,
- C exchange rate adjustments.

Calculation of monthly transactions and growth rate

The starting point for calculating monthly growth rate is the computation of monthly changes arising from transactions (F_t^M), calculated based on the difference in outstanding amounts between two subsequent reporting months ($L_t - L_{t-1}$) – where L_t stands for the reporting month t and L_{t-1} for the previous reporting month $t-1$, adjusted for monthly changes in non-transactions, i.e. reclassifications (C_t^M), exchange rate changes (E_t^M) and revaluations (V_t^M)

$$F_t^M = (L_t - L_{t-1}) - C_t^M - E_t^M - V_t^M$$

Having calculated monthly transactions (F_t^M) one can proceed to calculating monthly growth rate (a_t^M) according to the following formula:

$$a_t^M = \frac{F_t^M}{L_{t-1}}$$

In order to obtain monthly growth rate in percentage terms the above formula is multiplied by 100.

The difference between the formula for the calculation of monthly growth rate adjusted for non-transactions and the formula for not adjusted growth rate s_t^M is in the value of CEV_t^M which is deducted from the difference in outstanding amounts between two subsequent reporting months ($L_t - L_{t-1}$)

$$a_t^M = \frac{(L_t - L_{t-1}) - CEV_t^M}{L_{t-1}} * 100 \quad \text{versus} \quad s_t^M = \frac{L_t - L_{t-1}}{L_{t-1}} * 100$$

Methodology for the compilation of transactions can be found at www.nbp.pl/english/Statistics/Monetary and financial statistics/M3 and counterparts/Methodology for the compilation of transactions.pdf

5.4.2 Statistical methods for the balance of payments in Poland (tables 5.1.13; 5.1.13.1; 5.1.13.2; 5.1.13.3; 5.1.13.4; 5.1.13.5; 5.1.13.6; 5.1.13.7; 5.1.13.8; 5.1.14; 5.1.15; 5.1.16; 5.1.17)

5.4.2.1 Institutional aspects

Introduction

The National Bank of Poland (NBP) is responsible for compiling and publishing Poland's balance of payments (b.o.p.) and related statistics (e.g. the international investment position (i.i.p.), external debt, foreign direct investment (FDI) statistics, reserve assets).

Legislative provisions

Under the Act on the National Bank of Poland (NBP) of August 29, 1997, published in the *Dziennik Ustaw* (Journal of Laws) of 1997, No. 140, Item 938, the NBP is obligated to compile the balance of payments and the international investment position statement and report thereon to Parliament.

The Act on the National Bank of Poland and the *Prawo dewizowe* (Foreign Exchange Act), published in the *Journal of Law* of 2002, No.141, Item 938, specify the reporting requirements. Under these acts and other legal regulations, the NBP is authorized to request data for compiling balance of payments statistics. Other legal regulations are (1) the Regulation of the Minister of Finance dated October 23, 2009, published in the *Journal of Law* of 2009, No. 184, Item 1437, and (2) the Resolution of the NBP's Management Board dated November 19, 2009, published in the *Dziennik Urzędowy NBP* (Official Journal of the NBP) of 2009, No. 18.

In cases of non-compliance with legal requirements, sanctions are imposed on non-reporting agents in the form of a fine that is regulated by the Penal and Fiscal Code (*Kodeks Karny Skarbowy*), as published in the Journal of Laws of 1999, No 83, Item 930.

The National Bank of Poland publishes data on the balance of payments as a service to the public.

External cooperation

NBP co-operates with domestic organizations (mainly with the Central Statistical Office) and foreign institutions. The data necessary for the compilation of balance of payments are provided by several institutions.

The CSO forwards to the NBP data on foreign trade and international trade in services, in line with methodology jointly developed by both institutions. Data on trade in goods and services from abroad are used by the CSO to calculate the rest of the world accounts in the national accounts statistics (GDP). The CSO also provides data on migration statistics, which are used to estimate income from Poles working abroad and foreigners in Poland and the information from the Household Budget Survey. The NBP has been collecting data from the CSO also needed to update the register of entities engaged in the operations included in the balance of payments.

The NBP receives from the Ministry of Finance (MF) data on foreign transactions of the government sector. The MF also provides information that is used in compiling balance of payments current account, i.e. the data on the import of used cars from the EU (data is not recorded by the CSO).

Data on foreign travel (Poles and foreigners) is collected by and sent to the NBP by the Institute of Tourism.

The Social Insurance Institution shall provide the NBP with data on the number of foreigners, which are paid for social security and health as well as data on pensions paid abroad.

The Ministry of Labor and Social Policy shall provide the NBP with data on the number of statements by employees willing to provide employment to foreigners as well as data on the number of employment permits issued - this is used in estimating income from employment of foreigners in Poland and remittances.

The NBP also cooperates in the methodology of balance of payments with international institutions such as the European Central Bank (ECB), Eurostat, International Monetary Fund (IMF), Organization for Economic Cooperation and Development (OBWR), World Bank (WB), Bank for International Settlements (BIS).

Users

Data on the b.o.p., the i.i.p., the external debt, the official reserve assets, the international reserves and foreign currency liquidity are posted on the NBP's website and are thus made available to users.

Moreover, data and publications are forwarded to the Parliament, the Government, the CSO and to private and public research institutes, universities, rating agencies, etc. Analytical papers on bop are published on the NBP website.

B.o.p., i.i.p. and direct investment statistics are supplied to the ECB, the European Commission (Eurostat), the IMF, the OECD and the World Bank on a regular basis.

5.4.2.2 Statistical system

The data collection system

The Polish balance of payments compilation system is based on direct reporting reported on monthly as well as quarterly basis by residents involved in transactions with non-residents, public sta-

tistics surveys as well as administrative data sources. The system provides for compiling the balance of payments with a detailed item-by-item breakdown. Credit and debit entries are available for part items. Net entries are derived from pure stock data. Geographical breakdown is available for data since 2004.

Reporting agents

Pursuant to the reporting obligation, national entities are required to send information on the financial account of the balance of payments and its income directly to the NBP.

Data on foreign transactions of the Ministry of Finance is provided by financial agents to the government (i.e. Bank Gospodarstwa Krajowego and the National Bank of Poland). Substantial portion of data on the current account is collected and published by external institutions (CSO –data on goods and services, the Institute of Tourism –data on international travel).

Reporting thresholds

Entities of public finance sector with total assets, liabilities and equity at year-end equal or over PLN 500 million report to the NBP on monthly basis, and Entities of public finance sector with total assets, liabilities and equity at year-end equal to PLN 26 million and below PLN 500 million report to the NBP on quarterly basis.

Natural persons whose receivables and liabilities unrelated to their business activity at year-end are equal to or above PLN 7 million report to the NBP on quarterly basis.

Other residents (excluding public finance sector entities, natural persons, investment entities which keep securities accounts and banks) whose total amount of assets, liabilities and equity capital at year-end is either equal to or greater than PLN 300 million report to the NBP on monthly basis and residents whose total amount of assets, liabilities and equity capital at year-end is higher than PLN 10 million and lower than PLN 300 million report to the NBP on quarterly basis.

Data availability

The monthly b.o.p. is published 30 working days following the end of a respective month. The b.o.p. is compiled quarterly and distributed three months following the end of the reference quarter. Detailed release calendar is available on the NBP website.

Breakdowns in the monthly b.o.p. are limited in detail. The quarterly b.o.p. is available with detailed instrument/category and sectoral breakdowns.

Data checks

At the individual level data is automatically checked during the transmission when uploaded to the database.

The data is also checked at an aggregated level through analysis of time series for each component.

Flows are reconciled with relevant stocks.

Moreover, the data is cross-checked with other sources, e.g. information on relevant stocks from b.o.p and monetary statistics, database of T-bonds central register, securities databases, internet, press, data on privatisations, etc.

Revision policy

Monthly b.o.p. data:

- first revision when the data of the following month become available;
- next revision when data of the relevant quarter is revised or published;

The quarterly b.o.p. data is routinely revised:

- first revision when data of the following quarter become available,
- next revision when Q4 data is available (i.e. end-March),
- further annual revisions, when data referring to corresponding annual i.i.p. become available or is revised (i.e. end-September).

Publication

The data on b.o.p., i.i.p., the external debt, the official reserve assets, the international reserves and foreign currency liquidity is released simultaneously to all interested parties by posting them on the NBP's website. Publication schedules are also posted on the website.

More detailed data on the b.o.p., i.i.p., external debt, reserve assets, direct investment and relevant analyses are published by the NBP:

- *Bilans płatniczy Rzeczypospolitej Polskiej* ("Balance of Payments of the Republic of Poland") – on a quarterly basis;
- *Zagraniczne inwestycje bezpośrednie w Polsce* ("Foreign Direct Investment in Poland") – on an annual basis;
- *Polskie inwestycje bezpośrednie za granicą* ("Polish Direct Investment Abroad") – on an annual basis.

Moreover, the hereinbelow NBP publications also comprise the b.o.p. data:

- "Preliminary Information" – on a monthly basis;
- "Information Bulletin" – on a monthly basis;
- "NBP's Annual Report" – on an annual basis.

5.4.2.3 Balance of payments⁽⁴⁾ (tables 5.1.13; 5.1.13.1; 5.1.13.2; 5.1.13.3; 5.1.13.4; 5.1.13.5; 5.1.13.6; 5.1.13.7; 5.1.13.8)

Definition

The balance of payments is a statistical statements that summarizes economic transactions between Poland and all other countries (i.e., between Polish residents and non-residents) in a defined period of time. The balance of payments incorporates the current account, the capital account, the financial account, errors and omissions, and the official reserve assets.

5.4.2.3.1 The current account

Definition

The current account comprises transactions in goods, services, income, and current transfers.

⁽⁴⁾ The international standards were defined in the following publications: *Balance of payments and International Investment Position Manual*, 6th edition, 2009, International Monetary Fund, *OECD Benchmark Definition of Foreign Direct Investment*, 2008, OECD, *Balance of payments Vademecum*, Eurostat, 2010, *European Union balance of payments/international investment position statistical methods*, European Central Bank, 2007, *System of National Accounts*, 2008, Inter-Secretariat Working Group on National Accounts, *European System of Accounts ESA 1995*, Eurostat, 1996

5.4.2.3.1.1 Goods

Definition

Trade in goods item of the balance of payments includes the value of exchange of goods with foreign countries which comprises transactions between residents and non-residents, including but not limited to:

- transactions leading to the change in ownership of goods; these are mainly purchase/sale transactions, however the change in ownership of goods may also result from free-of-charge transfer (donations, aid in-kind), as well as from the in-kind contributions by foreign investors or from of financial lease of goods (such as means of transport, machinery and equipment);
- transactions involving goods for processing; this trade is presented in the balance of payments at its gross value i.e. the value of goods for further processing, whereas upon further processing, the total value of goods for further processing and the value of further processing service, i.e. processing of those goods,
- transactions involving repairs of goods (net value of repair services)

Trade in goods does not include the purchase and sale transactions of monetary gold carried out between central banks.

Specific features of data collection

The main source of data on goods in the Polish balance of payments is Foreign Trade Statistics (FTS) compiled by the Central Statistical Office (CSO) on the basis of INTRASTAT declarations (for intra-European Union trade) as well as from the Single Administrative Documents, SAD (for extra EU trade); this data is published by the CSO under the foreign trade item.

Due to the fact that the international methodological standards are nearly the same in case of compilation of trade in goods with foreign countries for the balance of payments and for the national accounts purposes, the NBP and the CSO agreed on the principles of transition from the foreign trade data in the FTS into the trade in goods data in the balance of payments and national accounts. In order to obtain the relevant data, the following adjustments must be made:

- the decrease in the value of foreign trade data on the import side by the value of costs of transport included in the invoices drawn upon the CIF basis;
- additional estimation of the trade in goods.

Additional estimation of the trade in goods with foreign countries, made for the balance of payments and for national accounts relates to the turnover which was not registered in the FTS. It includes the following three groups of goods:

1. goods transported by tourists (in tourist traffic), which were purchased for resale
2. other goods transported across the border without either the INTRASTAT declarations or the SAD documents being filled in (these include mainly the exported goods transferred abroad in bigger quantities without either the INTRASTAT declarations or the SAD documents, such as vegetables, fruit, furniture, footwear, clothing)
3. foreign trade data is increased by the value of imports of second-hand cars from European Union, which is not included in INTRASTAT system due to the low reporting thresholds for imports of cars. This data is obtained from Ministry of Finance which collects it for fiscal purposes.

Deviations from international standards

Transactions concerning repairs of goods (which should be included in trade in goods according to international standards) are not recorded in the INRTASTAT declarations.

5.4.2.3.1.2 Services

Definition

Transport services include the services related to transport of goods (freight), transport of passengers and other services connected with the abovementioned transport services, e.g. loading and unloading of containers, storage and warehousing, packaging and repackaging, towing and traffic control, maintenance and cleaning of equipment, rescue operations.

The trade in services concerning **travel** apply to the non-residents' expenditure in Poland and the expenditure of Poles abroad due to travel. This category includes expenditure on accommodation, catering and services as well as goods purchased by tourists for their own needs (whereas the objects purchased for resale are classified as goods). Subject to the objective of travel, the expenditures are classified as business travel (including these of the seasonal and cross-border employees and other business travels) and personal travels (health, study and other).

In addition to the transport services and foreign travel, there is a third type of services - **other services**. This category includes a number of transactions related to communication, construction, insurance, finance, and information technology, patent fees, royalties and licence fees, other business services (e.g. merchanting and other trade-related services, operational lease and other business services), personal, cultural, and recreational services as well as government services.

Generally, the revenues include the value of services rendered by residents to non-residents, whereas the expenditures include the value of services rendered by non-residents to residents. On the other hand, in accordance with the international standards, certain services are presented in the balance of payments in a special way. Therefore, construction services are divided into services rendered abroad (the expenditures include the costs of those services incurred by residents) and the ones performed at home (the revenues include the costs of services incurred by non-residents). The merchanting is presented on the net basis (revenues minus expenditures), always on the side of revenues, while the insurance services are expressed as a difference between premiums and claims.

Specific features of data collection

The data on trade in **services** both transport services and other services is collected by the Central Statistical Office directly from enterprises rendering and acquiring such services. The data is collected on a quarterly and annual basis and is broken down by required component type and country.

Furthermore, the value of services related to transport of goods is increased by the value of services resulting from the reclassification of a given part of the value of goods. This refers to the necessity of considering the fob-based value of goods in the balance of payments. In the FTS, only the value of export is expressed on the fob basis, whereas the value of imported goods is shown on the cif basis. Thus the decrease in the value of goods and the reclassification of the costs of transport and insurance services to a relevant category of services are required. Some values are estimated. The estimates include:

- transfer from the cif base to the fob base in the area of import of goods included in FTS,
- share of the transport costs in the payment for the export of goods executed by Polish carriers,

- share of individual types of costs (according to the means of transport) in the abovementioned estimated values.

The value of export of services related to transport of goods is also increased by the costs of transport rendered by Polish carriers and included in the invoices of trade in goods.

The source of data for the compilation of travel in the balance of payments is the data of Institute of Tourism, which carries out surveys on travel.

Deviations from the international standards

In the above described procedure of increasing the value of **transport services** by the adjustments of trade in goods resulting from the transfer from the cif base to the fob base all corrected amounts are classified as transport services, while insurance services are not separated.

5.4.2.3.1.3 Income

Specific features of data collection and definitions

Compensation of employees

Compensation of employees comprises foreign transfers related to payment for work performed by non-residents employed in Poland and Poles employed abroad i.e. persons who have been working abroad for less than one year.

Compensation of employees is calculated with the use of a new estimation method. This method rests to a great extent on determining the number of Poles working abroad, period of their employment as well as the level of their compensation and their willingness to transfer their money to Poland. Major data source for estimating the number of Poles working abroad is the CSO data on migration, data derived from LFS (household survey carried out by Polish Central Statistics Office) as well as data from those countries in which Poles have found employment. Remaining elements of the new estimation method have been derived, to a great extent, from the NBP survey carried out in selected European countries. The estimation methods for expenses and revenues are similar. The number of non-residents employed in Poland is estimated based on data derived from Ministry of Labor and Social Policy on number of work permits issued and on the data from the Social Insurance Institution (ZUS) on non-residents for whom payments on account of labour are made.

The same sources of data is used for estimates of workers' remittances included under current transfers of other sectors in balance of payments both for revenues and expenses.

Direct investment income

Income on direct investment comprises both income on equity capital and income on debt. The income on equity comprises dividends attributable to a direct investor and declared for a given reporting year (as regards public companies), share in profit (as regards limited liability companies), transferred profits of branches and reinvested earnings (loss per direct investor is deemed negative reinvested earnings). The income on debt, on the other hand, is included in the balance of accrued interest on loans extended and obtained by direct investors.

Data on direct investment income is derived directly from residents' reports. The data comprise also estimated reinvested earnings, which have been presented as net reinvested income since 1996 i.e. excluding loss, in accordance with the OECD recommendations.

Portfolio investment income

In case of securities with the ISIN code data on portfolio investment income in the balance of payments is calculated on the accrual "security-by-security" base. The source of data for these calcula-

tions is security-by-security reports collected directly from Polish securities holders, issuers and financial institutions (securities trading intermediaries) and data on characteristics of securities derived from the database maintained by the National Bank of Poland. This database is supplied with data derived from the National Depository for Securities, Centralised Securities Database maintained by the ECB and data reported by Polish issuers. In case of securities bearing no ISIN code data on income is reported directly by reporting entities on memorial base. Securities are broken down by security type (equity securities, long-term debt instruments, money market instruments) and by sector of resident paying or receiving the revenue (general government, banks, other sectors). As regards income on equity securities, only dividends are registered in the income category. All other incomes or losses on equity securities (especially income or loss resulting from the difference in purchase price and sale price of the security) are registered on the financial account of the balance of payments, in the „portfolio investment” category.

Other investment income

Other investment income is registered on accrual base. It comprises income on financial instruments which are regarded as other investments of the financial account and income on official reserve assets. Income on other investment of the financial account comprises: interest on loans extended and received, interest on deposits including interest on repos, and other payments related to income on property. The amount of interest comprises interest due: paid and unpaid. Data on income on official reserves include income on debt securities, interest on deposits and interest on repos.

5.4.2.3.1.4 Current transfers

Definition

Current transfers are defined in the balance of payments as one-way transactions such as donations, free-of-charge exports and imports of goods and services under international aid schemes, which are not accompanied by change in value of external account receivables or account payables. Transfers are executed, both in cash and in kind, in favour of government institutions or other sectors (private).

Funds received or paid by the Polish government sector that is central government and local government units constitute **government transfers**. These are the funds received from European Union institutions, countries and international organisations as well as paid in favour of these institutions and countries to finance current expenditures of the government – such as humanitarian aid, medicines, training, etc. These include also membership fees for the EU and international organisations outside the EU. The category includes also taxes and payments made by non-residents in favour of Polish government sector. Revenues from obligatory social insurance as well as retirement and annuity benefits paid by the Social Insurance Institution (ZUS) in favour of non-residents, and indemnities paid by the government vis-à-vis non-residents constitute other government transfers.

Private transfers (of other sectors) comprise transfers of workers' remittances and other transfers.

The workers' remittances comprise transfers of wages and salaries of persons working abroad and considered to be residents of the country in which they work. In compliance with the IMF recommendations, a person staying or intending to stay for a year or longer on the territory of a given country is a resident of that country. In such a case, funds transferred in favour of the person's family are registered in the Current transfers as workers remittances. On the other hand, in case of the stay lasting shorter than a year, the person is treated as non-resident and its income is registered in the balance of payments under Income as compensation of employees.

The other transfers of non-government sector include the value of private transfers abroad of residents – natural persons and other entities of national economy. The other transfers of non-government sector made in kind (free-of-charge transfers of goods and services in foreign trade) and in cash include:

- donations and aid received from abroad, as well as rendered in favour of non-residents, related to execution of objectives not connected with investment (e.g. humanitarian aid, food, clothing, medicines, training),
- taxes and fees in favour of foreign governments,
- membership fees,
- retirement and annuity benefits received by residents from abroad,
- inheritance,
- alimony,
- fines and indemnity (e.g. related to breach of contracts, product forgery, forgery of trademarks, patents),
- competition and lottery winnings,
- fees for transfer of sportsmen.

Specific features of data collection

The source for **government transfers** category in the balance of payments is the Regional Branch of the National Bank of Poland which keeps settlements of banking accounts of Ministry of Finance that are used for government transfers (both regarding UE and the other international organisations). The data on other transfers such as retirement and annuity benefits paid by Polish government is derived directly from the Social Insurance Institution (ZUS) which is in charge of such transfers.

The source used for compilation of workers' remittances has been described in the chapter on compensation of employees.

The data on transfers of other sectors is compiled based on numerous data sources.

The data on transfers of enterprises is collected in the frame of survey on international trade in services carried out by the CSO. The other transfers of other sectors on revenue side are mainly based on LFS (household survey made by Polish Central Statistics Office); information from Ministry of Finance and the Social Insurance Institution (ZUS) is used as additional sources.

Deviations from the international standards

Since 2011, in connection to adjustments in trade in goods data collection process, the data on transfers in kind compiled based on INTRASTAT and SAD systems are not subject to registration.

5.4.2.3.2 Capital account

Definition

The basic components of the capital account in the balance of payments are capital transfers representing transfers of rights to tangible assets, i.e. donations and funds included in non-returnable grants, specially assigned to fixed assets financing, debt write-offs by the creditor, transfer of funds related to the acquisition or disposal of nonfinancial and non-produced assets. Capital transfers are compiled separately for the government sector and other sectors.

Capital transfers of the government sector reflect the value of funds received from EU institutions, countries and international organisations, as well as funds transferred by the Polish government in favour of these institutions. Funds in cash are allocated free-of-charge to financing investment in fixed assets e.g. construction of roads, motorways, bridges, schools, hospitals, etc. The category of capital transfers of the government sector comprises write-offs of receivables, both principal and interest.

Capital transfers of other sectors comprise donations and grants specially assigned to fixed assets financing, which were received from or transferred abroad by nongovernment units.

Acquisition and disposal of non-produced nonfinancial assets comprises purchase and sale of patents, copyrights, licenses and trademarks, purchase and sale of land to foreign embassies located in Poland as well as purchase and sale of land by Polish embassies abroad.

Specific features of data collection

Capital transfers of **government sector** are compiled in the balance of payments on the base of the data derived directly from the banking accounts of the Ministry of Finance.

Capital transfers of other sectors are calculated based on data collected under the survey on international trade in services carried out by the CSO which, apart from the data on turnover of services, collects information on current transfers and capital transfers.

5.4.2.3.3 Financial account

Definition

The "financial account" comprises financial transactions involving direct investment, portfolio investment, other investment, and financial derivatives.

5.4.2.3.3.1 Direct investment

Definition

The NBP compiles data on direct investment in compliance with the OECD definition. The term „direct investment abroad” denotes an investment made by a resident entity in one economy (“direct investor”) in an entity resident in an economy other than that of the investor („direct investment enterprise”) aimed at attaining a long-term profit from the capital involved. The direct investment enterprise denotes an enterprise in which direct investor owns at least 10% of the voting power in the decision making body of the company.

The direct investment capital comprises equity capital, paid in cash or in kind, capital adjustment, reinvested earnings and other capital (mostly credits extended by investors, the so-called inter-company loans).

Reinvested earnings denote the part of profits, accruing to a direct investor, which remains in the direct investment enterprise and which is allocated to its further development. As mentioned earlier, in accordance with the OECD and IMF new methodology, beginning from 1996, the reinvested income has been computed on the net basis, that is after loss deduction.

Specific features of data collection

Data on Polish direct investment abroad and foreign direct investment in Poland have been compiled based on survey on Polish direct investors and Polish direct investment enterprises.

Data on direct investment have been collected from the entities exceeding general reporting thresholds based on its sum of external assets and liabilities and meeting additionally criterion of 10% share in the voting power in the decision making body of the company.

5.4.2.3.3.2 Portfolio investment

Definition

Equity securities comprise all kinds of tradable shares and stocks, including investment certificates (shares) of collective investment funds. These comprise also participation units in collective investment funds, investment certificates and depository receipts (e.g. ADR or GDR).

Debt securities comprise all kinds of long-term and short-term debt securities including government bonds, corporate bonds, T-bills, short-term corporate debt securities and negotiable certificates of deposit. Debt securities are classified as long-term securities or money market (short-term) instruments based on their original maturities. Long-term debt securities are securities with original maturity of at least one year. All other debt securities are classified as money market instruments (short-term debt securities). Debt securities category comprises also debt securities with embedded financial derivatives (e.g. convertible bonds or callable/putable bonds). Financial derivatives (i.e. those that constitute a separate financial instrument) are excluded from the portfolio investment category and registered under „Financial derivatives” item – a separate category of the balance of payments.

Repo transactions are also excluded from the portfolio investment category and registered in „Other investment” category.

Specific features of data collection

The source of data on portfolio investments item in the balance of payments are “security-by-security” reports on positions and transactions collected directly from Polish holders of securities (in case of portfolio assets), issuers and intermediaries in trading in securities (in case of portfolio liabilities). In case of securities bearing the ISIN code, the data used in the process of verification and compilation of reporting data is the data on characteristics of securities e.g. coupons, prices, corporate events derived from the database kept by the National Bank of Poland. This database is supplied with data derived from the National Depository for Securities, Centralised Securities Database maintained by ECB and the data derived directly from Polish issuers. In case of securities issued by the State Treasury on the domestic market (bonds and T-bills) data on transactions is calculated based on data on positions derived from the National Depository for Securities (for government bonds) and the NBP’s own data (for T-bills). In case of securities with no ISIN codes data on transactions is reported directly by reporting entities.

In case of securities issued by Polish entities within foreign markets the residual approach is applied. The data from the issuers is modified in the process of compilation with the use of the data on transactions executed by Polish holders of these securities. Securities are broken down by sector or resident-issuer of securities (for liabilities), sector of resident-holder of securities (for assets) as well as by country of issuer for portfolio assets.

5.4.2.3.3 Other investment

Definition

Other investment comprises all financial transactions that are not covered by direct investment, portfolio investment or official reserve assets. Other investment covers: trade credits, loans, currency and deposits as well as other assets and liabilities.

Trade credits

Trade credits are estimated based on stocks of assets and liabilities related to advances extended and payments deferred in imports and exports of goods and services.

Credits and loans

Extended and received **credits and loans**, apart from the breakdown into long-term (with original maturity exceeding one year) and short-term (with original maturity of up to one year), are registered in a breakdown by the sectors of economy. Credit turnover comprises not only drawings and repayments in cash but also drawings and repayments in the form of goods and services delivery, cancellation, interest capitalization and credit restructuring.

Current accounts and deposits

On the assets side the current accounts and deposits are calculated on the base of stocks of claims on cash in the form of foreign currency (only the banking sector), current accounts and deposits in credit institutions and foreign banks. This category comprises: current accounts and deposits (including overnight deposits), term deposits, deposits with the time limit of termination, blocked deposit accounts and repo transactions. On the liabilities side the current accounts and deposits are calculated on the base of stocks of liabilities on current accounts and deposits held by non-residents. This category comprises: current accounts and deposits (including overnight deposits), term deposits, deposits with the time limit of termination, blocked deposit accounts and repo transactions. The current accounts and deposits cover also liabilities on money security excluding initial margin for derivatives.

Other assets and liabilities

Other financial assets and claims on non-residents comprises among others assets which result from difference of the time of transaction and the time of corresponding payment e.g. claims on the share in profit or dividend declared but not yet paid or converted into another financial instrument; funds deposited on current accounts in other intuitions i.e. other than foreign banks and credit institutions; claims on returnable variation margins (initial margin) for derivatives. The item other liabilities to non-residents covers among others liabilities which result from transactions implying difference of the time between the transaction and the time of corresponding payment (e.g. dividend declared but not yet paid or converted into another financial instrument) and liabilities on returnable variation margins (initial margin) for derivatives.

Method of data collection

Since 2010 data on other investment, both Polish investment abroad and foreign investment in Poland have been compiled on the base of reports directly supplied by Polish reporting entities.

5.4.2.3.3.4 Financial derivatives

Definition

The "Financial derivatives" constitute the separate category of the balance of payments. It comprises all derivatives with symmetrical risk such as futures, forwards, swaps, IRS, CIRS, CDS as well as instruments with unsymmetrical risk such as options. This item includes both derivatives settled by delivery of basic instrument and derivatives settled in cash. The profit or loss on transactions involving financial derivatives is classified into this category.

The data on financial derivatives are also available in geographical breakdown. The criterion of a first identified contractor is used to determine national status of the parties of transaction. The breakdowns by the type of a basic instrument (foreign exchange rates, interest rate, commodity, shares, credit derivatives, others) and by pairs of currencies (in case of foreign exchange instruments) or by settlement currency (for other types of derivatives) are available.

Specific features of data collection

The source of data on financial derivatives for the balance of payments is reports collected directly from Polish entities having positions which emerged as a result of transactions on derivatives with non-residents.

Financial derivatives cover all financial flows resulting from settlements of transactions involving financial derivatives, except returnable initial margins. In the discussed category variation margins and option premiums are registered. Data is registered on gross basis.

5.4.2.3.4 Official reserve assets

Definition

Official reserve assets comprise transactions with non-residents related to: monetary gold, reserve position in the IMF, foreign exchange and other claims, in convertible currencies.

Official reserve assets item comprises balance of transactions carried out by the NBP with respect to instruments included in official reserve assets, (including the balance of turnover on currency and deposits accounts in banks abroad, balance of transactions executed in foreign currencies in the NBP counters, balance of turnover of foreign securities, balance of repos and transactions on financial derivatives; change in reserve position in the IMF as well as purchase and sale of monetary gold).

Method of data collection

Data on official reserve assets are collected based on accounting system of NBP.

5.4.2.4 International Investment Position (table 5.1.14)

The NBP compiles the IIP for all financial account items (i.e., direct investment, portfolio investment, other investment, derivatives and reserve assets). The IIP is compiled quarterly and published three months after the end of a reference quarter.

Direct investment

The data on direct investment stocks is derived from monthly and quarterly surveys (equity and loans) and is supplemented by annual survey (equity only – more detailed breakdowns). Data on equity is collected on the market value basis for listed companies and own funds at book value for the others, unless there is information on value from recent transactions. The data on stocks of loans is based on the accrual value. The bonds and money market instruments are recorded at market value.

Portfolio investment

The source of data is security-by-security portfolio investment reports on stocks and flows collected directly from Polish holders (in case of portfolio assets), or Polish issuers and financial intermediaries (in case of portfolio liabilities). For securities bearing the ISIN code, descriptive data, e.g. prices, coupons, corporate events from the securities database, maintained by the NBP are used in reported data verification and compilation. By means of the security database, the valuation changes and exchange rate changes are calculated by the NBP. For Polish Treasury securities issued in domestic market (T-bonds and T-bills) the stocks are supplied by Polish National Depository for Securities.

For securities without ISIN code, the data on stocks and transactions reported directly by reporting entities is used for compilation. The reports, apart from the data on stocks (nominal and market

value) and on transactions, include the data on valuation changes, exchange rate changes and on other changes.

For securities issued by Polish entities in foreign markets, the residual approach is applied. The data on resident holdings on such securities is collected and used to adjust, in the process of compilation, the issue data of these securities.

Financial derivatives

The source of data are reports on stocks and flows collected directly from Polish entities holding positions in financial derivatives vis-a-vis non-residents. The reports, apart from the data on stocks (market value) and on transactions, include data on valuation changes, exchange rate changes and on other changes.

The financial derivatives category includes all symmetric risk instruments, such as futures, forwards, swaps, IRS, CIRS, CDS and asymmetric risk instruments, such as options. In terms of coverage, derivatives settled by underlying instrument delivery, as well as derivatives with cash settlement are included. Breakdowns by underlying instrument (foreign exchange, interest rate, commodities, equity securities, credit derivatives and other) and by domestic sector are available. Breakdowns by currency pairs (for foreign exchange derivatives) or by settlement currency (for other types of derivatives) are also available.

Other investment

Trade credits

Trade credit data is based on monthly and quarterly survey of exporters and importers. The information is based on the nominal value. The data refer mainly to "other sectors."

Loans

Information on loans is broken down into long-term (with original maturity exceeding one year) and short-term (with original maturity of up to one year) broken down by the sectors of economy. Since 2010 data on loans is obtained from monthly and quarterly surveys. The accruals principle applies.

Currency and deposits

For the NBP's currency and deposits, the information is derived from its balance sheet (excluding reserve assets). For other banks, data is derived from their balance sheets. The item also includes data on assets of non-government and non-bank entities in the form of accounts with banks abroad. Since 2010 data on currency and deposits is obtained from monthly and quarterly surveys. The data is based on the accrual value.

Other assets and liabilities

Other assets and liabilities cover data on assets and liabilities other than loans, debt securities, trade credits, currency and deposits. Since 2010 data on other assets and liabilities is obtained from monthly and quarterly surveys. The accruals principle applies.

Reserve assets

The stocks of official reserve assets are derived from the NBP's balance sheet, available on a monthly basis. Reserve assets are valued at market or approximate-to-market value, covering only

actually existing assets denominated in foreign currencies. Generally, stocks include accumulated accrued interest. The item excludes claims on residents.

5.4.2.5 The official reserve assets (table 5.1.15)

The official reserve assets have been described in the International Investment Position (Table 5.1.14).

5.4.2.6 External debt (tables 5.1.16 and 5.1.17)

The National Bank of Poland reports information on Poland's external debt in accordance with the following definition: "Gross external debt is the amount, at any given time, of disbursed and outstanding contractual liabilities of residents of a country to non-residents to repay principal, with or without interest, or to pay interest, with or without principal". This definition was defined as the core definition.

The above definition refers to gross debt, i.e. it refers to the particular foreign liabilities of Poland (with no deduction of Polish assets abroad). The term "contractual liabilities" stands for formal obligation to make a specific payment (principal instalment and/or interest). This excludes equity participations from external debt. The phrase "principal with or without interest" means that the concept of external debt also includes non-interest-bearing liabilities, as these also involve a "contractual" obligation to repay. The phrase "interest with or without principal" signifies that the concept of external debt also incorporates liabilities with no stated maturity (e.g. undated bonds). The term "disbursed and outstanding" excludes potential liabilities, e.g. the undistributed portions of existing credit facilities.

The distinction between domestic and external (foreign) debt is based solely on the criterion of residence, regardless of the currency involved.

The following categories of financial instrument have been included in the concept of external debt:

- intercompany loans;
- current balances and time deposits held by non-residents at Polish banks;
- debt securities held by foreign investors;
- trade credits;
- other loans and credits (including financial leases);
- other foreign liabilities (arrears of principal and interest).
