Chapter 1

Economic developments

According to the Statistics Poland monthly data the industrial output in September increased by 5.9% y/y versus 1.5% y/y increase the month before. Adjusted for seasonal factors the overall industrial output increased by 3.6% y/y when compared with the corresponding month of the previous year.

Increase in output was registered in manufacturing (7.2% y/y). Decrease was reported in electricity, gas and hot water supply^{*1} (4.3% y/y) and mining (down by 14.4% y/y).

Increase in industrial output, when compared with the corresponding period of the previous year, was reported for 23 (of 34) branches of industry. Increase² was reported for furniture (15.8% y/y), rubber and plastics (10.7%), metal products* (2.0% y/y), other non-metallic mineral products (5.9% y/y), food products (5.8% y/y) as well as motor vehicles, trailers and semi-trailers* (2.9% y/y). Decrease on the other hand was reported for machinery and equipment* (5.7% y/y).

In September 2020, construction and assembly production – for enterprises with more than 9 employees – was by 9.8% lower when compared with the corresponding period of the previous year. In August 2020, the above indicator decreased by 12.0% y/y. Adjusted for seasonal factors the construction and assembly production went down by 10.6% y/y.

In September, the annual PPI indicator decreased by 1.6% y/y versus 1.3% y/y decrease the month before. When compared with the corresponding period of the previous year prices in manufacturing went down by 2.5% y/y. Increase in prices was reported in mining by 5.4% y/y as well as electricity, gas and hot water supply, up by 2.1% y/y.

According to the Statistics Poland data for August 2020,³ among branches of manufacturing, being major employers, decrease in prices was reported for rubber and plastics (2.1% y/y) as well as furniture (1.9% y/y), metal products (0.6% y/y) and other mineral non-metallic products (0.1% y/y). Increase in prices was reported in motor vehicles, trailers and semi-trailers (2.7% y/y), machinery and equipment (0.6% y/y) as well as food products (0.4% y/y).

In September 2020, construction and assembly production prices went up by 2.5% y/y, similarly to the month before.

The Consumer Price Index (CPI) for September went up by 3.2% y/y versus 2.9% y/y the month before. Increase in prices was reported for household maintenance and energy fees (7.3% y/y), telecommunication services (5.5% y/y), healthcare (5.0% y/y), alcohol and tobacco

¹ The asterisk (*) signifies that the name used is an abbreviated version of the name listed in PKD 2007. The symbol had been used only on first appearance of the name.

² Only sections with 5% average employment in “manufacturing” were taken into account.

³ Total industrial output prices and prices for the three major sections combined: “mining and quarrying”, “manufacturing” and “electricity, gas and hot water supply” are published by the Statistics Poland in advance to detailed data on individual sections.

(corresponding period of the previous year = 100)

(4.7% y/y) and food and non-alcoholic beverages (2.8% y/y). Decrease in prices was reported in transportation (4.9% y/y) as well as footwear and apparel (2.0% y/y).

In September, the average employment in the enterprise sector stood at 6 312 thousand – down by 1.2% (74 thousand) when compared with the year before. Decrease in employment was reported for manufacturing (2.0% y/y), electricity, gas and hot water supply (1.3%) and mining (3.0% y/y).

In manufacturing decrease in average employment was reported in motor vehicles, trailers and semi-trailers (5.5% y/y), machinery and equipment (4.8% y/y), rubber and plastics (2.3% y/y), furniture (2.1% y/y), metal products (1.1% y/y), other mineral non-metallic products (0.5% y/y) and food products (0.5% y/y).

Chart 1.6. Registered unemployed persons (corresponding period of the previous year = 100) and unemployment rate

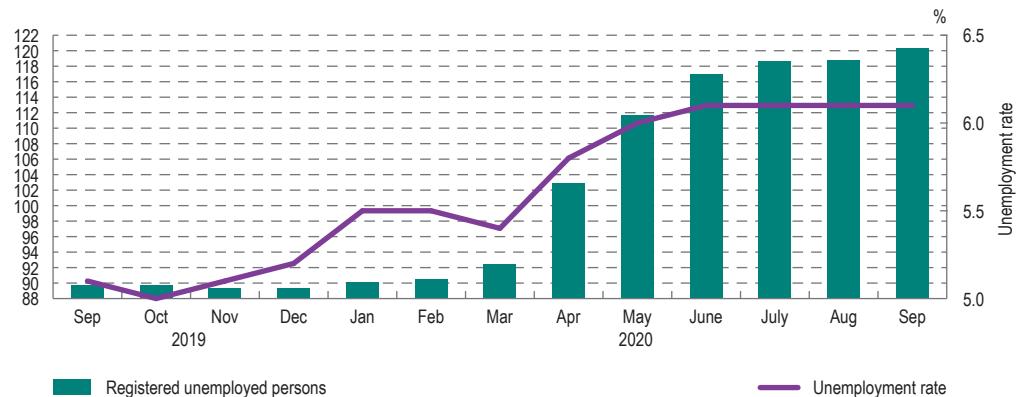

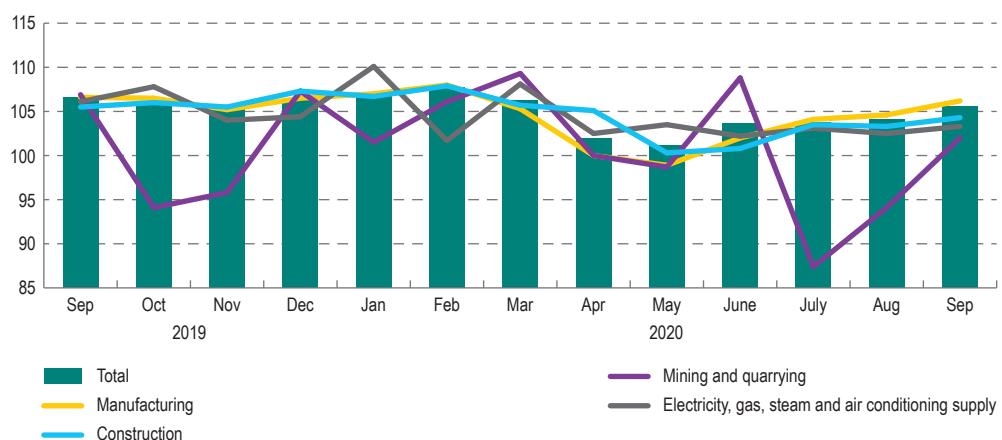

Chart 1.7. Average monthly wages and salaries in enterprise sector (corresponding period of the previous year = 100)

In non-industrial sections decrease in employment was reported in administration and support section* (5.3% y/y), accommodation and catering* (3.7% y/y), trade and repair of motor vehicles (1.4% y/y) and construction (0.1% y/y). Increase in employment was reported for information and communication (2.8% y/y) as well as transportation and storage (1.6% y/y).

The number of registered unemployed amounted to 1 023.7 thousand, up by 172.5 thousand (20.3%) when compared with a year ago. The unemployment rate amounted to 6.1% versus 5.1% in the corresponding period of 2019.

Average monthly gross wages and salaries in the enterprise sector stood at PLN 5 372 and were 5.6% higher when compared to a year ago. Increase in wages and salaries was reported for manufacturing (up by 6.2% y/y) and electricity, gas and hot water supply (3.3% y/y) and in mining (2.0% y/y).

In manufacturing, an increase in average wages and salaries was reported for furniture (9.2% y/y), rubber and plastics (7.0% y/y), food products (6.4% y/y), other non-metallic mineral

products (5.6% y/y), motor vehicles, trailers and semi-trailers (2.9% y/y) as well as machinery and equipment (2.6% y/y).

In non-industrial sections increase in wages and salaries was noted for administration and support section (9.4% y/y), information and communication (6.4% y/y), trade and repair of motor vehicles (5.9% y/y), construction (4.3% y/y), transportation and storage (2.9% y/y) as well as accommodation and catering section (1.1% y/y).

In January-September period the revenues of the national budget stood at the level of PLN 304.5 billion, whereas its expenditure amounted to PLN 318.3 billion. Revenues were higher when compared to the corresponding period of the previous year by 2.9% and expenditure was higher by 6.9% which accounted for 69.9% and 73.1% of budget assumptions for 2020, respectively.

Central budget deficit stood at PLN 13.8 billion.

Inflows from indirect taxes amounted to PLN 184.6 billion and decreased when compared with last year by 1.4%. Inflows from personal income tax decreased by PLN 45.0 billion, i.e. 5.6%. Inflows from corporate income tax remained at PLN 30.5 billion.

Chapter 2

Monetary developments

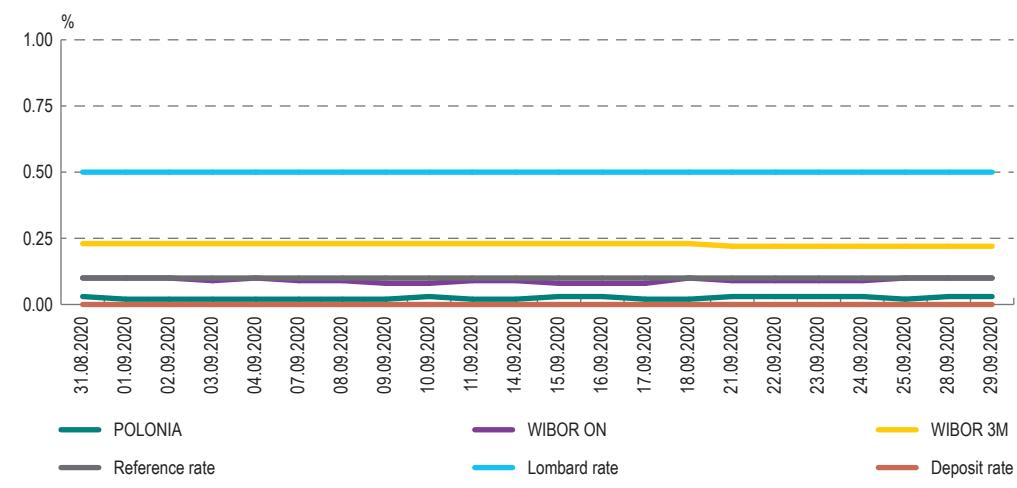

The Monetary Policy Council during its session on 15 September 2020 decided to leave the basic NBP interest rates on the following levels:

- reference rate – 0.10%;
- lombard rate – 0.50%;
- deposit rate – 0.00%;
- rediscount rate – 0.11%;
- discount rate – 0.12%.

During the September reserve maintenance period⁴ the POLONIA index deviation against the reference rate equaled to 8 basis points, same as in the previous month. Short-term liquidity of the banking sector measured as a total of the NBP main operations, fine-tuning operations and standing facilities stood at PLN 174.9 billion, up by PLN 2.7 billion when compared with the previous reserve maintenance period.

Average open market operations amounted to PLN 64.2 billion (versus PLN 63.0 billion in the previous month), of which basic operations stood at PLN 173.2 billion. Throughout the reserve maintenance period the average daily recourse to the deposit facility totaled PLN 1.6 billion versus PLN 2.0 billion in the previous period.

Chart 2.1. Interbank and NBP interest rates

⁴ Reserve maintenance period in question refers to the period from 31 August 2020 to 29 September 2020.

Chart 2.2. Average interest rates on deposits, new business, PLN denominated

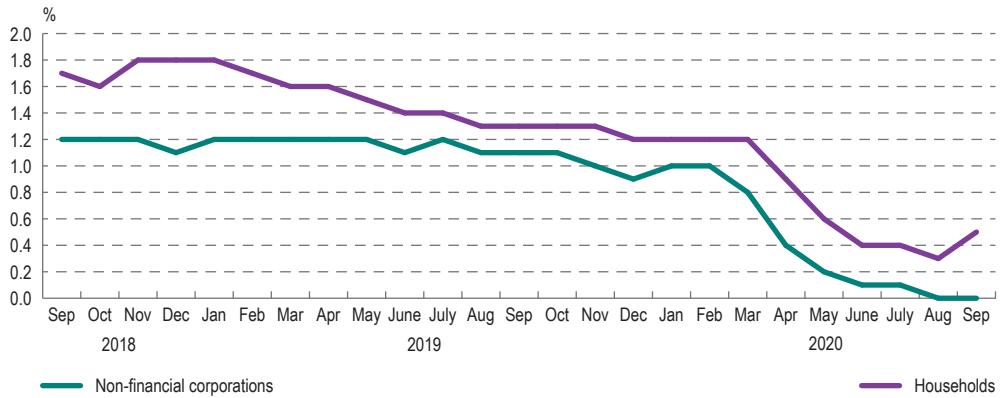

Chart 2.3. Average interest rates on loans, new business, PLN denominated

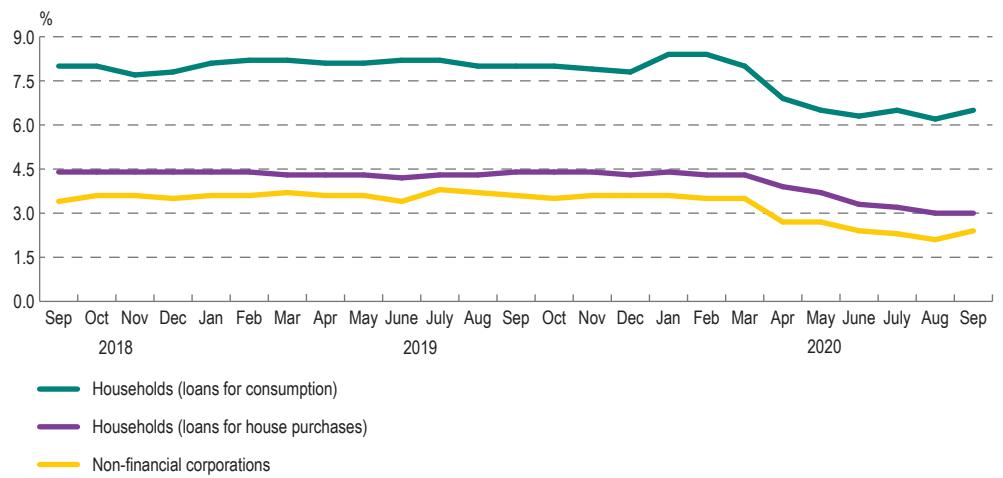

Chart 2.4. Share of currency in circulation and overnight deposits of domestic residents in M3, M1 and M3–M1 growth (corresponding period of the previous year = 100)

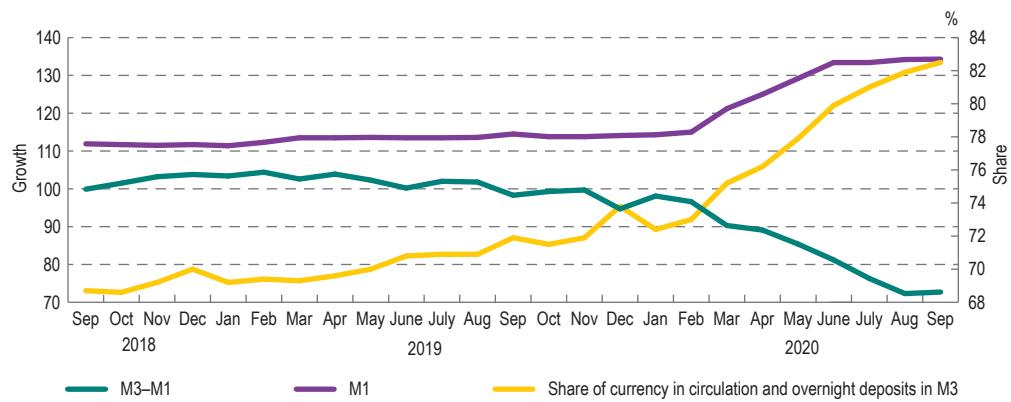

Chart 2.5. Share of currency in circulation in M1

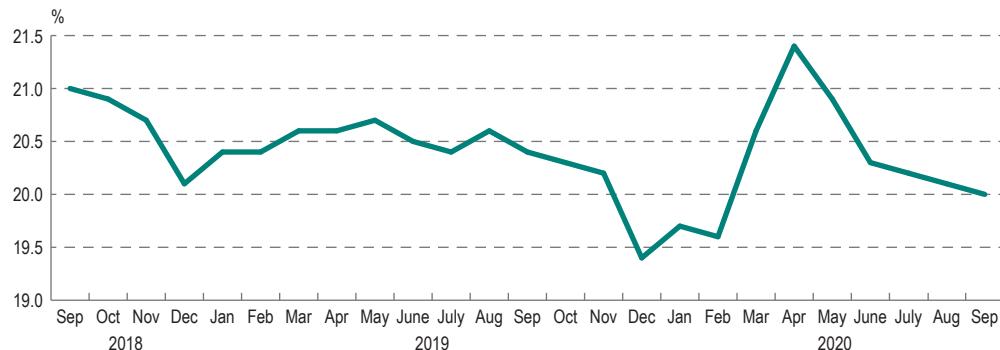

Chart 2.6. Deposits and other liabilities of MFIs to non-financial corporations and households included in M3 (corresponding period of the previous year = 100)

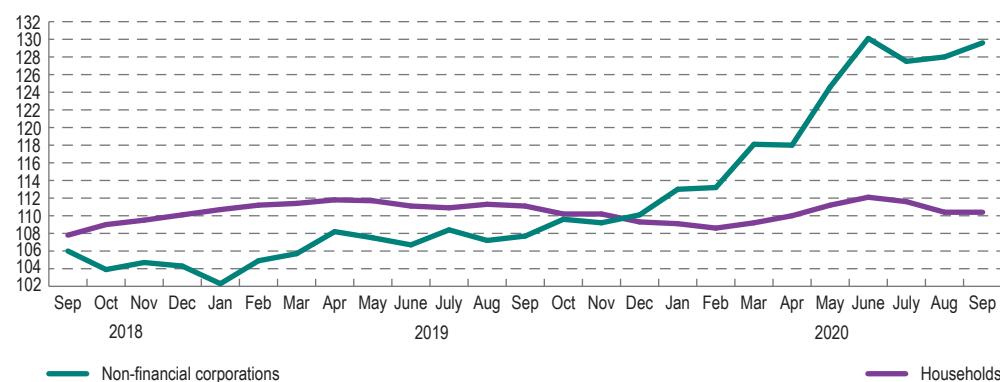

Chart 2.7. Loans and other claims of MFIs on non-financial corporations and households (corresponding period of the previous year = 100)

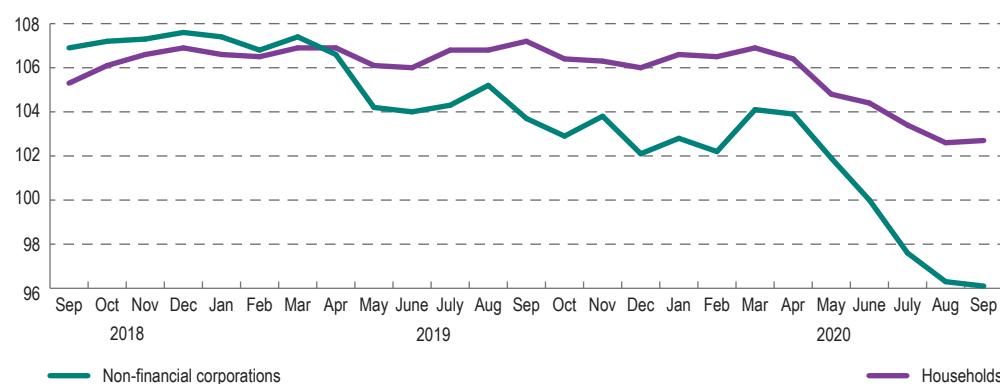

Chart 2.8. MFI loans and other claims to households
 (corresponding period of the previous year = 100)

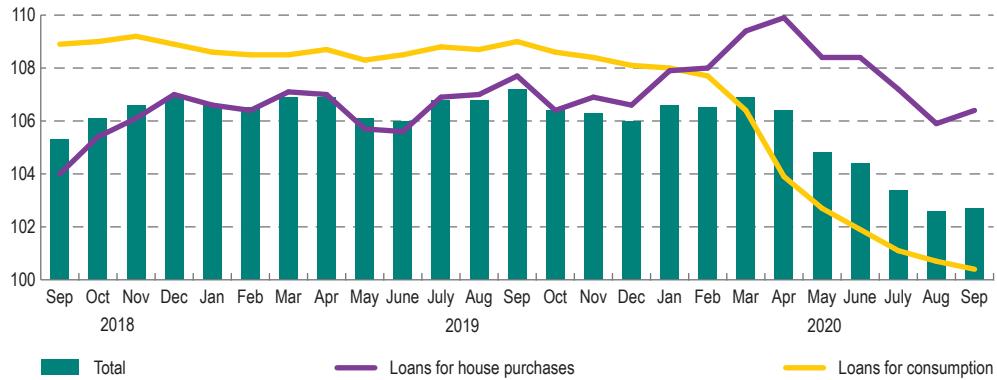

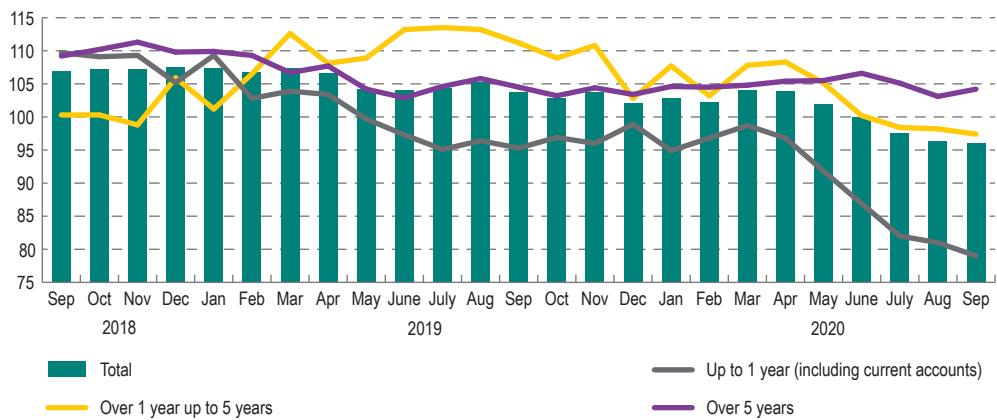

Chart 2.9. MFI loans and other claims to non-financial corporations
 (corresponding period of the previous year = 100)

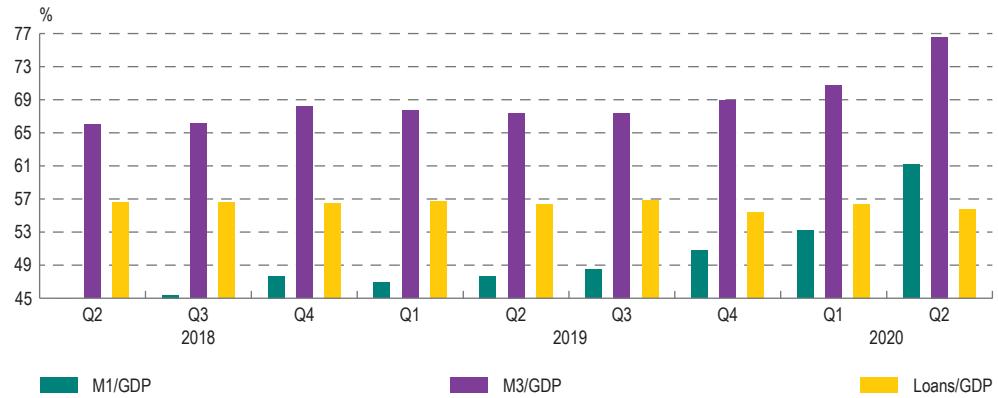

In September, average interest rates on zloty denominated loans to non-financial corporations⁵ increased from 2.1% to 2.4%. Interest rates on loans to sole proprietorships went up from 4.3% to 4.7%.

As regards zloty denominated loans to households interest rates for loans for house purchases remained at 3.0% and interest rates for loans for consumption went up from 6.2% to 6.5%.

When compared with the previous period deposits of non-financial corporations remained at 0.1% while interest on deposits of households increased from 0.3% to 0.5%.

⁵ Interest rates on loans and deposits refer to new business. For further information regarding the calculation of average interest rates on loans and deposits refer to the NBP website at https://www.nbp.pl/en/statystyka/oproc/mir_new/manual_mir.pdf. Starting from data for January 2018 the MIR reporting population comprises 24 banks.

Chart 2.10. Share of monetary aggregates and loans and other claims on other domestic residents in GDP

In September 2020, the value of M3 increased by PLN 18.1 billion (1.0%) and stood at PLN 1 762.2 billion. Its annual growth rate went down by 0.8 percentage points and stood at 17.0% y/y. The value of monthly transactions increased the value of M3 by PLN 12.5 billion.⁶

High liquidity components of the M1 aggregate went up by 0.1 percentage points and stood at 34.3% y/y. Other components of broad money went down by 0.4 percentage points and amounted to minus 27.3% y/y.

In September 2020, the value of currency in circulation increased by PLN 3.3 billion (1.2%) and stood at PLN 290.8 billion. Annual growth decreased by 0.5 percentage points and amounted to 31.7%.

M3 liquidity measured as the share of currency in circulation and overnight deposits in M3 increased by 0.6 percentage points and stood at 82.5%.

M1 liquidity measured as the share of currency in circulation in M1 decreased by 0.1 percentage points and stood at 20.0%.

Deposits and other liabilities included in M3 increased by PLN 15.1 billion (1.0%) and stood at PLN 1 464.1 billion. Monthly transactions increased by 0.7 percentage points and stood at 14.8% y/y. Increase was reported in deposits of non-financial corporations (PLN 6.8 billion, 1.9%), local government (PLN 4.1 billion, 8.6%) households (PLN 3.4 billion, 0.4%) other financial institutions (PLN 0.8 billion, 1.6%) as well as non-profit institutions serving households (PLN 0.1 billion, 0.4%). Decrease was reported in deposits of social security funds (PLN 0.3 billion, 3.2%).

⁶ Monthly transactions are calculated as the difference in outstanding amounts between two subsequent reporting months adjusted for changes arising from non-transactions, i.e. exchange rate changes, revaluations, reclassifications and other adjustments such as errors in data reported by banks. The methodology for the compilation of transactions is described in http://www.nbp.pl/en/statystyka/m3/Statystyka-transakcji-metodyka_EN.pdf.

Among counterparts to M3, increase in external assets net (PLN 18.8 billion, i.e. 4.7%), credit to the central government net (PLN 8.9 billion, 2.5%) as well as MFI credit to domestic sectors⁷ (PLN 4.1 billion, i.e. 0.3%) and the balance on other positions net (up by PLN 1.9 billion, i.e. 6.9%) contributed to an increase in money supply. Increase in and increase in long term loans⁸ (PLN 15.8 billion, 3.2%) had a negative impact on money supply.

MFI⁹ credit to non-financial corporations decreased by PLN 1.6 billion (0.5%) and reached PLN 355.7 billion. The annual growth rate in credit to non-financial corporations went down by 0.2 percentage points and stood at minus 3.9%. Loans with maturity up to one year (including overdrafts) decreased by 21.0% y/y and loans with maturity from 1 up to 5 years went down by 2.6%. Loans with maturity over 5 years went up by 4.2%.

MFI credit to households increased in September 2020 by PLN 5.7 billion, i.e. 0.7% and stood at PLN 786.3 billion. Monthly transactions amounted to PLN 2.6 billion. Annual growth of credit to households increased by 0.2 percentage points and stood at 2.7%. Growth of housing loans went up by 6.4% y/y. The growth in consumer loans stood at 0.4% y/y.

According to data for Q2 2020 the M1 to GDP ratio increased by 8.0 percentage points and stood at 61.2% and the M3 to GDP went up by 5.9 percentage points and stood at 76.6%. Credit to domestic sectors to GDP ratio decreased by 0.6 percentage points and stood at 55.5%.

In September, the nominal exchange rate of the zloty¹⁰ depreciated by 3.0% against EUR, 4.7% against USD and 2.4% against CHF and 0.8% against GBP.

⁷ The category “credit” comprises loans, holdings of debt and equity securities, and other receivables, e.g. debt purchased, guarantees and warrants. Domestic sectors include non-monetary financial institutions, non-financial corporations, non-profit institutions serving households, local government and social security funds.

⁸ Long term loans comprise deposits and other liabilities with maturity over 2 years MFI securities issued with maturity over 2 years as well as capital and reserves.

⁹ Except credit against securities issued.

¹⁰ Exchange rate changes between end-August and end-September 2020 are calculated as the difference between end-month average exchange rates quoted by NBP.

Chapter 3

Balance of payments in Poland in September 2020

Components of monthly bop are estimated based on monthly and quarterly information reported by residents involved in transactions with non-residents, public statistics surveys as well as administrative data sources.

This version of bop is preliminary and may be subject to further revisions, especially taking into account the restrictions on the availability of certain information related to the COVID-19 pandemic.

3.1. The current and capital account

The current account in September 2020 was positive and amounted to PLN 4.8 billion. This value was caused by the positive balance on trade in goods (PLN 5.5 billion), services (PLN 7.8 billion) as well as negative balance on primary income (PLN 8.1 billion) and secondary income (PLN 0.4 billion). In the corresponding period of 2019 the current account balance was also positive and stood at PLN 3.1 billion. The total balance on the current and capital account was positive and stood at PLN 5.8 billion.

Exports of goods were estimated at PLN 94.4 billion, up by PLN 6.5 billion, i.e. 7.4% when compared with the corresponding period of 2019. The highest increase in exports was noted in car batteries and engines, clothing and phones, furniture and home appliances. The value of imports when compared with September 2019 increased by PLN 3.7 billion, i.e. 4.3% and stood at PLN 88.9 billion. The increase in the value of imports compared to the previous year was still affected by the purchase of clothing, parts of TV sets, diagnostic agents, phones and TV sets. Trade in goods surplus amounted to PLN 5.5 billion.

Exports of services amounted to PLN 21.8 billion, down by PLN 2.4 billion, i.e. 9.9% when compared with the corresponding period of 2019. Imports stood at PLN 14.0 billion and compared with September 2019 it decreased by PLN 1.0 billion, i.e. 16.6%. When compared with the corresponding period of the previous year decrease was reported in travel (down by 44.0%) and other services (down by 4.5%) whereas transportation increased by 4.9%. On the debit side travel went down by 13.3%, other services increased by 7.0% and transportation went up by 2.7%.

The primary income balance was negative and amounted to PLN 8.1 billion. Foreign direct investors' income on their capital involvement in Polish companies amounted to PLN 6.5 billion. This item was influenced by dividends on the 2019 profit (PLN 3.6 billion), positive reinvested earnings¹¹ (PLN 2.0 billion) and interest on debt instruments

¹¹ Narodowy Bank Polski calculated the reinvested earnings on primary income and reinvestment of earnings on non-resident direct investment on the basis of fragmentary data.

(PLN 0.9 billion). The negative balance on investment income was also influenced by negative balance of portfolio investment income (PLN 0.7 billion).

In September 2020, credits against secondary income amounted to PLN 1.9 billion, similar to corresponding period of the previous year. Debits stood at PLN 2.3 billion, down by PLN 0.4 billion when compared with September 2019. The negative balance on secondary income (PLN 0.4 billion) resulted from the negative balance on general government (PLN 1.1 billion) and the positive balance on other sectors (PLN 0.7 billion). Credits against secondary income of other sectors stood at PLN 1.6 billion and debits amounted to PLN 0.9 billion.

The inflow of EU funds stood at PLN 1.0 billion most of which contributed to the European Regional Development Fund registered on the capital account. The membership premium paid in September 2020 stood at PLN 1.6 billion. The balance on transfers with the EU was negative and stood at PLN 0.6 billion.

3.2. Financial account

3.2.1. Non-resident investment in Poland (liabilities)

In September 2020 non-residents' investment in Poland increased by PLN 16.2 billion. The value of this item was affected mainly by the positive balance other investment and direct investment.

Non-residents' direct investment increased by PLN 4.8 billion mostly due to liabilities against debt instruments which increased by PLN 2.0 billion, reinvestment of earnings, which stood at PLN 2.0 billion, as well as shares and equity standing at PLN 0.8 billion.

The balance on foreign portfolio investment was balanced mostly due to increase in value debt securities (up by PLN 0.6 billion) and withdrawal by non-residents form investment in debt securities (down by PLN 0.6 billion).

Other investment on the liabilities side went up by PLN 11.4 billion. NBP increased its external liabilities by PLN 12.1 billion, mainly due to repo transactions. Other sectors (enterprises) also increased their liabilities by PLN 4.7 billion mainly due to trade credits. The banking sector decreased its liabilities by PLN 5.5 billion (mainly due to non-resident deposits).

3.2.2. Polish investment abroad (assets)

The balance on Polish investment abroad was positive (increase in assets) and stood at PLN 21.8 billion. The value of this balance was mainly affected by positive balance on official reserve assets, other investment direct investment and portfolio investment as well as negative balance on financial derivatives.

As a result of transactions carried out by the NBP, the official reserve assets increased by PLN 10.9 billion, mainly due to the inflow of funds from the European Commission.

¹ Cumulated data presented as 12-month moving data.

² Preliminary data.

Balance on direct investment was positive and amounted to PLN 5.9 billion. This balance was largely influenced by increase in receivables due to debt instruments (up by PLN 5.7 billion).

Assets included in other investments increased by PLN 5.4 billion. This balance was significantly influenced by transactions of the banking sector and other sectors. Both sectors decreased their external assets by PLN 3.0 billion and PLN 2.2 billion respectively.

Foreign portfolio investment assets went up by PLN 0.1 billion. Residents increased their assets mainly in the form of equity securities.

Balance on derivative financial instruments was negative and amounted to PLN 0.5 billion. Negative balance translates into inflow of funds resulting mainly from realisation of profits of the banking sector (PLN 0.9 billion). The enterprise sector recorded a loss against derivative financial instruments in the amount of PLN 0.6 billion.

Chapter 4

Key decisions of the Monetary Policy Council

1. Resolution No. 7/2020 of the Monetary Policy Council, dated 28 May 2020, on reference rate, refinancing credit rate, deposit rate as well as the rediscount and discount rates at Narodowy Bank Polski.
2. Resolution No. 10/2020 of the Monetary Policy Council, dated 28 May 2020, on approving the Activity Report of Narodowy Bank Polski in 2019.
3. Resolution No. 11/2020 of the Monetary Policy Council, dated 28 May 2020, amending the Resolution on accounting principles, format of the balance sheet and the profit and loss account at Narodowy Bank Polski.

5.4. Methodological notes

Table 5.1.1. Basic statistical data

Information contained in Table 5.1.1 is derived from the “Statistical Bulletin” of the Statistics Poland [GUS]. Definitions of the categories presented in the Table can be found in the GUS publications.

1. Data presented in pts. 1, 2, 6, 7, 10 and 12 comprise national economy entities regardless of their ownership type, i.e. public sector entities (state-owned entities, units of local government and mixed ownership, where public sector entities prevail) and private sector entities. The private sector includes units of private domestic ownership (among others: companies, cooperatives, natural persons conducting economic activities, social organizations, associations, foundations), private foreign ownership (among others: foreign enterprises branches, foreign representatives, partnerships with exclusive foreign capital share) and “mixed” ownership with a private sector unit capital majority or lack of sectors majority in unit capital.
2. The corporate sector comprises entities, which conduct their economic activities in the fields of: forestry, including the provision of services; marine fishing; mining and quarrying, manufacturing; electricity, water, gas and conditioned air production and supply; sanitation management and other sanitation services; construction; repair of motor vehicles, motorcycles; transport, storage and communication; wholesale and retail trade; hotels and restaurants; information and communication; real estate market services; legal services; accounting and tax services for head offices, management solutions; architecture and engineering services; technological research and analysis; advertising; market and public opinion polls; other professions, technical or academic activity; administration and support; recreational, cultural, sporting and other services computer repair and maintenance for individual clients; other business activities.
3. According to the Polish Statistical Classification of Economic Activities [PKD 2007], the notion of “industry” applies to the following sections: “mining and quarrying”, “manufacturing” and “electricity, gas and water production and supply” as well as water supply sanitation management and other sanitation services.
4. Data on the sold production of industry (pt. 1), and the construction and assembly production (pt. 2) refer to economic entities with of more than 9 employees.
5. Data on the value of the sold production of industry (pt. 1) and the construction and assembly production (pt. 2) are disclosed net without the due value added tax (VAT) and the excise tax, while they include subsidies for specific purposes to products and services in the so-called base prices.
6. Construction and assembly production data (pt. 2) refer to works performed in Poland on commission (i.e. for third-party) and directly (i.e. without subcontractors) by the business entities of the construction sector, i.e. classified under “construction” according to the PKD 2007.
7. Information on the sold production of industry (pt. 1) and the construction assembly production (pt. 2) are disclosed without seasonal adjustments.
8. Data on employed persons include persons employed on a full and part-time basis in the main place of work. Employed persons include: persons employed on the basis of a labour contract; owners and co-owners of units engaged in economic activities including contributing family members; outworkers; agents and persons employed

by agents; members of agricultural production co-operatives. Data presented in the Bulletin do not include private farmers or employees of budget entities conducting activity within the scope of national defence and public safety.

9. Unemployment rate (pt. 9) is calculated as a percentage share of the unemployed in the total of employed and unemployed persons over 15 years of age.
10. Revenues from privatisation do not constitute the current revenues of the state budget; instead they finance the budget deficit (pt. 11).

Data on financial results of enterprises (pt. 12) pertain to business units that keep accounting books (except for the following units, classified according to PKD 2007 under “agriculture, forestry hunting and fishing” and “financial and insurance services”) with more than 49 employees.

Table 5.1.2. Financial market – basic information

Information comprised in Table 5.1.2 has been derived from Narodowy Bank Polski (save for the data in pt. 6, supplied by the Warsaw Stock Exchange).

1. Interest rates in Table 2 are presented on an annual basis at the level which was binding on the last day of a given month. The average monthly interest rate has been given only for the weighted average yield on purchased T-bills or the NBP money-market bills.
2. As from 1 January 2011 the NBP no longer sets the central bank discount rate.
3. Total reserve requirements (pt. 2, col. 12) pertain to the volumes declared by banks and binding on the last day of the month. Since 28 February 2002, the total reserve requirements are held exclusively on the NBP accounts.
4. Information on Treasury bill tenders (pt. 3, except for the stocks of bills in circulation at the end of the month – col. 18) comprises data from tenders conducted within one month. The average yield on bills purchased is weighted by the share of the sales of bills with different maturities in the total value of bills purchased. The stock of bills in circulation at month end has been determined on the basis of the agreed maturity, calculated from the day after the tender which resulted in the sale of the bill. The above stock does not include bills in circulation which do not stem from tenders.
5. Information on tenders for the NBP money-market bills (pt. 4, except for the stock of bills in circulation at month end – col. 24) comprises data from tenders conducted within one month. The average yield on bills purchased is weighted by the share of the sales of bills with different maturities in the total value of bills purchased.
6. The below presentation of indices comprises precise data involving the situation of the largest (WIG 20), medium (mWIG40) and small stock companies (sWIG80):
 - WIG20 index has been calculated since 16 April 1994 based on the value of portfolio with shares in 20 major and most liquid companies in the main stock market. The initial value of WIG20 index was 1000 points. It is a price index and thus when it is calculated it accounts only for prices of underlying shares whereas dividend income is excluded. The WIG20 index may not include more than 5 companies from a single exchange sector.
 - mWIG40 index is successor of MIDWIG index and has been calculated since 31 December 1997 and comprises 40 medium size companies listed at WSE. The initial value of index was 1000 points. mWIG40 is an price index and thus

when it is calculated it accounts only for prices of underlying shares whereas dividend income is excluded. The mWIG40 index excludes WIG20 and sWIG80 index participants and foreign companies listed at WSE and other markets with the market capitalization at the ranking date above EUR 1 billion.

- sWIG80 index is successor of WIRR index that has been calculated since 31 December 1994 and comprised 1% of smaller companies listed at WSE. The initial value of index was 1000 points. sWIG80 is a price index and thus when it is calculated it accounts only for prices of underlying shares whereas dividend income is excluded. The sWIG80 index excludes WIG20 and mWIG40 index participants and foreign companies listed at WSE and other markets with the market capitalization at the ranking date above EUR 100 million.
- 7. The indices comprise companies from all the quotation markets.
- 8. Capitalization refers only to domestic companies.
- 9. The P/E ratio shows the relation of the market price to net earnings and is calculated as a quotient of the total market value of companies at month end to their aggregated profits and losses generated within the last 4 quarters, for which financial data are available.
- 10. The turnover ratio shows the relation between the value of sold shares to the average value of shares quoted in a given month.
- 11. The monthly turnover value and the turnover ratio comprise the continuous quotation and fixing.

Table 5.1.3. PLN/USD and PLN/EUR daily exchange rates

The information has been based on the data of Narodowy Bank Polski.

1. NBP average exchange rate is the official exchange rate used for statistical and accounting purposes.
2. The average PLN/USD and PLN/EUR exchange rates and the USD/EUR ratio were calculated as the arithmetic average of NBP average exchange rates for a month (based on daily exchange rates).

5.4.1. Monetary statistics

Narodowy Bank Polski releases monetary statistics based on data received from monetary financial institutions (MFI).

Sectoral classification

The below sectoral classification of institutional units of the economy is compliant with the rules set forth in the regulation (EU) No 549/2013 of the European Parliament and of the Council of 21 May 2013 on the European system of national and regional accounts in the European Union (hereinafter referred to as 'ESA 2010'). The details in NBP website <https://www.nbp.pl/en/statystyka/m3/Sectoral-classification-of-the-economy-in-monetary-statistics.pdf>.

Financial sector comprises the following sub-sectors:

- monetary financial institutions (MFIs) – include banks, credit unions and money market funds (MMFs);
- non-MMF investment funds;
- insurance corporations;
- pension funds;
- other financial intermediaries – include financial leasing companies, factoring companies, brokerage offices, and financial companies created for securitization of assets;
- financial auxiliaries and captive financial institutions and money lenders – include bureaus de change, bourses, hire purchase institutions.

Non-financial sector comprises the following sub-sectors:

- non-financial corporations – include state-owned corporations, private corporations, co-operatives and individual entrepreneurs employing more than 9 persons;
- households comprising:
 - individuals;
 - farmers;
 - individual entrepreneurs employing up to 9 persons;
- non-profit institutions serving households.

General government sector comprises the following sub-sectors:

- central government – includes among others public authorities, government administration, state control and law enforcement institutions, courts and tribunals, state colleges and universities, state cultural institutions, etc.;
- local government – includes, among others, self-government bodies, public schools run by local government units, local state cultural institutions, institutions of social assistance;
- social security funds – comprises Zakład Ubezpieczeń Społecznych (ZUS – Social Insurance Institution) and Kasa Rolniczego Ubezpieczenia Społecznego (KRUS – Agricultural Social Insurance Fund), and funds managed by them, Narodowy Fundusz Zdrowia (NFZ – National Healthcare Fund) and its regional branches.

Table 5.1.4. Average MFI interest rates on outstanding amounts, PLN denominated

Data on zloty denominated businesses refer to all businesses at the end of the reporting month, these concluded prior to the reporting month and still binding as well as new businesses. This interest rate is a quotient of interest on average zloty denominated business by average volume of businesses per reporting month, commissions and other charges excluded.

The interest rate is calculated based on data received from the following banks (21):

1. Powszechna Kasa Oszczędności Bank Polski SA;
2. Bank Handlowy w Warszawie SA;
3. ING Bank Śląski SA;
4. Santander Bank Polska SA;
5. mBank SA;

6. Bank Millennium SA;
7. Bank Polska Kasa Opieki SA;
8. Bank Ochrony Środowiska SA;
9. Bank Polskiej Spółdzielczości SA;
10. Crédit Agricole Bank Polska SA;
11. Idea Bank SA;
12. BNP Paribas Bank Polska SA;
13. Santander Consumer Bank SA;
14. mBank Hipoteczny SA;
15. Getin Noble Bank SA;
16. Alior Bank SA;
17. Polski Bank Spółdzielczy w Ciechanowie;
18. Krakowski Bank Spółdzielczy;
19. Podkarpacki Bank Spółdzielczy;
20. Wielkopolski Bank Spółdzielczy;
21. Bank Spółdzielczy w Brodnicy.

At the end-December 2019, the above banks held 85% of deposits of residents and 83% of credit to households and non-financial corporations. From December 2014 onwards, new methodology for calculating average weighted interest has been applied. New method involves using data on reporting agent's homogenous groups (layers). For more information please refer to http://www.nbp.pl/en/statystyka/oproc/mir_new/manual_mir.pdf.

Table 5.1.5. Average MFI interest rates on new and renegotiated business, PLN denominated

Information refers to agreements carried out in a given reporting month. Renegotiated existing agreements shall be deemed new businesses.

Interest rates in the statistics on new businesses differ from those in Table 5.1.4. The formula is applied to statistical information on new businesses, also known as Narrowly Defined Effective Rate (NDER). The concept of Narrowly Defined Effective Rate was coined as an opposite to widely understood effective interest rate or Real Interest Rate (RIR). The NDER included, the new business statistics provides RIR for the second category of consumer and house purchase loans. As opposed to the NDER, which covers for interest costs of capital the real interest rate incorporates all charges paid by the borrower. These charges are most of all commissions (brokers included) but also compulsory loan insurance premiums against death or unemployment of the borrower.

For the Table 5.1.5 data are collected from the same sample of banks as in case of Table 5.1.4. Weighted average is calculated with the use of the same method.

Table 5.1.6. Average MFI interest rates on new and renegotiated business, EUR denominated

General rule of calculating interest rate are the same as for Table 5.1.4 (see footnote-marked lines) and Table 5.1.5. The Table 5.1.4 and 5.1.5 sample of banks applies as well.

General comments on Tables 5.1.8–5.1.11

1. The figures refer to the end of each reporting month and have been derived from balance sheets received from the banks and from the balance sheet of Narodowy Bank Polski and credit unions and money market funds.¹
2. The presentation is structured in accordance with the ECB standards.
3. Assets in Tables 5.1.8, 5.1.9, 5.1.10 and 5.1.11 are shown gross of provisions, accumulated depreciation (except for debt securities presented at the carrying amount).

Table 5.1.8. Balance sheet of Narodowy Bank Polski

Domestic assets – column 1 – (zloty and foreign currency) loans and other receivables from resident sectors, debt securities issued by resident sectors, equity and non-MMF investment shares/units, fixed assets and remaining assets.

External assets – column 2 – NBP receivables from nonresidents denominated in zloty and foreign currencies.

Currency in circulation (including MFIs' vault cash) – column 1 – banknotes and coins (excluding commemorative banknotes and coins) issued by NBP.

Deposits and other liabilities to domestic residents – column 2 – (zloty and foreign currency) funds of resident sectors placed with NBP on overnight deposits, deposits with agreed maturity, required reserve deposits, repos and other liabilities.

Debt securities issued – column 6 – debt securities issued by NBP.

Capital and reserves – column 7 – statutory fund, reserve fund, profit/loss of the current year and reserves.

External liabilities – column 8 – NBP liabilities to nonresidents denominated in zloty and foreign currencies.

Remaining liabilities – column 9 – liabilities not included elsewhere (which may include accrued interest on deposits, financial derivative positions, suspense items, transit items).

Table 5.1.9. Aggregated balance sheet of other monetary financial institutions

Cash in other MFIs' vaults – column 1 – banknotes and coins (excluding commemorative banknotes and coins) issued by NBP held in other MFIs' vaults.

Loans and other claims on domestic residents – column 2 – receivables of resident other MFIs from resident sectors due to: loans and advances, debt purchased, guarantees called, deposits placed, financial leases, repos and other operations.

¹ See footnote 1.

Debt securities – column 6 – debt securities held by resident other MFIs issued by resident sectors, serving as evidence of debt of the issuer towards the holder and a promise on the part of the issuer to pay back to the holder the amount borrowed plus agreed interest in a specified manner and on a specified future date or dates.

Money market fund shares – column 10 – shares/units issued by resident MMFs held by resident other MFIs.

Equity and non-MMF investment fund shares or units – column 11 – shares and other equity (including securities classified to financial fixed assets) held by resident other MFIs issued by resident sectors, representing for the holder property rights in the issuing institution and generally an entitlement to a share in its profits and to a share in its own funds in the event of liquidation; and shares/units issued by resident non-MMF investment funds.

External assets – column 14 – receivables of resident other MFIs from nonresidents denominated in zloty and foreign currencies.

Fixed assets – column 15 – nonfinancial fixed assets (land, buildings and other fixed assets), tangible and intangible assets and assets held for sale.

Remaining assets – column 16 – assets not included elsewhere (include, among others, accrued interest on loans, financial derivative positions, suspense items, transit items).

Deposits and other liabilities to domestic residents – column 1 – (zloty and foreign currency) funds of resident sectors placed with resident other MFIs on overnight deposits and deposits with agreed maturity, repos and other liabilities.

- **Overnight deposits – column 5 – (zloty and foreign currency) funds of resident sectors held with resident other MFIs on current accounts, savings accounts without any agreed maturity and/or similar forms of deposits, which are convertible into currency and/or which are transferable on demand by cheque, banker's order, debit entry or similar means, without significant delay, restriction or penalty; and other liabilities without a fixed maturity.**
- **Deposits with agreed maturity – column 6 – (zloty and foreign currency) funds of resident sectors placed with resident other MFIs with an agreed maturity, which cannot be converted into currency before an agreed fixed term or that can only be converted into currency before that agreed term provided that the holder is charged some kind of penalty, e.g. reduction of interest due. This item includes, for example, blocked deposits, savings accounts, structured deposits and other liabilities with a fixed maturity up to 2 years.**
- **Repos – column 7 – amounts owed by resident other MFIs to resident sectors on repo-type operations, i.e. repurchase agreements, sell-buy-back agreements and/or securities lending against cash collateral.**

Money market fund shares – column 8 – shares/units issued by resident MMFs.

Debt securities – column 9 – debt securities issued by resident other MFIs, i.e. bonds, bank securities, e.g. certificates of deposits, mortgage bonds.

Capital and reserves – column 10 – equity capital raised, reserve fund, profit/loss of the current year, specific and general provisions against loans, securities and other types of assets, and other reserves.

External liabilities – column 11 – liabilities of resident other MFIs to nonresidents denominated in zloty and foreign currencies.

Remaining liabilities – column 12 – liabilities not included elsewhere (which may include accrued interest on deposits, financial derivative positions, suspense items, transit items).

Table 5.1.9.1. Loans and other claims on domestic residents – households and non-financial corporations

Table 5.1.9.1 includes breakdown into two key sub-sectors (households – of which individuals – and non-financial corporations) grouped under “Other domestic residents” presented in column 5 of Table 5.1.9 “Aggregated balance sheet of other monetary financial institutions”.

As at the end of December 2019, households and non-financial corporations amounted to 92.5% of the assets disclosed in column 5 of Table 5.1.9.

Table 5.1.9.2. Deposits and other liabilities to domestic residents – households and non-financial corporations

Table 5.1.9.2 includes breakdown into two key sub-sectors (households – of which individuals – and non-financial corporations) grouped under “Other domestic residents” presented in column 4 of Table 5.1.9 “Aggregated balance sheet of other monetary financial institutions”.

As at the end of December 2019, households and non-financial corporations amounted to 90.0% of the liabilities disclosed in column 4 of Table 5.1.9.

Table 5.1.10. Consolidated balance sheet of monetary financial institutions

Loans and other claims on domestic residents – column 1 – receivables of resident MFIs from resident sectors due to: loans and advances, debt purchased, guarantees called, deposits placed, financial leases, repos and other operations.

Debt securities – column 4 – debt securities held by resident MFIs issued by resident sectors other than MFIs, serving as evidence of debt of the issuer towards the holder and a promise on the part of the issuer to pay back to the holder the amount borrowed plus agreed interest in a specified manner and on a specified future date or dates.

Equity and non-MMF investment fund shares or units – column 7 – shares and other equity (including securities classified to financial fixed assets) held by resident MFIs issued by resident sectors other than MFIs, representing for the holder property rights in the issuing institution and generally an entitlement to a share in its profits and to a share in its own funds in the event of liquidation; and shares/units issued by resident non-MMF investment funds.

External assets – column 8 – receivables of resident MFIs from nonresidents denominated in zloty and foreign currencies.

Fixed assets – column 9 – nonfinancial fixed assets (land, buildings and other fixed assets), tangible and intangible assets and assets held for sale.

Remaining assets – column 10 – assets not included elsewhere (include, among others, accrued interest on loans, financial derivative positions, suspense items, transit items).

Currency in circulation (excluding MFIs' vault cash) – column 1 – currency in circulation (including MFIs' vault cash and excluding commemorative banknotes and coins) issued by NBP minus cash in MFIs' vaults.

Deposits and other liabilities to central government – column 2 – (zloty and foreign currency) deposits placed by central government with resident MFIs, loans and advances received, margin deposits, liabilities on repo transactions and other liabilities.

Deposits and other liabilities to other domestic residents – column 3 – (zloty and foreign currency) funds of resident sectors other than MFIs and central government placed with resident MFIs on overnight deposits and deposits with agreed maturity, and repos.

- **Overnight deposits** – column 4 – (zloty and foreign currency) funds of resident sectors other than MFIs and central government held with resident MFIs on current accounts, savings accounts without any agreed maturity and/or similar forms of deposits, which are convertible into currency and/or which are transferable on demand by cheque, banker's order, debit entry or similar means, without significant delay, restriction or penalty; and other liabilities without a fixed maturity.
- **Deposits with agreed maturity** – column 5 – (zloty and foreign currency) funds of resident sectors other than MFIs and central government placed with resident MFIs with an agreed maturity, which cannot be converted into currency before an agreed fixed term or that can only be converted into currency before that agreed term provided that the holder is charged some kind of penalty, e.g. reduction of interest due. This item includes, for example, blocked deposits, savings accounts, structured deposits, individual retirement accounts (IKE), individual retirement security accounts (IKZE), and other liabilities with and a fixed maturity.
- **Repos** – column 6 – amounts owed by resident MFIs to resident sectors other than MFIs and central government on repo-type operations, i.e. repurchase agreements, sell-buy-back agreements and/or securities lending against cash collateral.

Money market fund shares – column 7 – shares/units issued by resident MMFs.

Debt securities – column 8 – debt securities issued by resident MFIs, i.e. bonds, bank securities, e.g. certificates of deposits, mortgage bonds, held by resident sectors other than MFIs.

Capital and reserves – column 9 – equity capital raised, reserve fund, profit/loss of the current year, specific and general provisions against loans, securities and other types of assets, and other reserves less equity issued by resident other MFIs and held by MFIs.

External liabilities – column 10 – liabilities of resident MFIs to nonresidents denominated in zloty and foreign currencies.

Remaining liabilities – column 11 – liabilities not included elsewhere (which may include accrued interest on deposits, financial derivative positions, suspense items, transit items).

Excess of inter-monetary financial institution liabilities – column 12 – liabilities of resident MFIs towards resident MFIs less receivables from resident MFIs.

Table 5.1.11. M3 and counterparts

M1 – column 11 – the sum of currency in circulation (excluding MFIs' vault cash) and (zloty and foreign currency) overnight deposits of resident sectors other than MFIs and central government.

- Currency in circulation (excluding cash in MFIs' vaults) – column 1 – currency in circulation (including MFIs' vault cash) minus cash in MFIs' vaults.
 - Currency in circulation (including MFIs' vault cash) – column 2 – banknotes and coins (excluding commemorative banknotes and coins) issued by NBP.
 - Cash in MFIs' vaults – column 3 – banknotes and coins (excluding commemorative banknotes and coins) issued by NBP held in other MFIs' vaults.

Overnight deposits and other liabilities – column 4 – (zloty and foreign currency) funds of resident sectors other than MFIs and central government held with resident MFIs on current accounts, savings accounts without any agreed maturity and/or similar forms of deposits, which are convertible into currency and/or which are transferable on demand by cheque, banker's order, debit entry or similar means, without significant delay, restriction or penalty; and other liabilities without a fixed maturity.

M2 – column 19 – the sum of M1 and (zloty and foreign currency) deposits with agreed maturity up to two years of resident sectors other than MFIs and central government.

- Deposits and other liabilities with agreed maturity up to 2 years – column 12 – (zloty and foreign currency) funds of resident sectors other than MFIs and central government placed with resident MFIs with an agreed maturity of up to two years, which cannot be converted into currency before an agreed fixed term or that can only be converted into currency before that agreed term provided that the holder is charged some kind of penalty, e.g. reduction of interest due. This item includes, for example, blocked deposits, savings accounts, structured deposits and other liabilities with a fixed maturity up to 2 years.

M3 – column 23 – the sum of M2, repurchase agreements, debt securities with a maturity of up to two years issued by resident MFIs and money market fund shares/units issued by resident MMFs purchased by resident sectors other than MFIs and central government.

- Repurchase agreements (repos) – column 20 – amounts owed by other MFIs to resident sectors other than MFIs and central government on repo-type operations, i.e. repurchase agreements, sell-buy-back agreements and/or securities lending against cash collateral.

- Debt securities issued with maturity up to 2 years – column 21 – debt securities issued by MFIs of original maturity up to two years held by resident sectors other than MFIs and central government.
- Money market fund shares – column 22 – shares/units issued by resident MMFs held by resident sectors other than MFIs and central government.

External assets, net – column 24 – receivables of resident MFIs less liabilities of resident MFIs from/to nonresidents denominated in zloty and foreign currencies.

External assets – column 25 – receivables of resident MFIs from nonresidents denominated in zloty and foreign currencies.

External liabilities – column 26 – liabilities of resident MFIs to nonresidents denominated in zloty and foreign currencies.

Credit to other residents – column 27 – all types of receivables of resident MFIs from resident sectors other than MFIs and central government: loans and other receivables, debt securities and equity issued by resident sectors other than MFIs and central government, non-MMF investment fund shares/units and other operations.

- **Loans and other claims** – column 28 – receivables from resident sectors other than MFIs and central government due to: loans and advances, debt purchased, guarantees called, deposits placed, financial leases, repos and other operations.
- **Debt securities** – column 35 – debt securities held by MFIs issued by resident sectors other than MFIs and central government, serving as evidence of debt of the issuer towards the holder and a promise on the part of the issuer to pay back to the holder the amount borrowed plus agreed interest in a specified manner and on a specified future date or dates.
- **Equity and non-MMF investment fund shares/units** – column 39 – shares and other equity (including securities classified to financial fixed assets) held by resident MFIs issued by resident sectors other than MFIs and central government, representing for the holder property rights in the MFI and generally an entitlement to a share in its profits and to a share in its own funds in the event of liquidation; and shares/units issued by resident non-MMF investment funds.

Credit to central government, net – column 42 – receivables of resident MFIs less liabilities of resident MFIs from/to central government.

- **Credit to central government** – column 43 – loans and other receivables (including repos) of resident MFIs from central government, shares, other equity and debt securities issued by central government and held by resident MFIs.
- **Deposits of central government** – column 46 – deposits placed by central government with resident MFIs and MFIs liabilities towards central government sector on repo transactions.

Longer-term financial liabilities – column 47 – liabilities of resident MFIs towards resident sectors other than MFIs and central government with agreed maturity over two years, and capital and reserves of resident MFIs.

- **Deposits and other liabilities with agreed maturity over 2 years** – column 48 – (zloty and foreign currency) funds of resident sectors other than MFIs and central government placed with resident MFIs with an agreed maturity over two years,

which cannot be converted into currency before an agreed fixed term or that can only be converted into currency before that agreed term provided that the holder is charged some kind of penalty, e.g. substantial reduction of interest due.

- **Debt securities issued with maturity over 2 years – column 55** – debt securities with maturity over two years issued by resident MFIs and held by sectors other than MFIs.
- **Capital and reserves – column 56** – equity capital raised, reserve fund, profit/loss of the current year, specific and general provisions against loans, securities and other types of assets, and other reserves, less equity issued by resident MFIs and held by resident MFIs.

Fixed assets (excluding fixed financial assets) – column 57 – nonfinancial fixed assets (land, buildings and other fixed assets), intangible assets and assets held for sale.

Other items, net – column 58 – assets not included elsewhere (include, among others, accrued interest on loans, financial derivative positions, suspense items, transit items) less liabilities not included elsewhere (which may include accrued interest on deposits, financial derivative positions, suspense items, transit items).

Table 5.1.12. Reserve money and counterparts

Reserve money – column 4 – currency in circulation (including MFIs' vault cash), banks' current accounts (including deposit facility) and reserve requirement accounts (of banks which do not hold current accounts with NBP) held by resident other MFIs with NBP.

- **Currency in circulation (including MFIs' vault cash) – column 1** – banknotes and coins (excluding commemorative banknotes and coins) issued by NBP.
- **Overnight deposits – column 2** – funds (including deposit facility) placed by resident other MFIs with NBP.
- **Required reserve accounts of banks which do not hold overnight deposits with NBP – column 3** – funds placed with NBP by resident banks which do not hold current accounts with NBP.

Net external assets – column 5 – NBP receivables less NBP liabilities from/to nonresidents denominated in zloty and foreign currencies.

Credit to central government, net – column 6 – NBP receivables less NBP liabilities from/to central government.

Other items, net – column 7 – assets not included elsewhere (include, among others, accrued interest on loans, financial derivative positions, suspense items, transit items) less liabilities not included elsewhere (which may include accrued interest on deposits, financial derivative positions, suspense items, transit items).

Transactions statistics

Starting from end-September 2012, information on transactions and growth rates in key monetary categories has been included in M3 and counterparts – balance sheet format

(including transaction data to be found at www.nbp.pl/Statistics/Monetary and Financial Statistics/M3 and Counterparts/).

Transactions complement data on outstanding amounts with information on developments arising from financial transactions between monetary financial institutions (MIF) and other sectors in the economy. The approach to calculate transactions adopted by the Narodowy Bank Polski (NBP) – consistent with the European Central Bank (ECB) methodology – allows for estimating the value of transactions when actual financial transactions are not reported directly by reporting institutions. The change in outstanding amounts between two subsequent reporting periods is affected by both financial transactions and developments arising from non-transactions. In order to present developments in a certain instrument that are the result of financial transactions only it is necessary – in line with the ECB methodology – to remove from the difference in two subsequent end-month outstanding amounts changes arising from non-transactions. Transaction data provide more accurate and analytically meaningful information on growth rates in monetary categories.

Calculation of monthly transactions and growth rate

The starting point for calculating monthly growth rate is the computation of monthly changes arising from transactions (F_t^M), calculated based on the difference in outstanding amounts between two subsequent reporting months ($L_t - L_{t-1}$) – where L_t stands for the reporting month t and L_{t-1} for the previous reporting month ($t-1$), adjusted for monthly changes in non-transactions (i.e. reclassifications [C_t^M], exchange rate changes [E_t^M] and revaluations [V_t^M])

$$F_t^M = (L_t - L_{t-1}) - C_t^M - E_t^M - V_t^M$$

Having calculated monthly transactions [F_t^M] one can proceed to calculating monthly growth rate (a_t^M) according to the following formula:

$$a_t^M = \frac{F_t^M}{L_{t-1}}$$

In order to obtain monthly growth rate in percentage terms the above formula is multiplied by 100.

The difference between the formula for the calculation of monthly growth rate adjusted for non-transactions and the formula for not adjusted growth rate s_t^M is in the value of CEV_t^M which is deducted from the difference in outstanding amounts between two subsequent reporting months ($L_t - L_{t-1}$)

$$a_t^M = \frac{(L_t - L_{t-1}) - CEV_t^M}{L_{t-1}} \times 100 \quad \text{versus} \quad s_t^M = \frac{L_t - L_{t-1}}{L_{t-1}} \times 100$$

Methodology for the compilation of transactions can be found at www.nbp.pl/Statistics/Monetary and Financial Statistics/M3 and Counterparts/Methodology for the compilation of transactions.pdf.

5.4.2. Statistical methods for the balance of payments in Poland (Tables 5.1.13; 5.1.13.1; 5.1.13.2; 5.1.13.3; 5.1.13.4; 5.1.13.5; 5.1.13.6; 5.1.13.7; 5.1.13.8; 5.1.14; 5.1.15; 5.1.16; 5.1.17)

5.4.2.1. Institutional aspects

Introduction

Narodowy Bank Polski (NBP) is responsible for compiling and publishing Poland's balance of payments (b.o.p.) and related statistics (e.g. the international investment position (i.i.p.), external debt, foreign direct investment (FDI) statistics, reserve assets).

Legislative provisions

Under the Act on Narodowy Bank Polski (NBP) of 29 August 1997, published in the Dziennik Ustaw (Journal of Laws) of 1997, No. 140, Item 938, NBP is obligated to compile the balance of payments and the international investment position statement and report thereon to Parliament and Council of Ministers.

The Act on Narodowy Bank Polski and the Prawo dewizowe (Foreign Exchange Act, published in the Journal of Law of 2002, No. 141, Item 938), specify the reporting requirements. Under these acts and other legal regulations, NBP is authorized to request data for compiling balance of payments statistics. Other legal regulations are (1) the Regulation of the Minister of Finance dated 23 October 2009, published in the Journal of Law of 2009, No. 184, Item 1437, and (2) the Resolution of NBP's Management Board dated 19 November 2009, published in the Dziennik Urzędowy NBP (Official Journal of NBP) of 2009, No. 18.

In cases of non-compliance with legal requirements, sanctions can be imposed on non-reporting agents in the form of a fine that is regulated by the Penal and Fiscal Code.

External cooperation

NBP co-operates with domestic organizations (mainly with the Statistics Poland) and foreign institutions.

The data necessary for the compilation of balance of payments are provided by business entities as well as state authorities.

The Statistics Poland forwards to NBP data on foreign trade and international trade in services, in line with methodology developed jointly by both institutions. Data on trade in goods and services from abroad are used by the Statistics Poland to calculate the rest of the world accounts in the national accounts statistics (GDP). The Statistics Poland also provides data on foreign travel (Poles and foreigners), migration statistics, which is used to estimate income of Poles working abroad and foreigners working in Poland as well as information derived from the Household Budget Survey. NBP has also been receiving, from

the Statistics Poland, data required for updating register of entities engaged in the operations included in the balance of payments.

NBP receives, from the Ministry of Finance (MF), data on foreign transactions of the government sector. The MF also provides information that is used in compiling balance of payments current account, i.e. the data on the import of used cars from the EU (data is not recorded by the Statistics Poland).

The Social Insurance Institution provides NBP with data on the number of foreigners, for whom social security and health premiums are paid as well as data on pensions paid abroad.

The Ministry of Family, Labour and Social Policy provides NBP with data on the number of statements by employees willing to provide employment to foreigners as well as data on the number of employment permits issued – this data is used in estimating income from employment of foreigners in Poland and remittances.

NBP cooperates with international institutions such as the European Central Bank (ECB), Eurostat, International Monetary Fund (IMF), Organization for Economic Cooperation and Development (OECD), World Bank (WB), Bank for International Settlements (BIS) in the area of balance of payments methodology.

Users

Data on the b.o.p., the i.i.p., the external debt, the official reserve assets, the international reserves and foreign currency liquidity are available to users on the NBP's website.

Moreover, data and publications are forwarded to the Parliament, the Government, the Statistics Poland and to private and public research institutes, universities, rating agencies, etc. Analytical papers on bop are published on NBP website.

B.o.p., i.i.p. and direct investment statistics are transmitted to the ECB, the European Commission (Eurostat), the IMF, the OECD and the World Bank on regular basis.

5.4.2.2. Statistical system

The data collection system

The Polish balance of payments compilation system is based on direct reporting of entities involved in transactions with non-residents to NBP. Reports encompass foreign financial assets and liabilities as well as income on those assets and liabilities. Information derived from public statistics surveys as well as administrative data sources is also used in calculating current account.

In order to reduce the reporting burden for reporting agents while aiming at keeping data quality, reporting thresholds for data received from enterprises have been introduced.

Data on transactions is cross checked with the information on stocks. Other data sources such as: central registry of Treasury bonds, data on privatisation, internet sources and press articles are also used to assess the plausibility of data.

Reporting agents

Financial and non-financial corporations are required to report information on the financial account of the balance of payments and income on them directly to NBP.

Data on foreign transactions of the Ministry of Finance is provided by financial agents to the government (i.e. Bank Gospodarstwa Krajowego and Narodowy Bank Polski). Substantial portion of data on the current account is collected and published by external institutions (Statistics Poland – data on goods, services and – since 2013 – data on international travel).

Reporting thresholds

Entities of public finance sector with total assets, liabilities and equity at year-end equal or over PLN 500 million report to NBP on monthly basis, and entities of public finance sector with total assets, liabilities and equity at year-end equal to PLN 26 million and below PLN 500 million report to NBP on quarterly basis.

Natural persons whose receivables and liabilities unrelated to their business activity at year-end are equal to or above PLN 7 million report to NBP on quarterly basis.

All entities classified as monetary financial institutions, except the central bank (S. 121) and money market funds (S. 123), which are holders of external assets and/or liabilities are under reporting obligation to NBP (no reporting threshold).

Other residents (excluding public finance sector entities, natural persons, investment entities which keep securities accounts and banks) whose total amount of assets, liabilities and equity capital at year-end is either equal to or greater than PLN 300 million report to NBP on monthly basis and residents whose total amount of assets, liabilities and equity capital at year-end is higher than PLN 10 million and lower than PLN 300 million report to NBP on quarterly basis.

Data availability

Monthly b.o.p. is published 44 working days following the end of a respective month. Quarterly b.o.p. is compiled and distributed three months following the end of the reference quarter. Detailed release calendar is available on NBP website.

Breakdowns in the monthly b.o.p. are limited in detail. The quarterly b.o.p. is available with detailed instrument/category and sectoral breakdowns.

Geographical breakdown is available since 2004.

Balance of payments, international investment position, external debt and foreign direct investment data is presented in three currencies: PLN, EUR and USD.

Data checks

At the individual level data is automatically checked during the transmission when uploaded to the database.

The data is also checked at an aggregated level through analysis of time series for each component.

Flows are reconciled with relevant stocks.

Moreover, the data is cross-checked with other sources, e.g. information on relevant stocks from b.o.p and monetary statistics, database of T-bonds central register, securities databases, internet, press, data on privatisations, etc.

5.4.2.3. Revision policy

Monthly b.o.p. data:

- first revision when the data of the following month become available;
- next revision when data of the relevant quarter is revised or published.

The quarterly b.o.p. data is routinely revised:

- first revision when data of the following quarter become available;
- next revision on end-March and end-September, and further revision when data referring to corresponding annual i.i.p. becomes available.

5.4.2.4. Publication

The data on b.o.p., i.i.p., the external debt, the official reserve assets, the international reserves and foreign currency liquidity is available to users on NBP's website. Release calendars are also posted on the website.

More detailed data on the b.o.p., i.i.p., external debt, reserve assets, direct investment and relevant analyses are published by NBP:

- Bilans płatniczy Rzeczypospolitej Polskiej (Balance of Payments of the Republic of Poland) – on quarterly basis;
- Polskie inwestycje bezpośrednie za granicą, Zagraniczne inwestycje bezpośrednie w Polsce (Direct Investment) – on annual basis;
- Międzynarodowa pozycja inwestycyjna Polski (International Investment Position in Poland) – on annual basis.

Moreover, the below NBP publications also comprise the b.o.p. data:

- Biuletyn Informacyjny ("Information Bulletin") – on a monthly basis;
- Raport Roczny ("Annual Report") – on an annual basis.

5.4.2.5. Balance of payments²

Definition

The balance of payments is a statistical statements that summarizes economic transactions between Poland and all other countries (i.e., between Polish residents and non-residents) in a defined period of time. The balance of payments incorporates the current account, the capital account, the financial account as well as errors and omissions.

5.4.2.5.1. The current account

Definition

The current account comprises transactions in goods, services, primary income and secondary income.

5.4.2.5.1.1. Goods

Definition

Trade in goods item of the balance of payments includes the value of exchange of goods with foreign countries which comprises transactions between residents and non-residents, including but not limited to:

- transactions leading to the change in ownership of goods; these are mainly purchase/sale transactions, however the change in ownership of goods may also result from free-of-charge transfer (donations, aid in-kind), as well as from the in-kind contributions by foreign investors or from of financial lease of goods (such as means of transport, machinery and equipment);
- merchanting is defined as the purchase of goods by a resident from a non-resident combined with the resale of the same goods to another non-resident without the goods being present in Polish economy; merchanting is shown on the side of exports (purchase of goods shown as negative exports and sale of goods is shown as positive exports);
- transaction for the purchase or sale of non-monetary gold.

Trade in goods does not include purchase/sale transactions of monetary gold carried out between central banks as well as transactions involving goods for processing and repairs; goods are only temporarily transferred for processing, in light of the bop methodology, there

² The international standards for compiling the balance of payments were defined in the following publications: *Balance of Payments and International Investment Position Manual*, 6th edition, 2009, International Monetary Fund, *OECD Benchmark Definition of Foreign Direct Investment*, fourth edition 2008, OECD, *External Debt Statistics 2014*, International Monetary Fund, *International Reserves and Foreign Currency Liquidity 2014*, International Monetary Fund, *System of National Accounts*, 2008, Inter-Secretariat Working Group on National Accounts, *European System of Accounts ESA 2010*, Eurostat, 2013.

is no resident-non-resident exchange of goods and therefore such transaction is not shown in trade in goods.

Specific features of data collection

The main source of data on goods in the Polish balance of payments is Foreign Trade Statistics (FTS) compiled by the Statistics Poland on the basis of INTRASTAT declarations (for intra-European Union trade) as well as from the Single Administrative Documents, SAD (for extra EU trade); this data is published by the Statistics Poland under the foreign trade item.

Statistics on electricity and natural gas have been provided by the Energy Market Agency, which operates under the auspices of the Ministry of Development. Transactions regarding the foreign trade of airplanes and ships have been derived from civil registry of airplanes and national registry of ships (alternative data sources).

Due to the fact that the international methodological standards are nearly the same in case of compilation of trade in goods with foreign countries for the balance of payments and for the national accounts purposes, NBP and the Statistics Poland agreed on the principles of transition from the foreign trade data in the FTS into the trade in goods data in the balance of payments and national accounts. In order to obtain the relevant data, the following adjustments must be made:

- decrease in the value of foreign trade data on the import side by the value of costs of transport included in the invoices drawn upon the CIF basis;
- decrease in the value of foreign trade data by transactions in goods for processing;
- reclassification of merchanting;
- additional estimation of the trade in goods.

Decrease in the value of foreign trade data by transactions in goods for processing and repair is made by removing total transactions in goods for processing and repair from trade in goods. These goods are identified by transaction type.

Reclassification of merchanting

Merchanting is defined as the purchase of goods by a resident from a non-resident combined with the resale of the same goods to another non-resident without the goods being present in Polish economy. Data on merchanting is derived from services statistics. Revenues on merchanting are reclassified as exports and expenditure on merchanting are reclassified as negative exports.

Additional estimation of the trade in goods with foreign countries, made for the balance of payments and for national accounts relates to the turnover which was not registered in the FTS. It includes the following three groups of goods:

1. goods transported by tourists (in tourist traffic), which were purchased for resale;
2. other goods transported across the border without either the INTRASTAT declarations or the SAD documents being filled in (these include mainly the exported goods transferred abroad in bigger quantities without either the INTRASTAT declarations or the SAD documents, such as vegetables, fruit, furniture, footwear, clothing);

3. foreign trade data is increased by the value of imports of second-hand cars from European Union, which is not included in INTRASTAT system due to the low reporting thresholds for imports of cars. This data is obtained from Ministry of Finance which collects it for fiscal purposes.

5.4.2.5.1.2. Services

Definition

Transport services include the services related to transport of goods, transport of passengers and other services connected with the abovementioned transport services, e.g. loading and unloading of containers, storage and warehousing, packaging and repackaging, towing and traffic control, maintenance and cleaning of equipment, rescue operations as well as postal and courier services (according to new standards it has been reclassified from other services).

The trade in services concerning travel apply to non-residents' expenditure in Poland and the expenditure of Poles abroad due to travel. This category includes expenditure on accommodation, catering and services as well as goods purchased by tourists for their own needs (whereas the objects purchased for resale are classified as goods). Subject to type of travel, the expenditures are classified as business travel (including these of the seasonal and cross-border employees and other business travels) and personal travels (health, study and other).

Manufacturing services on physical inputs owned by others and maintenance and repair services have been reclassified from trade in goods to services. Manufacturing services on physical inputs owned by others cover processing, assembly, labelling, packing, and so forth. These actions result in significant changes in physical inputs made by an entity that does not own the goods. Maintenance and repair services cover both minor repairs that maintain the good in working order and major repairs that extend the efficiency and capacity of the good and extend its life. According to BPM5 methodology goods for processing and repair in goods have been presented in the balance of payments on gross basis i.e. goods sent abroad for/after processing (repair) were recorded on the side of exports and goods received from abroad for/after processing (repair) were recorded on the side of imports. Now, in line with BPM6, the data will be recorded on net basis.

In addition to the transport services and foreign travel, there is a third type of services – other services. This category includes a number of transactions related to:

- construction;
- insurance;
- finance;
- telecommunication, information and IT technology;
- patent fees, royalties and licence fees;
- other business services (e.g. merchanting and other trade-related services, operational lease and other business services);
- cultural, and recreational services;
- government services.

Revenues include the value of services rendered by residents to non-residents, whereas the expenditures include the value of services rendered by non-residents to residents. On the other hand, in accordance with the international standards, certain services are presented in the balance of payments in a special way. Therefore, construction services are divided into services rendered abroad (the expenditures include the costs of those services incurred by residents) and the ones performed at home (the revenues include the costs of services incurred by non-residents). BPM6 methodology outlines new method for calculating insurance services. The total value of insurance and pension services is based on gross premiums earned and claims payable. Furthermore, total value of insurance services is expanded by income on insurance technical reserves. New methodology of calculating the value of insurance services is linked to components of primary income, secondary income, financial account as well as technical insurance reserves included in the i.i.p.

Additionally, financial intermediation services indirectly measured (FISIM) have been added to financial services.

Merchanting services have been removed from other services and included in trade in goods.

Specific features of data collection

Data on international trade in services are derived from International Trade in Services Survey carried out jointly by NBP and Statistics Poland.

The survey is based on information reported directly by Polish residents. The ITS survey is conducted in two spans (frequencies). The first one is quarterly, and it includes only companies with the value of international trade in services above the threshold of 800 000 PLN in case of exports and 1 000 000 in case of imports. The latter is an annual survey and encompasses also those Polish residents who report any international trade in services transactions (all companies below the threshold).

In the International Trade in Services Survey we are making some adjustments of the value of below-threshold transactions. All kinds of services collected within the International Trade in Services Survey are grossed up based on the same guidelines:

- The value of provided and acquired services for respondents who have not completed statistical questionnaires are grossed up (separately for each side of the transaction); estimations based on historic transactions reported by enterprise.
- In case of entities who are obliged to complete an annual questionnaire the data are also grossed up during the compilation sets of quarterly ITS data; estimations based on data reported by quarterly respondents.

ITSS is the major source of data not only in transportation, business services, construction etc. but also for manufacturing of physical inputs owned by others as well as maintenance and repair. ITSS respondents are requested to report manufacturing of physical inputs owned by others which they have purchased/delivered. Reporting agents provide information on the source of services received or delivered. Geographical breakdowns are consistent with change in ownership.

The data on trade in services both transport services, manufacturing services on physical outputs owned by others, maintenance and repair services and other services is collected by the Statistics Poland directly from enterprises rendering and acquiring such services. The data is collected on a quarterly and annual basis and is broken down by required component type and country.

Furthermore, the value of services related to transport of goods is increased by the value of services resulting from the reclassification of a given part of the value of goods. This refers to the necessity of considering the fob-based value of goods in the balance of payments. In the FTS, only the value of export is expressed on the fob basis, whereas the value of imported goods is shown on the cif basis. Thus the decrease in the value of goods and the reclassification of the costs of transport and insurance services to a relevant category of services are required. Some values are estimated. The estimates include:

- transfer from the cif base to the fob base in the area of import of goods included in FTS;
- share of the transport costs in the payment for the export of goods executed by Polish carriers;
- share of individual types of costs (according to the means of transport) in the abovementioned estimated values.

The value of exports of services related to transport of goods is also increased by the costs of transport rendered by Polish carriers and included in the invoices of trade in goods.

Source of data for the compilation of travel in the balance of payments is the data of Institute of Tourism, which carried out surveys on travel until 2013, since 2014 data on travel are collected by the Statistics Poland.

Source of data for the compilation of insurance services, besides ITS survey carried out by Statistics Poland, is data received from Financial Supervision Authority.

Deviations from the international standards

In the procedure of increasing the value of transport services by the adjustments of trade in goods resulting from the transfer from the cif base to the fob base all corrected amounts are classified as transport services, while insurance services are not separated.

5.4.2.5.1.3. Primary income

Specific features of data collection and definitions

Compensation of employees

Compensation of employees comprise foreign transfers related to payment for work performed by non-residents employed in Poland and Poles employed abroad i.e. persons who have been working abroad for less than one year.

Compensation of employees is calculated with the use of an estimation method. This method rests to a great extent on determining the number of Poles working abroad, period of their employment as well as the level of their compensation and their willingness to transfer their money to Poland. Major data source for estimating the number of Poles working abroad is the Statistics Poland data on migration, data derived from LFS (household survey carried out by Statistics Poland) as well as data from those countries in which Poles have found employment. Remaining elements of the new estimation method have been derived, to a great extent, from NBP survey carried out in selected European countries since 2007. The estimation methods for expenses and revenues are similar. The number of non-residents employed in Poland is estimated based on data derived from Ministry of Family, Labour and Social Policy on number of work permits issued and on the data from the Social Insurance Institution (ZUS) on non-residents for whom payments on account of labour are made.

The same sources of data is used for estimates of workers' remittances included under current transfers of other sectors in balance of payments both for revenues and expenses.

Direct investment income

Income on direct investment comprises both income on equity capital and income on debt. The income on equity comprises dividends attributable to a direct investor and declared for a given reporting year (as regards public companies), share in profit (as regards limited liability companies), transferred profits of branches and reinvested earnings (loss per direct investor is deemed negative reinvested earnings). The income on debt, on the other hand, is included in the balance of accrued interest on loans extended and obtained by direct investors.

Earnings are calculated in accordance with COPC (Current Operating Performance Concept) aligned with Polish accounting standards. Monthly and quarterly bop is estimated based on financial result of banks as well as aggregated data on financial result of companies received from the Statistics Poland. Data derived from entities' annual reports, prepared in accordance with COPC, are subsequently broken down by respective quarters and months.

Source of data for direct investment are monthly and quarterly reports received directly from reporting agents (equity and debt instruments) and annual direct investment survey (only equity). Foreign direct investment in Polish entities listed on Warsaw Stock Exchange are compiled on security-by-security basis from financial statements of issuers and monthly reports provided by custodian banks and brokerage houses.

Data on interest are presented on accrual basis. Data on dividends are based on date on which dividends were declared (for non-listed companies) and by date on which dividends were settled (for listed companies).

Reinvested earnings and undistributed earnings are allocated to their period of origin. Reinvested earnings are earnings received in a given period minus dividends. Resident to non-resident relationship (direct investment) is defined in accordance with the Framework of Direct Investment Relationship (FDIR).

In case of securities with the ISIN code data on portfolio investment income in the balance of payments is calculated on the accrual “security-by-security” basis. The source of data for these calculations is security-by-security reports collected directly from Polish securities holders, issuers and financial institutions (securities trading intermediaries) and data on characteristics of securities derived from the database maintained by Narodowy Bank Polski. This database is supplied with data derived from the National Depository for Securities, Centralised Securities Database (CSDB) maintained by the ECB and data reported by Polish issuers. The only exception from the above mentioned rule are shares issued by non-residents, where due to limited availability of data (only data from CSDB), the dividends are registered at the date of payment and not at the “dividend day”.

In case of securities bearing no ISIN code data on income is reported directly by reporting entities on accrual basis. Securities are broken down by security type (equity securities, long-term debt instruments, money market instruments) and by sector of resident paying or receiving the revenue (general government, banks, other sectors). Income on debt securities bearing no ISIN code issued by Polish entities on external markets is neither collected nor estimated.

Portfolio investment income

In case of securities with the ISIN code data on portfolio investment income in the balance of payments is calculated on the accrual “security-by-security” basis. The source of data for these calculations is security-by-security reports collected directly from Polish securities holders, issuers and financial institutions (securities trading intermediaries) and data on characteristics of securities derived from the database maintained by Narodowy Bank Polski. This database is supplied with data derived from the National Depository for Securities, Centralised Securities Database maintained by the ECB and data reported by Polish issuers.

In case of securities bearing no ISIN code data on income is reported directly by reporting entities on memorial basis. Securities are broken down by security type (equity securities, long-term debt instruments, money market instruments) and by sector of resident paying or receiving the revenue (general government, banks, other sectors). Income on debt securities bearing no ISIN code issued by Polish entities on external markets is neither collected nor estimated.

As regards income on equity securities, only dividends are registered in the income category. All other incomes or losses on equity securities (especially income or loss resulting from the difference in purchase price and sale price of the security) are registered on the financial account of the balance of payments, in the „portfolio investment” category.

Other investment income

Other investment income is registered on accrual basis. It comprises income on financial instruments which are regarded as other investments of the financial account and income on reserve assets. Income received by holders of insurance policies is also allocated to this category. Income on other investment of the financial account comprises: interest on loans extended and received, interest on deposits including interest on repos, and other payments

related to income on property. Data on income on reserves assets include income on debt securities, interest on deposits and interest on repos. FISIM services have been excluded from pure interest. Insurance premiums include returns on investment of insurance technical reserves owned de facto by policy holders.

Data on investment income, both Polish and foreign, is prepared by the central bank based on reports received directly from Polish reporting entities. Reporting forms include income data (interest accrued/received) on instruments included in this category with respect to deposits, loans and other assets or liabilities.

Transactions against insurance technical reserves are estimated in the process of estimating insurance services.

Other primary income

Other primary income consists of taxes and subsidies on products and production and rent. Taxes and subsidies on products and production have been present in bop since Poland's accession to the EU. Subsidies on products and production (Common Agricultural Policy) are shown in revenues while the portion of Polish premiums paid to EU which originate from Traditional Own Resources (TOR) are shown in expenditures. Rent refers to leases of natural resources.

Data on monthly and quarterly transfers to/from the European Commission are derived from the data on the Ministry of Finance bank account which is held by the central bank (EU and other international organizations).

Data on rents are prepared based on a quarterly ITS survey.

5.4.2.5.1.4. Secondary income

Definition

The secondary income account shows current transfers between residents and non-residents. Current transfers such as donations, free-of-charge exports and imports of goods and services under international aid schemes, are recorded in this account to show their role in the process of income distribution between the economies. Transfers are executed, both in cash and in kind, in favour of government institutions or other sectors (private).

Funds received or paid by the Polish government sector that is central government and local government units constitute secondary income of government sector. These are the funds received from European Union institutions, countries and international organisations as well as paid in favour of these institutions and countries to finance current expenditures of the government – such as humanitarian aid, medicines, training, etc. These include also membership fees for the EU and international organisations outside the EU. The category includes also taxes and payments made by non-residents in favour of Polish government sector. Revenues from obligatory social insurance as well as retirement and annuity benefits

paid by the Social Insurance Institution (ZUS) in favour of non-residents, and indemnities paid by the government vis-à-vis non-residents constitute other government transfers.

Secondary income of other sectors is split into personal transfers and other transfers.

Personal transfers consist of all current transfers in cash or in kind made or received by resident households to or from non-resident households. Workers' remittances is the key component to personal transfers.

Workers' remittances comprise transfers of wages and salaries of persons working abroad and considered to be residents of the country in which they work. In compliance with the IMF recommendations, a person staying or intending to stay for a year or longer on the territory of a given country is a resident of that country. In such case, funds transferred in favour of the person's family are registered in current transfers as workers remittances. On the other hand, in case of the stay lasting shorter than a year, the person is treated as non-resident and his/her income is registered in the balance of payments under income as compensation of employees.

Other transfers of non-government sector include the value of current transfers abroad of residents – natural persons and other entities of national economy not included in the government sector. The other transfers of non-government sector made in kind (free-of-charge transfers of goods and services in foreign trade) and/or in cash include:

- donations and aid received from abroad, as well as rendered in favour of non-residents, related to execution of objectives not connected with investment (e.g. humanitarian aid, food, clothing, medicines, training);
- taxes and fees in favour of foreign governments;
- membership fees;
- retirement and annuity benefits received by residents from abroad;
- inheritance;
- alimony;
- fines and indemnity (e.g. related to breach of contracts, product forgery, forgery of trademarks, patents);
- competition and lottery winnings;
- fees for transfer of sportsmen;
- net non-life insurance premiums;
- non-life insurance claims.

Specific features of data collection

The source for government transfers category in the balance of payments is the regional branch of Narodowy Bank Polski which keeps settlements of banking accounts of Ministry of Finance that are used for government transfers (both regarding UE and the other international organisations). The data on other transfers such as retirement and annuity benefits paid by Polish government is derived directly from the Social Insurance Institution (ZUS) which is in charge of such transfers.

The source used for compilation of workers' remittances has been described in the chapter on compensation of employees.

Data on transfers of other sectors is compiled based on numerous data sources. Data on transfers of enterprises is collected in the frame of survey on international trade in services carried out by the Statistics Poland. The other transfers of other sectors on revenue side are mainly based on LFS (household survey made by Statistics Poland); information from Ministry of Finance and the Social Insurance Institution (ZUS) is used as additional sources.

Both net non-life insurance premiums and non-life insurance claims are derived from estimations of insurance services.

5.4.2.5.2. Capital account

Definition

The basic components of the capital account in the balance of payments are capital transfers representing transfers of rights to tangible assets, i.e. donations and funds included in non-returnable grants, specially assigned to fixed assets financing, debt write-offs by the creditor, transfer of funds related to the acquisition or disposal of nonfinancial and non-produced assets. Capital transfers are compiled separately for the government sector and other sectors.

Capital transfers of the government sector reflect the value of funds received from EU institutions, countries and international organisations, as well as funds transferred by the Polish government in favour of these institutions. Funds in cash are allocated free-of-charge to financing investment in fixed assets e.g. construction of roads, motorways, bridges, schools, hospitals, etc. The category of capital transfers of the government sector comprises write-offs of receivables, both principal and interest.

Capital transfers of other sectors comprise donations and grants specially assigned to fixed assets financing, which were received from or transferred abroad by nongovernment units.

Acquisition and disposal of non-produced nonfinancial assets comprises purchase and sale of patents, copyrights, licenses and trademarks, purchase and sale of land to foreign embassies located in Poland as well as purchase and sale of land by Polish embassies abroad.

Specific features of data collection

Capital transfers of government sector are compiled in the balance of payments on the base of data derived directly from the banking accounts of the Ministry of Finance.

Capital transfers of other sectors are calculated based on data collected under the survey on international trade in services carried out by the Statistics Poland which, apart from the data on turnover of services, collects information on current transfers and capital transfers.

5.4.2.5.3. Financial account

Definition

The financial account comprises financial transactions involving direct investment, portfolio investment, other investment, financial derivatives and reserve assets.

5.4.2.5.3.1. Direct investment

Definition

NBP compiles data on direct investment in compliance with the OECD definition. The term “direct investment abroad” denotes an investment made by a resident entity in one economy (“direct investor”) in an entity resident in an economy other than that of the investor (“direct investment enterprise”) aimed at attaining a long-term profit from the capital involved. The direct investment enterprise denotes an enterprise in which direct investor owns at least 10% of the voting power in the decision making body of the company.

The direct investment capital comprises equity capital in the form of shares and other equity, reinvestment of earnings and assets and liabilities vis-à-vis debt instruments.

Reinvestment of earnings denote the part of profits, accruing to a direct investor, which remains in the direct investment enterprise and which is allocated to its further development.

Specific features of data collection

Source of data for direct investment are monthly and quarterly reports received directly from reporting agents (equity and debt instruments) and annual direct investment survey (only equity). Foreign direct investment in Polish entities listed on Warsaw Stock Exchange are compiled on a security-by-security basis from financial statements of issuers and monthly reports provided by custodian banks and brokerage houses.

Business entities register is revised and updated with the use of information from other sources such as press information, financial statements of business entities, bilateral contacts etc.

Assets and liabilities of investment funds are not included in direct investment.

Sources of data on securities comprise, stocks and flows, security-by-security reports provided by Polish investors (assets) or issuers/brokers (liabilities).

In case of securities with the ISIN code the source of data for these data is data on characteristics of securities (price, coupon or corporate action) derived from the database maintained by Narodowy Bank Polski. This database is supplied with data derived from the National Depository for Securities, Centralised Securities Database maintained by

the ECB and data reported by Polish issuers. Valuation adjustments and exchange rate fluctuations are calculated by NBP on a security-by-security basis. Data for this calculation is derived from securities database.

In case of securities without the ISIN code data on stocks (market value) and transactions are derived from received reports. Reports also encompass data on valuation adjustments, exchange rate fluctuations and other changes.

Issuers reports are data source for securities not bearing the ISIN code issued by Polish issuers on external markets. Value of interest paid is estimated on an individual basis.

Bonuses are identified by reporting agents as “dividends” declared from cumulated profit for previous reporting periods or originating from the sale of company’s assets. Bonuses are reported along with transactions and regarded as withdrawal of capital.

Investment in real estate in Poland is usually via a company registered in Poland therefore, data on real estate are recorded the same as data from regular reporting agents.

5.4.2.5.3.2. Portfolio investment

Definition

Portfolio investment is defined as cross-border transactions and positions involving debt or equity securities, other than those included in direct investment or reserve assets.

Equity securities comprise all kinds of tradable shares and stocks, including investment certificates (shares) of collective investment funds. These comprise also participation units in collective investment funds, investment certificates and depository receipts (e.g. ADR or GDR).

Debt securities comprise all kinds of long-term and short-term debt securities including government bonds, corporate bonds, T-bills, short-term corporate debt securities and negotiable certificates of deposit. Debt securities are classified as long-term securities or money market (short-term) instruments based on their original maturities. Long-term debt securities are securities with original maturity of at least one year. All other debt securities are classified as money market instruments (short-term debt securities). Debt securities category comprises also debt securities with embedded financial derivatives (e.g. convertible bonds or callable/putable bonds).

Other financial derivatives are excluded from portfolio investment and are registered under “Financial derivatives”. Repo transactions are also excluded from the portfolio investment category and registered in “Other investment” category.

Specific features of data collection

The source of data on portfolio investments item in the balance of payments are “security-by-security” reports on positions and transactions collected directly from Polish holders of securities (in case of portfolio assets), issuers and intermediaries in trading in securities (in case of portfolio liabilities).

In case of securities bearing the ISIN code, the data used in the process of verification and compilation of reporting data is the data on characteristics of securities e.g. coupons, prices, corporate events derived from the database kept by Narodowy Bank Polski. This database is supplied with data derived from the National Depository for Securities, Centralised Securities Database (maintained by ECB) and data derived directly from Polish issuers. Data on transactions is adjusted on security-by-security basis against repo transactions. Market value of transactions (including interest accrued and paid) is calculated on a security-by-security basis.

In case of debt securities with the ISIN code issued by Polish entities on external markets residual approach applies. The data from the issuers is modified in the process of compilation with the use of the data on transactions executed by Polish holders of these securities. The security-by-security calculations include the value of interest (accrued and paid).

In case of securities without the ISIN code data on stocks (market value) and transactions are derived from received reports. Reports also encompass data on valuation adjustments, exchange rate fluctuations and other changes. Reports of issuers serve as a source of data on securities without ISIN codes issued by Polish entities on external market.

Securities are broken down by sector or resident-issuer of securities (for liabilities), sector of resident-holder of securities (for assets) as well as by country of issuer for portfolio assets.

5.4.2.5.3.3. Other investment

Definition

Other investment is a residual category that includes positions and transactions other than those included in direct investment, portfolio investment, and reserve assets. Other investment covers: other equity, currency and deposits, loans, insurance technical reserves, trade credits and advances, other assets and liabilities and special drawing rights. Other investment (with the exception of trade credits) is presented on accrual basis i.e. recording interest accrued and unpaid.

Other equity

Equity not in the form of securities and participation in some international organizations is classified as other equity.

Currency and deposits

On the assets side the currency and deposits are calculated on the base of stocks of claims on cash in the form of foreign currency (only the banking sector), current accounts and deposits in credit institutions and in foreign banks. This category comprises: currency accounts and deposits (including overnight deposits), term deposits, deposits redeemable at notice, blocked deposit accounts and repo transactions.

On the liabilities side the currency and deposits are calculated on the base of stocks of liabilities on current accounts and deposits held by non-residents. This category comprises: current accounts and deposits (including overnight deposits), term deposits, deposits redeemable at notice, blocked deposit accounts and repo transactions. The currency and deposits cover also liabilities on money security excluding initial margin for derivatives.

Loans

Extended and received loans, apart from the breakdown into long-term (with original maturity exceeding one year) and short-term (with original maturity up to one year), are broken down by sectors of economy. Turnover comprises not only drawings and repayments in cash but also drawings and repayments in the form of goods and services delivery, rollover, interest capitalization, conversion to Polish zloty, credit restructuring, loan on current account and overdrafts on accounts held with credit institutions, foreign banks or entities providing financial services for capital group.

Insurance technical reserves

Insurance technical reserves are estimated for the insurance services purposes.

Trade credits and advances

Trade credits are estimated based on stocks of assets and liabilities related to advances extended, payments deferred in imports and exports of goods and services and prepayment by customers for goods and services not yet provided.

Other assets and liabilities

Other financial assets and claims on non-residents comprises among others assets which result from difference of the time of transaction and the time of corresponding payment e.g. claims on the share in profit or dividend declared but not yet paid or converted into another financial instrument; funds deposited on current accounts in other intuitions i.e. other than foreign banks and credit institutions; claims on returnable variation margins (initial margin) for derivatives. The item other liabilities to non-residents covers among others liabilities which result from transactions implying difference of the time between the transaction and the time of corresponding payment (e.g. dividend declared but not yet paid or converted

into another financial instrument) and liabilities on returnable variation margins (initial margin) for derivatives.

Special drawing rights (SDR)

Transactions on SDR allocation are included in this position.

Method of data collection

Since 2010 data on other investment, both Polish investment abroad and foreign investment in Poland have been compiled on the basis of reports directly supplied by Polish reporting entities.

5.4.2.5.3.4. Financial derivatives

Definition

The “Financial derivatives” constitute the separate category of the balance of payments. It comprises all derivatives with symmetrical risk such as futures, forwards, swaps, IRS, CIRS, CDS as well as instruments with unsymmetrical risk such as options. This item includes both derivatives settled by delivery of basic instrument and derivatives settled in cash. The profit or loss on transactions involving financial derivatives is classified into this category.

The data on financial derivatives are also available in geographical breakdown. The criterion of a first identified contractor is used to determine national status of the parties of transaction. The breakdowns by the type of a basic instrument (foreign exchange rates, interest rate, commodity, shares, credit derivatives, others) and by pairs of currencies (in case of foreign exchange instruments) or by settlement currency (for other types of derivatives) are available.

Specific features of data collection

The source of data on financial derivatives for the balance of payments is reports collected directly from Polish entities having positions which emerged as a result of transactions on derivatives with non-residents.

Financial derivatives cover all financial flows resulting from settlements of transactions involving financial derivatives, except returnable initial margins. In the discussed category variation margins and option premiums are registered. Data is registered on gross basis.

5.4.2.5.3.5. Reserve assets

Definition

Reserve assets cover transactions with non-residents related to: monetary gold, reserve position in the IMF and other reserve assets, in convertible currencies.

Reserve assets comprises balance of transactions carried out by NBP with respect to instruments included in reserve assets (including the balance of turnover on currency and deposits accounts in banks abroad, balance of transactions executed in foreign currencies in NBP counters, balance of turnover of foreign securities, balance of reverse repos, change in reserve position in the IMF as well as purchase and sale of monetary gold).

Specific features of data collection

Data on reserve assets are collected based on accounting system of NBP.

5.4.2.6. International investment position

Definition

The international investment position is a statistical statement of the stock of foreign assets and liabilities at the end of the reporting period. Net international investment position informs whether a country is a creditor or a net debtor.

Changes of stock of foreign assets and liabilities is driven by the value of transactions with nonresidents as well as exchange rate changes, differences from valuation of assets and liabilities and other changes.

Specific features of data collection

The international investment position is compiled based on data from:

- Narodowy Bank Polski;
- the Ministry of Finance;
- financial agents of government (NBP and Bank Gospodarstwa Krajowego);
- the National Depository for Securities;
- Polish banks conducting settlements with non-residents;
- Polish companies participating in trade abroad.

Foreign assets and liabilities is presented broken down into types of financial instruments and the sectors of the national economy.

5.4.2.6.1. Direct investment

Definition

NBP compiles data on direct investment in compliance with the OECD definition. The term “direct investment abroad” denotes an investment made by a resident entity in one economy (“direct investor”) in an entity resident in an economy other than that of the investor (“direct investment enterprise”) aimed at attaining a long-term profit from the capital involved.

Foreign claims against **direct investment** comprise resident's shares in foreign capital-linked companies. Foreign claims against direct investment also include claims against debt instruments owned (loans extended by residents to foreign capital-linked companies), claims on provision of goods and services and prepayments to foreign investors against future supply of goods and services and other debt instruments owned by capital-linked companies.

Claims against **foreign investment** comprise residents' equity claims against debt instruments owned (loans received by non-residents), claims on provision of goods and services, prepayments to foreign investors against future supply of goods and services and other debt instruments owned by capital-linked companies.

Specific features of data collection

Foreign assets and liabilities vis-à-vis direct investment have been calculated based on reports of residents that are part of capital-linked groups.

5.4.2.6.2. Portfolio investment

Definition

Portfolio investment is defined as transactions and positions involving debt or equity securities, other than those included in direct investment or reserve assets.

Specific features of data collection

The source of data are security-by-security reports on stocks and flows collected directly from Polish holders (in case of portfolio assets), or Polish issuers and financial intermediaries (in case of portfolio liabilities).

For securities bearing an ISIN code, descriptive data, e.g. prices, coupons, corporate events from the securities database, maintained by NBP, are used in the verification and compilation of reported data. This database is supplied with data derived from the National Depository for Securities, Centralised Securities Database maintained by the ECB and data reported by Polish issuers. For securities without ISIN codes issued by Polish entities on foreign markets, the issuer data is used.

Data on securities issued by Polish residents on domestic market and held by non-residents is derived from reports of securities intermediaries on domestic market. Custodian banks, brokerage offices/houses, central depository institutions and clearing houses (KDPW) are sources of data. Sources of data for non-resident portfolio of securities issued by the State Treasury on the domestic market are KDPW (Treasury bonds) and NBP (Treasury bills). For securities issued by the State Treasury on external markets the issuer data is used. Residual approach applies in case of securities issued by residents on external markets. Data received from the abovementioned entities are revised (decreased) against reports of Polish holdings of securities issued by residents on external markets.

Data on portfolio assets of Polish government (securities issued by non-residents) are derived from the bank that provides banking services to Polish government. In case of portfolio assets held by other domestic entities data is derived from reports of individual investors.

Portfolio assets and liabilities are subject to market-price valuation.

In order to differentiate between external liabilities in direct investment and external liabilities in portfolio investment an estimation of equity securities issued by Polish banks and non-financial corporations, held by foreign direct investors on accounts with Polish banks and brokerage offices/houses is made. The estimation is based on data on significant investors in Polish public companies, which is derived from obligatory reports of public companies. Direct investor is an investor with at least 10% of voting shares. Portfolio and direct investment – on the side of external assets – are separated by reporting entities (Polish investors) holding equity securities issued by non-residents.

For portfolio investment, securities with ISIN codes issued by Polish entities on foreign markets. Market value (including accrued interest) is calculated on an s-b-s basis using the securities database.

For securities without ISIN codes, the data on the market value of stocks and transactions reported directly by reporting entities is used for compilation. The reports also, include the data on valuation changes, exchange rate changes and on other changes.

5.4.2.6.3. Financial derivatives

Definition

A financial derivative is a financial instrument that is linked to another specific financial instrument or indicator or commodity (“underlying assets”) and through which specific financial risks (such as interest rate risk, foreign exchange risk, equity and commodity price risks, credit risk, and so on) can be traded in their own right in financial markets. Swaps, options, futures and warranties are all financial derivatives.

The financial derivatives category includes all symmetrical risk instruments, such as futures, forwards, swaps, IRS, CIRS, CDS and asymmetrical risk instruments, such as options. In terms of coverage, derivatives settled by underlying instrument delivery, as well as derivatives with cash settlement are included.

Assets include all derivatives with asymmetrical risk profile written by non-resident and purchased by resident and instruments with symmetrical risk profile which had positive market valuation as at the end of the reporting period. Liabilities cover all derivative instruments with asymmetrical risk profile written by resident and purchased by non-resident and instruments with symmetrical risk profile which had negative market valuation as at the end of the reporting period.

Specific features of data collection

Data on i.i.p. derivatives stocks and flows are derived from reports received from reporting agents, which encompass data on valuation adjustments, exchange rate fluctuations and other changes.

Data on financial derivatives are also available in geographical breakdown. The criterion of a first identified contractor is used to determine national status of the parties of transaction. The breakdowns by the type of a basic instrument (foreign exchange rates, interest rate, commodity, shares, credit derivatives, others) and by pairs of currencies (in case of foreign exchange instruments) or by settlement currency (for other types of derivatives) are available.

5.4.2.6.4. Other investment

Definition

Other investment includes stocks of other assets and liabilities that are not included in direct investment, portfolio investment or in the reserve assets. Other investments include: other equity, trade credits and advances, other loans, currency and deposits, insurance technical reserves, SDRs (allocation) and other accounts receivable/payable.

Other equity

Other equity includes equity in a form other than securities, so it is not included in portfolio investment. This position covers mainly equity shares in international organizations.

Trade credit and advances

Stocks of assets and liabilities arising from trade credits and advances include the so-called company credits, i.e. stocks of receivables and payables goods and services and benefits paid or received advance payments for future deliveries.

Information on these credits come directly from the monthly and quarterly survey of exporters and importers which are providers or receivers of trade credits.

The information is based on the nominal value. The data refer mainly to “other sectors”.

Other loans

Loans include the stocks of receivables and liabilities arising from drawn and outstanding foreign loans (excluding trade credits and loans included in FDI). Receivables from non-residents due to credit on the current account, the stock of overdrafts, the stocks of debt on exceeding balances in accounts held in credit institutions, foreign banks and entities providing financial services for capital group are included on the stock of loans.

Information on loans is broken down into long-term (with original maturity exceeding one year) and short-term (with original maturity of up to one year) broken down by the sectors of economy. The accruals principle applies.

Trade credits and advance are presented in separate item of foreign assets and liabilities.

Loans from/to foreign investors are shown as a component of direct investment – debt instruments.

Currency and deposits

This category of foreign assets and liabilities include:

- on assets side:
 - the stock of current (*nostro*) and timely accounts (deposit) in credit institutions and foreign banks,
 - receivables on repurchase agreement,
 - value of foreign currencies in cash desks (in the case of the banking sector further),
 - receivables from cash collaterals (in the case of the banking sector further);
- on liabilities side:
 - the stock of current (*loro*) and timely accounts (deposit) of credit institutions and foreign banks (non-residents),
 - the stock of current and timely accounts (deposit) of non-residents other than banks,
 - liabilities arising from repo transactions,
 - the stock of non-residents accounts in bank's brokerage houses,
 - liabilities from cash collateral (except initial margins for financial derivatives).

Other assets and liabilities

Other assets and liabilities cover data on assets and liabilities other than loans, debt securities, trade credit and advances, currency and deposits. To this item are recognized among other states receivables and payables, which include:

- on the assets side: e.g. receivables from share in profits or dividend which were declared but not paid out yet or not converted into some other financial instrument; funds deposited on current accounts with other institutions, i.e. other than foreign banks and credit institutions; receivables from repayable margin deposits (original deposits) for financial derivatives;

- on the liabilities side: e.g. dividends which were declared but not paid out yet or not converted into some other financial instrument); receivables from repayable margin deposits (original deposits) for financial derivatives.

Insurance technical reserves

Financial assets of policy holders or beneficiaries and liabilities of insurers, pension funds, or issuers of standardized guarantees.

Special drawing rights (SDR) allocations

This item covers the allocation of SDRs, with a corresponding entry under SDRs in reserve assets.

Specific features of data collection

Information on the assets and liabilities from other investments come from:

- reports received directly from Polish entities;
- financial agents of the government (the NBP and Bank Gospodarstwa Krajowego);
- the accounting system of NBP.

5.4.2.6.5. Reserve assets

Definition

Reserve assets are those external assets that are readily available to and controlled by Narodowy Bank Polski. These assets can be used for meeting balance of payments financing needs, for intervention in exchange markets to affect the currency exchange rate and for other activities of the monetary authorities (such as maintaining confidence in the currency and the economy).

Reserve assets comprise:

- monetary gold, valued on the balance sheet date at the average market price;
- special drawing rights (SDRs);
- reserve position in the International Monetary Fund;
- other reserve assets (cash, currency and deposits, reserve repo and securities issued by nonresidents in convertible currency), including:
 - currency and deposits held in foreign banks, valued on the balance sheet date on the accrual basis,
 - securities issued by foreign entities – quoted at the liquid market, valued on the balance-sheet day according to average market price,
 - receivables under reverse repo (purchase of securities under repurchase agreements) – valued according to the amount receivable on the balance-sheet day,

- foreign currencies held in NBP vaults – valued on the balance-sheet day according to nominal value.

Specific features of data collection

Data on reserve assets are collected based on accounting system of NBP.

5.4.2.7. External debt

Definition

Narodowy Bank Polski reports information on Poland's external debt in accordance with the following definition: "Gross external debt, at any given time, is the outstanding amount of those actual current, and not contingent, liabilities that require payment(s) of principal and/or interest by the debtor at some point(s) in the future and that are owed to non-residents by residents of an economy".

The above definition refers to gross debt, i.e. it refers to the particular foreign liabilities of Poland (with no deduction of Polish assets abroad). The external debt obligations are taken into account only existing and unregulated (creditor must have a claim against the debtor). External debt covers the entire range of debt instruments, regardless of how they are constructed. Debts are usually carried out by providing economic value, i.e. a financial or non-financial assets (including commodities) by the debtor to the creditor usually under a contract that specifies the terms and conditions of repayment.

The distinction between domestic and external (foreign) debt is based solely on the criterion of residence, regardless of the currency involved.

The following debt instrument have been included in the concept of external debt:

- currency and deposits held by non-residents at Polish banks;
- debt securities held by foreign portfolio investors;
- trade credits;
- other loans and credits (including financial leases);
- insurance technical reserves;
- other foreign liabilities;
- allocations of SDRs.

External debt includes:

- liabilities between residents and non-residents in both the domestic currency and foreign;
- securities issued in foreign markets and the domestic market, purchased by non-residents;
- financial leases with non-residents is treated as a loan and there is also disclosed.

Data on arrears are not separately presented.

Foreign debt does not include any financial liabilities arising from shares held by non-residents and other equity (mutual funds, private equity and reinvested earnings in the framework of direct investments and real estate) and derivative financial instruments.

From the point of view of original maturity of debt instruments they have been divided into:

- long-term (with the original maturity of over one year);
- short-term (with the original maturity of one year or less).

Foreign debt is presented broken down into:

- government and local government;
- Narodowy Bank Polski;
- monetary financial institutions (MFIs);
- other sectors (financial and non-financial entities);
- direct investment.

Specific features of data collection

Information on the liabilities arising from debt instruments are derived:

- with reports received directly from Polish entities;
- from the accounting system of NBP.
