4. Methodological Notes

Table 1. Basic Statistical Data

Information contained in Table 1 is derived from the "Statistical Bulletin" of the Central Statistical Office [GUS]. Definitions of the categories presented in the Table can be found in the GUS publications.

1. Data presented in pts. 1, 2, 6, 7, 10 and 12 comprise national economy entities regardless of their ownership type, i.e. public sector entities (state-owned entities, units of local government and mixed ownership, where public sector entities prevail) and private sector entities.
2. The corporate sector comprises entities, which conduct their economic activities in the fields of: forestry, including the provision of services; marine fishing; mining and quarrying; manufacturing; electricity, water and gas production and supply; construction; wholesale and retail trade; repair of motor vehicles, motorcycles as well as personal and household goods; hotels and restaurants; transport, storage and communication; real estate renting and related business activities, renting machines and equipment without an operator and of personal and household goods; computer and related activities; other business activities; sewage and refuse disposal, sanitation and similar services; recreational, cultural, sporting and other services.
3. According to the Polish Statistical Classification of Economic Activities [PKD], the notion of "industry" applies to the following sections: "mining and quarrying", "manufacturing" and "electricity, gas and water production and supply".
4. Data on the sold production of industry (pt.1), and the construction and assembly production (pt.2) refer to:
 - economic entities with of more than 9 employees.
5. Data on the value of the sold production of industry (pt. 1) and the construction and assembly production (pt. 2) are disclosed net without the due value added tax (VAT) and the excise tax, while they include subsidies for specific purposes to products and services in the so-called base prices.
6. Construction and assembly production data (pt. 2) refer to works performed in Poland by the business entities of the construction sector, i.e. classified under "construction" according to the PKD.
7. Information on the sold production of industry (pt. 1) and the construction assembly production (pt. 2) are disclosed without seasonal adjustments.
8. Data on employed persons includes those employed on a full and part-time basis in the main place of work. Employed persons include: persons employed on the basis of a labour contract; owners and co-owners of units engaged in economic activities including contributing family members; outworkers; agents and persons employed by agents; members of agricultural production. Data presented in the Bulletin does not include private farmers or employees of budget entities conducting activity within the scope of national defence and public safety.
9. The unemployment rate (pt. 9) denotes the proportion of the registered unemployed to the professionally active civilian population. Data on the registered unemployment rate are presented after taking into account the verified number of persons employed in private farms, which is a component of the professionally active civilian population. The verification of the number of the employed was done on the basis of the results of the National Population and Housing Census 2002 and the National Agricultural Census 2002.
10. Revenues from privatisation do not constitute the current revenues of the state budget; instead they finance the budget deficit (pt. 11).
11. Financial performance of non-financial corporations (pt. 12) concerns economic entities which keep account books and are obliged to prepare statements on their revenues, costs and financial results on a quarterly basis; however, the data for all types of economic activities applies to the entities with a number of employees exceeding 49.

Table 2. Financial Market – Basic Information

Information comprised in Table 2 has been derived from the National Bank of Poland (save for the data in pt. 6, supplied by the Warsaw Stock Exchange).

1. Interest rates in Table 2 are presented on an annual basis at the level which was binding on the last day of a given month. The average monthly interest rate has been given only for the weighted average yield on purchased T-bills or the NBP money-market bills.
2. Two interest rates are shown in one column (pt. 1, col. 3 – interest rate on refinancing loan) means that the first interest rate refers to the refinancing loan for financing central investment projects which have a State Treasury guarantee. It is equal to the lombard rate. The other rate, which is higher by 1 percentage point, refers to other refinancing loans.
3. As of 1 December 2001, the NBP introduced the Central Bank deposit rate (pt. 1 col. 4). This rate sets the price offered by the Central Bank to commercial banks for short-term deposits.
4. Total reserve requirements (pt. 2, col. 1) pertain to the volumes declared by banks and binding on the last day of the month. Since 28 February 2002, the total reserve requirements are held exclusively on the NBP accounts.
5. Information on treasury bill tenders (pt. 3, except for the stocks of bills in circulation at the end of the month – col. 50) comprises data from tenders conducted within one month. The average yield on bills purchased is weighted by the share of the sales of bills with different maturities in the total value of bills purchased. The stock of bills in circulation at month end has been determined on the basis of the agreed maturity, calculated from the day after the tender which resulted in the sale of the bill. The above stock does not include bills in circulation which do not stem from tenders.
6. Information on tenders for the NBP money-market bills (pt. 4, except for the stock of bills in circulation at month end – col. 86) comprises data from tenders conducted within one month. The average yield on bills purchased is weighted by the share of the sales of bills with different maturities in the total value of bills purchased.
7. Information on the results of the trading sessions on the Warsaw Stock Exchange (pt. 6) is disclosed on the basis of the Warset stock exchange system introduced in November 2000. To assure data comparability, the data for the period from January to November 2000 has been recalculated. The National bank of Poland has no available recalculated data for 1999.
8. The Warsaw Stock Exchange Index [WIG Index] and the Warsaw Parallel Market Index [WIRR Index] are calculated by a so-called capital formula, which reflects the percentage changes in the market value of listed companies. The market value of all primary market companies for the WIG Index and the parallel market companies for the WIRR Index (stock capitalisation) is calculated at each session and compared to the value in the preceding sessions. It has been assumed that the base values of the WIG Index at the first WSE session held on 16 April 1991 and the WIRR Index from the end of 1994 were equal to 1,000 points.
9. The indices comprise companies from all the quotation markets.
10. Capitalization refers only to domestic companies.
11. The P/E ratio shows the relation of the market price to net earnings and is calculated as a quotient of the total market value of companies at month end to their aggregated profits and losses generated within the last 4 quarters, for which financial data are available.
12. The turnover ratio shows the relation between the value of sold shares to the average value of shares quoted in a given month.
13. The monthly turnover value and the turnover ratio comprise the continuous quotation and fixing.

Table 3. PLN/USD and PLN/EUR daily exchange rates

The information has been based on the data of the National Bank of Poland.

1. The NBP average exchange rate is the official exchange rate used for statistical and accounting purposes.
2. The average PLN/USD and PLN/EUR exchange rates and the USD/EUR ratio were calculated as the arithmetic average of the NBP average exchange rates for a month (based on daily exchange rates).

EXPLANATIONS TO THE CHANGES IN THE METHODOLOGY

We hereby announce that the NBP, striving for harmonization of data within ESBC, is to publish monetary aggregates for January 2005, basing on the data received from MFIs sector. Effective from January 2005 this sector comprises Polish banks, branches of foreign credit institutions having their registered office in Poland, branches of foreign banks (save from banks in liquidation, under bankruptcy procedure or under development) and credit unions (SKOK).

The hereinabove notes refer to tables: 8;9; 9.1; 9.2; 10; 11;12 and time series without seasonal adjustment.

SECTORAL CLASSIFICATION

- **financial sector** – comprises the following sub-sectors:
 - monetary financial institutions¹ (including the central bank and other monetary financial institutions). *In Poland, the concept of other monetary financial institutions applies to banks from January 2005 credit unions (SKOK) and money market funds;*
 - insurance corporations and pension funds;
 - other financial intermediaries (including SKOK [Co-operative Saving and Credit Unions] to December 2004, financial leasing companies, factoring companies, brokerage offices, investment funds and financial companies created for securitization);
 - financial auxiliaries (including bureaux de change, bourses, hire purchase institutions);
- **non-financial sector** – comprises the following sub-sectors:
 - state-owned corporations;
 - private corporations and co-operatives;
 - individual entrepreneurs²;
 - farmers;
 - individuals;
 - non-profit institutions serving households.

In the publications of the National Bank of Poland, claims and liabilities of banks to the non-financial sector will be presented in accordance with the EU standards, i.e. sub-divided into three sectors:

- *households* – comprising:

¹ In accordance with the ECB definition, monetary financial institutions (MFIs) comprise financial institutions whose business is to receive deposits and/or close substitutes for deposits from entities other than MFIs and, for their own account, to grant credits and/or to make investments in securities.

² Natural persons conducting business activities on their own account, with a maximum of 9 employees.

- individuals;
- farmers;
- individual entrepreneurs (natural persons conducting business activities on their own account, with a maximum of 9 employees);
- *non-financial corporations* – comprising:
 - state-owned corporations;
 - private corporations and co-operatives (including: individual entrepreneurs with more than 9 employees);
 - *non-profit institutions serving households*: (separate legal entities, which serve households. Their principal resources, apart from those derived from occasional sales, are derived from voluntary contributions in cash or in kind from households, from payments made by general governments and from property income);
- **general government** – comprises the following sub-sectors:
 - central government (including public governing bodies, government administration bodies, state control and law protection bodies, courts and tribunals, state universities, state institutions of culture and welfare, etc.);
 - local government (including local administrative offices [at gmina and powiat level], local parliaments, public elementary schools, institutions of culture financed by local governments, welfare institutions, etc.);
 - social security funds (comprise the Social Insurance Institution and the Agricultural Social Insurance Fund and the funds they manage, and the healthcare funds).

Table A. Monetary aggregates

Currency in circulation (excluding vault cash)	Overnight deposits and other liabilities	M1	Deposits and other liabilities with agreed maturity up to 2 years and blocked deposits	M2	Repurchase agreements	M3
	Households		Households			
	Non-monetary financial institutions		Non-monetary financial institutions			
	Non-financial corporations		Non-financial corporations			
	Non-profit institutions serving households		Non-profit institutions serving households			
	Local government		Local government			
	Social security funds		Social security funds			
			Deposits redeemable at notice up to 3 months			
					Debt securities issued with maturity up to 2 years	

Table 4. Weighted interest rates on zloty deposit offered by commercial banks

Weighted interest rates are calculated on the basis of data derived from 11 commercial banks, i.e.:

- Powszechna Kasa Oszczędności – Bank Polski SA,
- Bank Handlowy w Warszawie SA,
- ING Bank Śląski SA,
- Bank BPH SA,
- Bank Zachodni WBK SA,
- BRE Bank SA,
- Bank Millennium SA,
- Bank Polska Kasa Opieki SA,
- Kredyt Bank SA,
- Bank Gospodarki Żywnościowej SA,
- Raiffeisen Bank Polska SA.

These banks, in the case of residents, held 79.7% of household zloty deposits and 76.0% of corporate zloty deposits as at the end of December 2004.

Interest rates offered by banks are derived from the monthly reporting to the NBP as of the last day of each reporting month. Interest rates are disclosed on an annual basis, without capitalisation. Banks supply interest rates of a product with the highest share in a given item category. In the calculations, floating interest rates have been given a priority. Fixed interest rates are taken into account only when floating interest rates are not available. Banks which do not offer any products in a given category have not been included in the calculation.

Table 5. Weighted average interest rates on zloty loans offered by commercial banks

General rules for their calculation are the same as for zloty deposits presented in Table 4 and they refer to the same group of banks. Their share in the zloty loans to non-financial corporations was equal to 73.6% and 58.9% for loans extended to households. As a rule, interest rates offered to the clients with the highest creditworthiness are included in the reports sent to the NBP.

Table 6. Weighted average interest rates of foreign currency deposits and loans in commercial banks

General rules for calculation are similar to those in the Tables 4 and 5 and they refer to the same group of banks. As at the end of December 2004, the group of banks for which calculations were made gained a 74,4% share in the foreign currency loans market and a 89,0% share in the foreign currency deposits market.

General comments on Tables 8, 9, 10

1. The figures refer to the end of each reporting month and have been derived from balance sheets received from the banks within the framework of the "Banking Reporting Information system (BIS)" and from the balance sheet of the National Bank of Poland and credit unions (SKOK).

2. The presentation is structured in accordance with the ECB standards.
3. Assets in Tables 8, 9 and 10 are shown gross of provisions, accumulated depreciation and write downs (except for securities presented at a market price).
4. Apart from external assets/liabilities and capital and reserves, all categories reflect operations with residents.

Table 8. Balance Sheet of the National Bank of Poland – Assets and Liabilities

1. The item **credits, loans and other claims to domestic residents** (assets col. 1) comprises receivables from granted loans, including rediscount, lombard, refinancing for central investments, loans granted from foreign credit facilities, open market operations, other loans and receivables from deposits as well as interest due on the above-listed operations.
2. Debt securities issued by domestic residents (assets col. 5) are securities held by the National Bank of Poland.
3. **Securities and other shares and other equity issued by domestic residents** (assets col. 8) – at the moment in the case of the NBP they include only fixed financial assets (equity).
4. **External assets** (assets col. 11) include all assets of non-residents denominated in zloty and foreign currencies.
5. **Fixed assets** (assets col. 12) include total fixed assets except for financial fixed assets.
6. **Other assets** (assets col. 13) include interest not due on the above-listed operations, deferred costs, inter-branch settlements and other assets excluding fixed assets.
7. **Deposits of domestic residents** (liabilities col. 2) represent liabilities on overnight deposits, deposits with agreed maturity, reserve requirements, auction deposits (open market operations), separated funds and other deposits.
8. **Debt securities issued** (liabilities col. 6) represent liabilities on the NBP debt securities issued by the NBP.
9. **Capital and reserves** (liabilities col. 7) in the case of the NBP it comprises equity i.e. authorised capital, as well as reserve fund and provisions, which include specific provisions, accumulated depreciation and valuation allowances.
10. **External liabilities** (liabilities col. 10) include all liabilities of non-residents denominated in zloty and foreign currencies.
11. **Other liabilities** (liabilities col. 11) include interest on the above-mentioned categories of liabilities, deferred income, inter and intra-MFI settlements, other liabilities and financial performance.

Table 9. Aggregated Balance Sheet of Other Monetary Financial Institutions – Assets and Liabilities

1. **Credits, loans and other claims to domestic residents** (assets col. 1) include current accounts, reserve requirements, open market operations, deposits, loans and credits, debt purchased, realised guarantees and sureties, other claims, interest due and claims on securities purchased under repurchase agreements.
2. Debt securities issued by domestic residents (assets col. 5) held by other monetary financial institutions.
3. **Securities and other shares and other equity issued by domestic residents** (assets col. 9) include shares, investment fund participation units, investment certificates and fixed financial assets (shares).

4. **External assets** (assets col. 12) include all assets of non-residents denominated in zloty and foreign currencies.
5. **Fixed assets** (assets col. 13) include total fixed assets except for financial fixed assets.
6. **Other assets** (assets col. 14) include vault cash i.e. cash and other cash equivalents held at other monetary financial institutions, as well as other claims and interest not due from all sectors, settlement accounts, claims on various debtors, deferred income and expenditure, other financial assets, rights issue, other assets, other operations, interest on securities purchased under repurchase agreement.
7. **Deposits and other liabilities to domestic residents** (liabilities col. 1) represent overnight deposits, deposits with agreed maturities, blocked deposits, deposits redeemable at notice, received credit and loans, including refinancing, auction (open market operations) and claims from cash collateral (classified to "with agreed maturities"), other liabilities and claims on repurchase agreements.
8. **Debt securities issued** (liabilities col. 9) are liabilities on own debt securities issued by other monetary financial institutions.
9. **Capital and reserves** (liabilities col. 10) are divided into: a) core fund comprising share paid-in capital, called-up capital unpaid, own shares, accumulated reserves, general risk provisions, reserve capital and retained earnings, b) supplementary funds i.e. revaluation reserves and other supplementary funds specified in the resolution of the Commission for Banking Supervision (assigned both to residents and non-residents), c) provisions, including specific provisions, impairment allowances, mortgage notes reserves (resident, non-resident), specific provisions for off-balance liabilities (resident, non-resident), general risk provisions (resident, non-resident).
10. **External liabilities** (liabilities col. 14) include all liabilities of non-residents denominated in zloty and foreign currencies, except for reserves included in point 9, which comprise residents and non-residents.
11. **Other liabilities** (liabilities col. 15) include interest on the above-mentioned liabilities, settlement accounts, liabilities to creditors, deferred income and expenditure, suspended revenue, other liabilities from financial instruments, other liabilities, exchange rate fluctuations resulting from the conversion of subordinated liabilities, reserves for risk and expenditures not associated with the basic activities of the reporting bank, subordinated liabilities, other operations, interest on subordinated liabilities, profit/loss during approval procedures, current year profit/loss.

Table 9.1. Credits, loans and other claims to domestic residents – households and non-financial corporations

Table 9.1. includes detailed breakdowns into two key sub-sectors (*households* – with specified *individuals* - and *non-financial corporations*) grouped under "Other domestic sectors" presented in col. 4 – assets (loans and other claims on other domestic sectors) of Table 9 "Aggregated balance sheet of other monetary financial institutions".

As at the end of December 2004, *households and non-financial corporations* amounted to 95.9% of the assets disclosed in col. 4 Table 9.

Table 9.2. Deposits and other liabilities – households and non-financial corporations

Table 9.2. includes detailed breakdowns into two key sub-sectors (*households* – with specified *individuals* - and *non-financial corporations*) grouped under "Other domestic sectors" presented in col. 4 – liabilities (deposits and other liabilities to other domestic sectors) of Table 9 "Aggregated balance sheet of other monetary financial institutions".

As at the end of December 2004, *households and non-financial corporations* amounted to 87.8% of the liabilities disclosed in col. 4 Table 9.

**Table 10. Consolidated Balance Sheet of Monetary Financial Institutions
– Assets and Liabilities.**

1. Table 10 comprises a consolidated balance sheet of monetary financial institutions (Commercial Banks, NBP, credit unions, branches of foreign banks, branches of foreign credit institutions having their registered office in Poland).
2. In the assets and liabilities of the above-mentioned balance sheet, domestic inter-MFI operations have been netted out.
3. Other assets (assets col. 10) and currency in circulation (liabilities col. 1) were decreased by cash in vaults of other monetary financial institutions.

**Tables 13, 13.1, 13.2, 13.3, 13.4 i 13.5
The system of balance of payments statistics in Poland**

Institutional aspects

Introduction

Narodowy Bank Polski, the National Bank of Poland (NBP), is statutorily responsible for compiling and publishing Poland's balance of payments (b.o.p.) and related statistics (e.g. the international investment position (i.i.p.), external debt, foreign direct investment (FDI), reserve assets).

Legislative provisions

According to the Act on the National Bank of Poland of 29 August 1997, as published in the *Dziennik Ustaw* (Journal of Laws) of 1997, No. 140, Item 938, the NBP is obliged to compile the b.o.p. and the i.i.p. and to report thereon to the Parliament and the Council of Ministers.

The reporting obligations of domestic entities have been defined by the Act on the National Bank of Poland and the Foreign Exchange Act (*Prawo dewizowe*), published in the Journal of Laws of 2002, No. 141, Item 1178, as well as by other legal acts, namely (i) the Regulation of the Council of Ministers dated 10 December 2002 regarding the method, scope and date of providing data by residents involved in the foreign exchange to the National Bank of Poland for compiling the b.o.p. and the i.i.p. statistics as published in the Journal of Laws of 2002 No. 218, Item 1835 and (ii) the Resolution of the NBP's Management Board no. 48 dated 14 November 2003 on the procedures and detailed rules for transmitting indispensable data from banks to the National Bank of Poland for compiling the b.o.p. and the i.i.p. statistics, as published in the Official Journal of the NBP (*Dziennik Urzędowy NBP*) dated 8 December 2003, No. 21.

In cases of non-compliance with legal requirements sanctions are imposed on non-reporting agents in the form of a fine that is regulated by the Penal and Fiscal Code (*Kodeks Karny Skarbowy*), as published in the Journal of Laws of 1999, No. 83, Item 930.

External co-operation

The NBP co-operates with domestic organisations (mainly the Central Statistical Office (CSO) and the Ministry of Finance (MoF)) and foreign institutions in the exchange of data and other tasks related to b.o.p. statistics.

Several institutions provide the NBP with additional information on certain b.o.p. items. The CSO transfers to the NBP data on foreign trade in accordance with the methodology drawn up by

both institutions. Data regarding foreign trade turnover of goods and services are used by the CSO for the compilation of the account for the rest of the world (ROW) in the National Accounts Statistics (GDP). The CSO also supplies the NBP with data on securities held by non-residents and registered at Polish brokerage houses (Security and Derivative Dealers SDDs). Additionally, the NBP obtains from the CSO information necessary for updating the register of entities conducting operations registered in the balance of payments.

The MoF, indirectly and through the financial agents of the government, supplies the NBP with data on external transactions of the government sector.

The Polish Securities and Exchange Commission is a source of information on non-residents shares in Polish public companies.

The Institute of Tourism collects and provides the NBP with data on foreign travels (both of Poles and of foreigners).

In compiling the b.o.p. methodology the NBP is co-operating with international institutions such as: the European Central Bank (ECB), the Eurostat, the International Monetary Fund (IMF), the Organisation for Economic Co-operation and Development (OECD) and the World Bank.

Users

Data on the balance of payments (b.o.p.), the international investment position (i.i.p.), the external debt, the official reserve assets, the international reserves and foreign currency liquidity are published on the NBP's website and are thus made available to all users.

Moreover, b.o.p. data and descriptions are forwarded to the Parliament, the Government, the CSO and to the public and private research institutes, universities, rating agencies, etc. Analyses describing the b.o.p. are also published on the NBP website.

Data on b.o.p. statistics, the i.i.p. and foreign direct investment are regularly supplied to the ECB, the European Commission (Eurostat), the IMF, the OECD and the World Bank.

Statistical system

Type of collection system³

The system of b.o.p. compilation in Poland is mixed.

A considerable piece of information is derived from a closed system of data collection on transactions settled by the Polish banking system. The banks send the NBP information on transactions, both their own and those conducted on behalf of their clients. This information is sent to the NBP every month.

Data from banks are supplemented with information derived directly from non-financial corporations and from public statistics research. Information gathered directly from non-financial corporations comprises: services, loans, portfolio investment (quarterly), direct investment (annually). Public statistics data, utilised in the b.o.p., comprise trade turnover (from national accounts compiled by the Central Statistical Office) and foreign travels compiled by the Institute of Tourism.

In the case of data derived directly from non-financial corporations, reporting thresholds have been applied, so as the burden imposed on the reporting agents would not be too big, and simultaneously the correct quality of data could be retained.

Geographical breakdown is currently possible only for selected items; nevertheless it is going to be gradually expanded to the other components of the b.o.p.

³ The compilation systems of the b.o.p. are divided into: closed ones (in which all transactions are collected as well as stocks and turnovers have to be equal to changes in stocks); open ones (in which some transactions are collected) and mixed (in which one part is a closed system which is supplemented by other information).

In the case of the financial account data on transactions are verified by means of available information on the stocks of foreign assets and liabilities. Moreover, other sources of data are used for verification, such as: securities databases, the Central Register of Treasury bills, and data on privatization, the Internet and information from the press.

Reporting agents

The National Bank of Poland provides all information on its own transactions (including reserve assets), as well as on transactions conducted upon the instructions issued by the government.

Monetary financial institutions are obliged to submit to the NBP data on their cross-border transactions. They also submit data on transactions conducted by the clients of the banks settled by the Polish banking system.

The Ministry of Finance, directly and through the government's financial agents, submits information on foreign transactions, conducted both by the central and the local governments.

In the case of other sectors data are derived from banks or directly from non-financial corporations (mainly in the financial account and in services) or they are collected by external institutions (the CSO for goods, and the Institute of Tourism for foreign travels).

* * *

Pursuant to the requirements of the European Union transactions with a value below EUR 12 500 do not have a statistical classification.

In the case of advanced payments received or given for goods and services (trade credits) a statistical requirement is created when at the end of the reporting quarter their value equalled or was higher than PLN 400 000.

For foreign direct investment in Poland the reporting threshold equals PLN 100,000. In the case of Polish direct investment abroad this threshold amounts to EUR 10,000.

Foreign lending/borrowing is reported when its value surpasses EUR 10,000, for the amount above EUR 10,000 but below EUR 1,000,000 a simplified reporting procedure is applied.

A reporting obligation for owners of foreign securities arises when the value of investment exceeds EUR 10,000. For financial derivatives a financial threshold has been applied amounting to EUR 100,000.

Availability of data

The monthly b.o.p. is published 30 working days after the end of the reference period. and distributed three months after the reference quarter. An advance release calendar is available on the NBP's website (<http://www.nbp.pl>).

Data are also controlled on an aggregated level through an analysis of the time series for individual components

Data on financial flows are compared with data on stocks of foreign assets and liabilities.

Furthermore, received data are cross-checked with other sources e.g. money and banking statistics, database of the Central Register of Treasury bills, database on securities, the Internet, information from the press, data on privatisation etc.

Control of data

At the level of individual information, the data are checked for errors by means of an automatic procedure for the data sent by file transfer and on a PC for data sent in paper form.

The data are also controlled at an aggregated level for validation of classification errors as well as for an evaluation of time series for specific items.

Flow data are reconciled with relevant stocks.

The data are cross-checked with other sources, e.g. information on relevant stocks from b.o.p and monetary statistics, securities databases, the internet, commercial data providers and press information, data on privatisation, etc.

Revision policy

Quarterly b.o.p. data:

- first revision is made when data for the following quarter become available;
- further revisions are made by the end-March and end-September, and then simultaneously with the revision of the i.i.p. data for the corresponding year.

Monthly b.o.p. data:

- first revision is made when data for the following month become available;
- further revisions are made when data referring to the corresponding quarterly b.o.p. becomes available or is revised.

Publications

The data on the b.o.p. the international investment position (i.i.p.), the external debt, the official reserve assets, are released simultaneously to all interested parties by posting them on the NBP's website (<http://www.nbp.pl>). Publishing timetables are available on the website.

More detailed data on the b.o.p., the i.i.p., the external debt, are published as separate publications by the NBP.

The titles of the publications are:

- *Bilans płatniczy Rzeczypospolitej Polskiej* (Balance of Payments of the Republic of Poland) – on a quarterly basis;
- *Zagraniczne inwestycje bezpośrednie w Polsce* (Foreign Direct Investment in Poland) – on an annual basis;
- *Polskie inwestycje bezpośrednie za granicą* (Polish Direct Investment Abroad) – on an annual basis.

The titles of other publications produced by the NBP that include information on b.o.p. statistics are:

- Preliminary Information – on a monthly basis;
- Information Bulletin – on a monthly basis;
- NBP Annual Report – on an annual basis.

Goods

Definition

Trade in goods item of the balance of payments includes the value of exchange of goods with foreign countries which comprises transactions between residents and non-residents:

- transactions, which resulted in the change of the ownership of goods; these are mainly the transactions of purchase and sale of goods, the change of the ownership of goods may also result from their free-of-charge transfer (donations, aid in kind), as well as the in-kind contributions brought by foreign investors or in the form of financial lease of goods (means of transport, machinery and equipment),
- transactions involving processing; this trade is presented in the balance of payments by its gross value i.e. the value of goods for further processing, whereas upon the further processing, the sum of value of goods for further processing and the value of further processing service, i.e. processing of those goods,
- transactions concerning repairs on goods (as a net value of the repair).

The trade in goods does not include the transactions of purchase and sale of monetary gold executed between central banks. The purchase and sale of monetary gold is shown as a reserve assets item.

Specific features of data collection

The main source of data on goods in the Polish balance of payments is foreign trade statistics (FTS) compiled by the CSO on the basis of customs statistics (data from Single Administrative Documents, SAD); these data are published by the Central Statistical Office under the foreign trade item.

Due to the fact that the effective international methodological requirements (standards) are nearly the same⁴ in case of compilation of trade in goods with foreign countries for the balance of payments and for the national accounts purposes, the NBP and the CSO agreed on the principles of transition from the foreign trade data in the FTS into the trade in goods data in the balance of payments. In order to obtain the relevant data, the following corrections must be made:

- the data on foreign trade should be increased by the net value of effected repairs in the trade in goods with foreign countries (the value of the invoiced repairs, excluding the value of goods subject to repair);
- the foreign trade data should be decreased by the value of goods included in the balance of payments and in the national accounts to the value of the trade in services with foreign countries (these include the goods transferred by tourists and the deliveries of goods effected under the construction contracts);
- the decrease in the data of foreign trade on the import side by the value of the costs of transport included in the invoices drawn upon the CIF basis;
- additional valuation of the trade in goods of those goods which were not registered in the SAD documents.

Additional valuation of the trade in goods with foreign countries, made for the balance of payments and for the national accounts relates to the turnover which was not registered in the SAD customs clearance documents. It concerns two groups of goods: 1) goods transported by tourists (in tourist traffic), which were purchased for resale and 2) other goods transported across the border without the SAD documents being filled in (these include mainly the exported goods transferred abroad in bigger quantities without the SAD documents, such as vegetables, fruit, furniture, footwear, clothing).

Deviations from the definition

Contrary to the international standards, some transactions of further processing trade include:

- transactions, whereby the goods for processing were purchased by a Polish entity performing the processing (these transactions should be classified under the general trade),
- transactions, whereby the goods for further processing in Poland were transported to a third country, other than the country entrusting goods for processing (the value of processing transactions should be presented under the trade in services and the trade in goods should be decreased respectively).

Services

Definition

Transport services include the services related to the transport of goods (freight), transport of passengers and other services connected with the above mentioned transport services, e.g. loading and unloading of containers, storage and warehousing, packaging and repackaging, towing and traffic control, maintenance and cleaning of the equipment, rescue operations.

⁴ The international standards were defined in the following publications: *Balance of payments Manual*, 5th edition, 1993, International Monetary Fund, *Balance of payments Vademecum*, Eurostat, 2003, *European Union balance of payments/international investment position statistical methods*, European Central Bank, 2003, *System of National Accounts*, 1993, Inter-Secretariat Working Group on National Accounts, *European System of Accounts ESA* 1995, Eurostat, 1996.

The trade in services concerning **foreign travel** applies to the non-residents' expenditure in Poland and the expenditure of Poles incurred abroad due to travelling. This category includes expenditure for accommodation, food and receiving services, as well as goods purchased by tourists for their own needs (whereas objects purchased for resale are classified as goods). Depending on the objective of travel, the aforementioned expenditures are classified as business travel (including travels of the seasonal and cross-border employees and other business travels) and private travels (for health, study and other reasons).

In addition to the transport services and foreign travel, there is a third type of services – **other services**. The current turnover in this category comprises a number of transactions related to communication, construction, insurance, finance, information technology, patent fees, royalties and licence fees, other services to non-financial corporations (e.g. intermediation in international trade, trade related commissions, operational lease and other services to non-financial corporations), cultural and recreational services, as well as services rendered by the public administration.

Generally, credit includes the value of services rendered by residents to non-residents, whereas debit includes the value of services rendered by non-residents to residents. However, pursuant to international standards, some services are presented in the balance of payments in a special way. Thus, the construction services are divided into services rendered abroad (debit includes the costs of those services, which are incurred by non-residents) and the ones performed at home (credit includes the costs of those services, which are incurred by non-residents). Intermediation in international trade is presented on the net basis (credit minus debit), always on the credit side, while the insurance services are expressed as the difference between premiums and claims.

Specific features of data collection

Preliminary data related to turnover in **transport services** come from the banking statistics which mainly registers settlements with non-residents. Therefore, for the needs of the b.o.p. compiled on a transaction basis these data are supplemented with the value of mutual netting of account receivables and account payables between Polish and foreign partners, as well as by the value of services settled through the Polish non-financial corporations' bank accounts held in foreign banks and by the value of services included in the settlements of capital groups' (i.e. so-called "netting").

Furthermore, the value of services related to transport of goods is increased by the value of services resulting from the reclassification of a given part of the value of goods. This refers to the necessity of including the fob-based value of goods in the balance of payments. In the foreign trade statistics (FTS), only the value of export is expressed on the fob basis, whereas the value of imported goods is shown on the **cif** basis. This approach requires a decrease in the value of goods and a reclassification of the transport costs and insurance services to relevant categories of services.

The value of the export of services related to the transport of goods is also increased by the costs of transport rendered by Polish carriers and included in the invoices of trade in goods.

The source of data for the compilation of **foreign travel** in the balance of payments on the transaction basis is the Institute of Tourism.

Information on other services is mainly derived from statistics provided by banks and from reports received from non-financial corporations involved in the trade in services with non-residents.

Gaps

In the above described procedure of increasing the value of **transport services** by the adjustments of trade in goods resulting from the transfer from the **cif** base to the **fob** one, all services are classified as transport services, while insurance services are not adjusted separately.

Estimation methods

The estimates relate to the following indicators:

- transfer from the **cif** base to the **fob** one in the area of import of goods included in the FTS,
- share of the transport costs in payments for the export of goods executed by Polish carriers,
- share of individual types of costs (according to the means of transport) in the above mentioned estimated values.

Income

Specific features of data collection and definitions

Compensation of employees. Compensation of employees comprises foreign transfers arising from compensation of employees i.e. non-residents employed in Poland and Poles employed abroad.

Foreign transfers related to the compensation of employees, which is executed via Polish banks by foreign employers (income: credit) or Polish employers (income: debit) are the principal source of information. Furthermore, the data on the balance of payments on a transaction basis comprise on the debit side, payments of wages and salaries to non-residents executed via Polish non-financial corporations' bank accounts held in banks abroad.

Direct investment income. Income on capital and on receivables is the source of income on direct investment. Income on capital comprises dividends attributable to a direct investor and declared for a given reporting year (in public companies), share in profit (in limited liability companies), transferred profits of branches and reinvested profits (loss per direct investor is treated as negative reinvested income). Income on receivables are included in the balance of interest (paid, accrued and due) on loans extended and obtained by direct investors.

Data on income on direct investment resulting from payments executed via the Polish banks, i.e. dividends and interest paid are supplemented by information received directly from residents within the framework of non-banking statistics. The data comprise also estimated reinvested income, which since 1996 has been presented as net reinvested income, i.e. excluding loss, in accordance with the OECD recommendations.

Portfolio investment income. The source of information on the income on portfolio investment comprised in the balance of payments consists of data derived from the banking system and the National Bank of Poland. These data are presented in the breakdown by security type (equity securities, debt securities, money market instruments) and by sector of resident paying or receiving the revenue (the NBP, general government, banks, other sectors). In the case of profit on equity securities, only dividends are registered in the income category. All other profits or losses on equity securities (especially profit or loss resulting from the difference between purchase price and the price at which a given security was sold) are registered on the financial account of the balance of payments, in the „portfolio investment” category.

Since data on payments are the source of information for debt securities, income is not registered on the accrual basis (e.g. accrued interest on zero-coupon bonds).

Other investment income. Income on other investments comprises income on other investments of the financial account. Income on other investments of the financial account comprises: interest on loans extended and obtained, interest on deposits including interest on repos, and other payments related to income on property. Interest comprises interest due: paid and unpaid. Unpaid interest comprises: capitalised, cancelled, converted to zlotys and past due interest. Data on income are gathered on the basis of reports from Polish banks and economic entities holding their bank accounts with banks abroad, as well as receiving and extending loans.

Deviations from the definition. Not all data on income on other foreign investment are registered on an accrual basis. Official reserve assets income is not included in the income on other investment.

Gaps

In compiling this position of the balance of payments the inflows generated by the wages and salaries of Poles working abroad are undervalued, as these do not comprise incoming foreign transfers executed via foreign currency accounts. Since it is difficult to determine for how long a given employee will be working abroad, a simplified principle was adopted in the presentation of the Polish balance of payments. According to this principle the transfers related to wages and salaries made by the employer are evidenced in the Income item, while the transfers made directly by the employees, including cash declared at the border, are evidenced in the *Current transfers item*.

Current transfers

Definition

Current transfers are defined in the balance of payments as one-way transactions, such as donations, free-of-charge export and import of goods and services under international aid schemes, which are not accompanied by a change in external assets or liabilities. Transfers are executed, both in cash and in kind, in favour of government institutions or other sectors (private).

Funds received or paid by the Polish government sector constitute **government transfers**⁵. These are the funds received from the European Union institutions, countries and international organisations, as well as funds paid out to these institutions and countries to finance current expenditure by the government – such as humanitarian aid, medicines, training, etc. These include also membership fees and payments to the EU and international organisations outside the EU. This category comprises also taxes and payments made by non-residents for the Polish government sector. Revenue from obligatory social insurance contributions and retirement pays and pensions paid by the Social Insurance Institution (ZUS) to non-residents, and payments related to indemnity paid by the government to non-residents constitute other government transfers.

Private transfers (of other sectors) comprises transfers of earnings and other transfers.

Transfers of earnings comprise transfers of wages and salaries of persons working abroad and considered to be residents of the country for which they work. Pursuant to the IMF recommendations, a person staying or intending to stay for a year or longer on the territory of a given country is a resident of that country. In such a case, funds transferred to the person's family are registered in the current transfers as earnings.

The other transfers of the non-government sector include the value of foreign turnover arising from current transfers made by residents – individuals and other national economy entities not included in the government sector. They are made in kind (free-of-charge transfers of goods and services in foreign trade) and in cash. This group of transfers includes the following foreign transactions of Polish entities not included in the government sector:

- donations and aid received from abroad, as well as rendered to non-residents, related to the realisation of non-investment objectives (e.g. humanitarian aid, food, clothing, medicines, training),
- taxes and payments to foreign governments,
- membership fees,
- retirement pays and pensions received by residents from abroad,
- inheritance,
- alimony,
- fines and indemnity (e.g. related to the breach of contracts, product forgery, forgery of trademarks or patents),
- competition and lottery winnings,
- fees for transfers of sportsmen.

Specific features of data collection

The source for compiling the **government transfers** category in the balance of payments is constituted by payments executed via the Polish banking sector, data on imports and exports of goods within the framework of free aid for the government sector registered in the SAD customs statistics, transfers of obligatory social insurance contributions executed via the Polish entities' bank accounts held in banks abroad.

⁷ Central government and local government units.

The primary source of data on **private transfers** is constituted by payments registered by the Polish banking sector, as well as the amounts from the revaluation of the foreign exchange purchase balance. Additionally, the category comprises transfers executed via the Polish entities' bank accounts held in banks abroad.

Gaps

The compilation of this item of the balance of payments shows an overvaluation (overestimation) of credit from transfers of earnings recorded as banking sector payments, as these comprise all incoming foreign transfers of earnings executed via foreign currency accounts. Since it is difficult to determine for how long a given employee will be working abroad, a simplified principle was adopted in the presentation of the Polish balance of payments. According to this principle the transfers related to wages and salaries made by the employer are evidenced in the *Income* item, while the transfers made directly by the employees, including cash declared at the border, are evidenced in the *Transfers* item.

Furthermore, the sum of transfers of earnings, resulting from the revaluation of the foreign exchange purchase balance comprises exclusively the balance of settlements related to this title.

Capital account

Definition

The basic components of the capital account in the balance of payments are capital transfers representing transfers of rights to tangible assets, i.e. donations and funds included in non-returnable grants, specially assigned to fixed assets financing, debt write-offs by the creditor, transfer of funds related to the acquisition or disposal of non-financial and non-produced assets. Capital transfers are compiled separately for the government sector and other sectors.

Capital transfers of the government sector reflect the value of funds received from EU institutions, countries and international organisations, as well as funds transferred by the Polish government to these institutions. Received funds in cash are allocated free-of-charge to financing investment in fixed assets e.g. construction of roads, motorways, bridges, schools, hospitals, etc. The category of capital transfers of the government sector comprises write-offs of receivables, both principal and interest.

Capital transfers of other sectors comprise donations and grants specially assigned to fixed assets financing, which were received from or transferred abroad by non-government units.

Acquisition and disposal of non-produced non-financial assets comprises purchase and sale of patents, copyrights, licenses and trademarks, purchase and sale of land to foreign embassies located in Poland, as well as purchase and sale of land by Polish embassies abroad.

Specific features of data collection

Capital transfers of the **government sector** as well as the **acquisition and disposal of non-produced non-financial assets** are compiled in the balance of payments on the basis of banking statistics data.

Capital transfers of other sectors are calculated on the basis of banking statistics data supplemented with information derived from reports of non-financial corporations which hold their accounts in banks abroad.

Financial account

Definition

The "financial account" comprises financial transactions involving direct investment, portfolio investment, other investment, and financial derivatives.

Direct investment

Definition

The NBP compiles data on direct investment in compliance with the definition formulated by the OECD. The term „direct investment abroad“ denotes an investment made by a resident entity of one economy („direct investor“) in an entity resident in an economy other than that of the investor („direct investment enterprise“) aimed at attaining a long-term profit from the capital involved. The direct investment enterprise denotes an enterprise in which the direct investor owns at least 10% of ordinary shares (i.e. 10% share in equity) or 10% of voting rights at the general meeting of stockholders or shareholders.

The direct investment capital comprises equity capital (stocks or shares), paid in cash or in kind, capital adjustment, reinvested income and other assets and liabilities related to debt between affiliated enterprises (mostly credits extended by investors, the so-called „intercompany loans“).

Reinvested income denotes the part of profits, attributable to a direct investor, which remains in the direct investment enterprise and which is allocated for its further development. As mentioned earlier, pursuant to the OECD and the IMF methodology, as from 1996, the reinvested income has been calculated on a net basis, i.e. after loss deduction.

Since 1996 direct investment made by Polish banks has been included in the category of Polish foreign direct investment.

Since 2002 apart from the two elements, which had occurred since 1999, i.e. the conversion of dividend and the conversion of credits and loans to share in equity, the turnover related to direct investment has comprised another element, namely the conversion of other assets and liabilities comprised in this balance of payments item into share in equity. In the previous years, the conversion of dividends on credits and loans and other assets and liabilities into share in equity was registered exclusively as a change of stocks of those components in the international investment position.

Specific features of data collection

Data on Polish direct investment abroad and foreign direct investment in Poland are compiled on the basis of surveys sent by Polish direct investors and Polish direct investment enterprises.

Up to 2001 the obligation to forward reports related to Polish direct investment abroad affected all residents who held at least 10% of shares in an entity located abroad. Since 2002 this obligation has been imposed only on those residents who have at least 10% of shares in an entity located abroad and the value of this share amounts to at least EUR 10,000. Until 2001 the obligation to submit reports on foreign direct investment in Poland concerned all Polish direct investment enterprises, i.e. enterprises in which foreign direct investors held at least 10% share in core capital. Since 2002 this obligation has been imposed only on the Polish direct investment enterprises in which foreign direct investors held at least 10 % of core capital and the total value of this capital amounted to at least PLN 100,000.

Portfolio investment

Definition

Equity securities comprise all kinds of shares and equity, including investment certificates (shares) of collective investment funds. They also comprise collective investment fund shares and notes of deposit (e.g. ADR or GDR).

Debt securities comprise all kinds of long-term and short-term debt securities including government bonds, corporate bonds, T-bills, short-term corporate debt securities and negotiable certificates of deposit. Debt securities are classified as long-term securities or money market (short-term) instruments on the basis of their original maturities. Long-term debt securities are securities with original maturity of at least one year. All other debt securities are classified as money market instruments (short-term debt securities). Debt securities category comprises also debt securities with embedded financial derivatives (e.g. convertible bonds or callable bonds).

Financial derivatives (i.e. those that constitute a separate financial instrument) are excluded from the portfolio investment category and registered under „Financial derivatives” item – a separate category of the balance of payments. Repo transactions are also excluded from the portfolio investment category and registered in „Other investment” category.

Specific features of data collection

Data on payments reported by the banking system are the source of data on portfolio investments item in the balance of payments. Data on transactions are collected on an aggregated basis. Breakdowns of data by securities issuer sector (on the liabilities side) and securities holder sector (on the assets side) are available.

Deviations from the definition

Data on turnover do not allow for identification of unpaid interest accrued on debt securities (lack of data enabling breakdown of transaction value into the value of securities’ principal and interest).

Planned changes

Works are currently in progress with the aim to construct a system of data collection and processing using the “security-by-security” method, i.e. individually for each emission of securities, in which data on net turnover are calculated on the basis of data on the stocks of portfolio assets and liabilities. The new system will enable the identification of the debt securities’ principal and interest within the framework of transaction data, and consequently, it will be possible to classify correctly the value of unpaid interest accrued on securities which constitute an item of transaction in the “Income” category.

Financial derivatives

Definition

Financial derivatives constitute a separate category in the balance of payments. Definitions used by the NBP are compliant with the IMF recommendations (*Balance of Payments Manual* fifth edition, and *Financial derivatives: A supplement to the Fifth Edition of the Balance of Payments Manual*, 2002) as regards derivatives based on foreign exchange rates. As regards other derivatives, some discrepancies occur between the method employed and the above recommendations.

The “Financial derivatives” category comprises all derivatives with symmetrical risk such as futures, forwards, swaps as well as instruments with unsymmetrical risk such as options. This category comprises also all profits or losses on transactions involving financial derivatives.

Geographic breakdowns are available. The criterion of “the first known contractor” is applied in determining the geographic area of transaction parties.

Specific features of data collection

The Polish banking system is the source of data on financial derivatives item in the balance of payments on the transaction basis.

All financial flows resulting from settlements of transactions involving financial derivatives, except for returnable initial deposits, are registered in the financial derivatives category. Hence the category comprises also collateral deposits and option premiums. Data are registered on a gross basis, the data on foreign currency options being the only exception to this rule. As regards derivatives based on underlying instruments other than exchange rates, the data received from Polish banks do not cover all transactions, especially forwards. Compared with the value of turnover on derivatives other than exchange rates, the value of turnover on the remaining derivatives is very low.

The data are presented only in a breakdown by an underlying instrument type: instruments based on exchange rates and other derivatives.

Deviations from the definition

Statistical codes used for derivatives based on underlying instruments other than exchange rates do not enable the sorting of data in accordance with breakdowns recommended by the ECB and the IMF.

Planned changes

As from January 2004 it was planned to implement a new system of data registration, which enables full reporting for all types of financial derivatives and data collection in breakdowns recommended by the ECB and the IMF.

Other investment

Definition

Other investment comprises all financial transactions that are included in direct investment, portfolio investment or official reserve assets. Other investment comprises: trade credits, credits and loans, current accounts and deposits as well as other assets and liabilities.

Trade credits reflect changes in the stocks of assets and liabilities related to advances extended and deferred payments in imports and exports of goods and services.

Extended and received **credits and loans**, apart from the breakdown into long-term (with original maturity over one year) and short-term (with original maturity up to one year), are registered in a breakdown by the sectors of the economy. Credit turnover comprises not only drawings and repayments of loans in the form of goods and services delivery but also write-offs, interest capitalization, conversion to gold and credit restructuring.

On the assets side the **current accounts and deposits** comprise: balances of transactions effected on the foreign bank accounts (nostro), vault cash, balances of deposits in banks abroad (including the value of repo transactions made by Polish commercial banks). On the liabilities side they comprise: balances of turnover on the accounts of non-resident banks (loro) and on the accounts of non-banks in Polish banks, balances of deposits placed by non-residents in Polish banks (including the value of repo transactions on liabilities side, conducted by Polish commercial banks and the NBP) and balances of transactions conducted by the non-government and non-banking sectors on the accounts held in banks abroad.

The „**other assets**” item shows the increase in outstanding amount arising from unpaid interest and principal instalments on loans extended by the Polish government.

The “**other liabilities**” item shows the increase in outstanding amount arising from unpaid interest and principal instalments on loans taken out by non-financial corporations.

Method of data collection

Data on other investment of the government sector, the banking sector and the NBP are collected on the basis of reports issued by Polish banks. Data on other investment of the non-government and the non-banking sectors are collected on the basis of reports issued by economic entities which hold their bank accounts in banks abroad and receive or extend credits and loans.

Reserve assets

Definition

Official reserve assets comprise transactions with non-residents conducted in convertible currencies and related to: monetary gold, reserve position in the IMF, foreign exchange and other claims.

Official reserve assets comprise the balance of transactions executed by the NBP regarding instruments incorporated in the official reserve assets (including turnover on current accounts and deposits in banks abroad, transactions executed in foreign currencies at the NBP counters, turnover of foreign securities, repos, transactions on financial derivatives and change of the reserve position in the IMF as well as purchase and sale of monetary gold).

Method of data collection

Data on official reserve assets are collected in original currencies, on the basis of the NBP reports. Transactions are registered in market prices.

Table 14. International Investment Position

International investment position (balance of foreign assets and liabilities) presents the balance of Polish assets abroad and of Polish liabilities (to foreign parties). The balance of these assets and liabilities is affected by the volume of transactions recorded in the balance of payments, and also by exchange rate fluctuations, differences in the valuation of assets and liabilities, as well as by other changes. The balance of foreign assets and liabilities was compiled on the basis of data originating from:

- The National Bank of Poland,
- Polish banks performing external settlements,
- Polish enterprises involved in external turnover,
- The Central Statistical Office.

Pursuant to the adjustment of the presentation of Poland's foreign assets and liabilities to the IMF requirements and to the needs of the national accounts system, data are presented in accordance with the standard components of the international investment position.

Poland's foreign assets and liabilities are presented taking by breakdown into the types of financial instruments and the sectors of the national economy.

1. Direct investment

Foreign assets arising from foreign direct investment (FDI) comprise – attributable to Polish shareholders – the balance sheet net value of direct investment enterprises (i.e. the value of equity capital attributable to Polish investors). This capital entails effectively contributed share capital and accumulated reserves, as well as undistributed profits less losses. The balance on foreign assets arising from direct investment includes also loans and advances extended by Polish direct investors to foreign companies, in which they hold shares (so-called "intercompany loans").

Liabilities on foreign direct investment in Poland, comprise the value of Polish direct investors' equity capital, attributable to foreign direct investors, as well as liabilities arising from loans and credits received from those investors. Loans and credits drawn by foreign investors from Polish companies, in which they hold shares, reduce the value of liabilities on foreign investment.

The value of both foreign liabilities and assets arising from direct investment was calculated on the basis of reports prepared by Polish direct investors, as well as of Polish direct investment enterprises.

2. Portfolio investment

Portfolio investment comprises:

- **Polish portfolio investment abroad**, in particular:
 - accounting and statistics on foreign assets of the Polish government sector arising from the USA Treasury bonds, purchased as the required collateral for the agreement with the London Club, is conducted by the Bank Gospodarstwa Krajowego, which acts on behalf of the Government as its payer;
 - data on claims on foreign securities held in Polish banks' portfolios is derived from the balance sheets of banks submitted to the NBP within the framework of the Bank Statistical Information System (BIS);

- reports of Polish brokerage houses intermediating in the turnover on foreign markets, submitted to the Polish Securities and Exchange Commission (KPWiG), are the source of data on the value of equities and shares of Polish non-governmental and non-banking institutions in foreign companies;

- **Foreign portfolio investment in Poland**, in particular:

- Shares of listed companies are registered on investment accounts in brokerage houses or on trust accounts in banks, which are authorised by the Polish Securities and Exchange Commission to operate securities accounts. These securities are traded on the Warsaw Stock Exchange or on the regulated over-the-counter market (Central Quotation Tables – CeTO) through brokerage houses;
- the specification of foreign liabilities on equity securities was drawn up on the basis of data from reports of banks which are authorised by the Polish Securities and Exchange Commission to operate securities accounts for their customers. These banks submit to the NBP their monthly reports on the value of Polish equity securities (broken down into listed and unlisted securities) registered on non-residents accounts. These data were adjusted with the estimated value of shares issued by Polish companies, which are not treated as portfolio investment but rather as a direct investment (over 10% shares in the company's equity). This estimation was based on data issued by the KPWiG and the National Depository for Securities (KDPW);
- quarterly publications of the Central Statistical Office provided another source of data. These comprised the data on the value of liabilities, calculated at market prices, on securities held on non-residents investment accounts in brokerage houses;
- the source of information on the value of liabilities on bonds issued by the Polish Government in foreign markets and purchased by non-residents (Brady bonds and Euro-bonds) was constituted by the Bank Gospodarstwa Krajowego reports (which acts as the payer of the Government) regarding the value of emissions as well as by reports of Polish banks which purchased the above-mentioned bonds on their own account, thereby reducing the value of securities held by non-residents. Data on the value of Treasury bonds, which are issued on the domestic market and purchased by non-residents, originates from reports of brokerage houses, banks operating securities accounts and from the KDPW. These reports are submitted – through the KPWiG – to the Ministry of Finance, which also provides data on the value of local-government bonds purchased by non-residents;
- data on the value of Treasury bills held by non-residents is derived from the Securities Register of the NBP, which records all transactions on T-bills;
- apart from Treasury debt securities, foreign investors also held in their portfolios debt securities issued by Polish commercial banks. The source of data for securities issued in foreign markets and denominated in foreign currencies was constituted by reports submitted within the framework of the BIS systems by banks which issued those securities. The value discussed above was adjusted by the value of those securities purchased in the secondary market by Polish banks, which is also derived from the BIS system, and by the data from the KPWiG on the value of those securities purchased by residents through Polish brokerage houses. Data on debt securities issued by banks on the domestic market are derived from reports submitted to the Domestic Operations Department of the NBP by banks which are money-market dealers;
- companies from the non-banking sector also issued their bonds, which were purchased by non-residents, on foreign markets. Information on those issues is submitted by the issuing companies;
- long- and short-term debt securities of Polish companies (commercial paper) issued on the domestic market constitute another group of Polish debt securities held by non-residents. Data on those securities balances in the portfolios of foreign investors are derived from banks, which are issue underwriters, as well as from the secondary market of individual securities and are submitted to the NBP.

3. *Financial derivatives*

The balance of foreign assets and liabilities does not currently allow the NBP to collect data which, in compliance with the ECB and the IMF standards, would enable the valuation of domestic institutions assets and liabilities to non-residents, resulting from transactions connected with financial derivatives.

Pursuant to the international standards, the valuation of derivatives should be marked-to-market. However, the data currently available do not allow for such a valuation.

4. *Other investment*

Other foreign investment comprises:

Trade credits. Assets and liabilities arising from foreign trade credits include the so-called "company credits", i.e. balances of assets and liabilities arising from extended and received advances and deferred payments in imports and exports of goods and services.

Information on these credits is derived from business organizations.

Other loans and credits. This category comprises assets and liabilities arising from drawn and outstanding foreign loans and advances, excluding trade credits and loans from foreign investors. Trade credits are presented in separate items of foreign assets and liabilities. Loans from foreign investors are shown as a component of direct investment. Since 1999 data on liabilities arising from foreign loans and credits received by the central government sector was supplemented with credit to the local government sector. Data on assets and liabilities arising from loans can credits are derived from:

- the NBP balance sheet;
- the agents who service the Government loans (the NBP and the Bank Gospodarstwa Krajowego);
- the Ministry of Finance for the local government sector;
- balance sheets of the commercial banks;
- business organisations drawing and extending loans and credits.

Currency, current accounts and deposits. In the case of the banking sector, the discussed category of foreign assets and liabilities comprises:

- In the area of foreign assets:
 - balance of funds on current accounts (nostro) and accounts with agreed maturity (deposit) in banks abroad;
 - overdrafts on current accounts of foreign banks (loro) and on current accounts of non-residents other than banks (overdraft facility);
 - claims on securities purchased within repurchase agreements;
 - foreign currency (vault cash);
 - claims on purchased traveller's cheques and bank drafts issued by foreign banks;
 - claims on monetary collateral;
- in the area of foreign liabilities:
 - balance of funds on current accounts (loro) and accounts with agreed maturity (deposit) of foreign banks (non-residents);
 - balance of funds on current accounts and accounts with agreed maturity (deposit) of non-residents other than banks;
 - overdrafts on current accounts of Polish banks in banks abroad;

- liabilities on securities sold within repurchase agreements;
- balance of funds on non-residents' monetary accounts in bank brokerage houses;
- liabilities on monetary collateral.

Assets of non-governmental and non-banking sectors present the balances of funds held on accounts of Polish enterprises in banks abroad.

Information on assets and liabilities arising from cash stocks, current accounts, and deposits is derived from:

- statistical reports of the Polish banks;
- the NBP accounting figures;
- reports of Polish enterprises holding accounts in banks abroad.

Other foreign assets and liabilities. Other foreign assets and liabilities of the central government sector comprise balances of funds on banks accounts, operated in convertible and accounting currencies, and also in transfer roubles, the so-called liquidation accounts. The term "liquidation accounts" means that the balance of funds on those accounts may only decrease, because those accounts are used for settling claims and liabilities generated during the functioning of the COMECON.

Information on the aforementioned accounts originates from the Bank Gospodarstwa Krajowego which – parallelly to the NBP – plays the role of the payments agent of the Polish Government and records all changes in foreign assets and liabilities of the central government sector.

This item comprises also data on arrears, which constitute the assets of the central government sector and on arrears, which constitute the liabilities of the non-governmental and the non-banking sectors.

Other assets include also the balance of Polish enterprises claims arising from clearing operations.

4. Official Reserve Assets

Official reserve assets comprise readily available, liquid foreign assets owned and fully controlled by the National Bank of Poland. These assets may be used for direct financing of the balance of payments deficit or for other policies of the monetary authority which aim to maintain the balance of payments equilibrium.

Official reserve assets comprise:

- monetary gold, priced at the average market price prevailing on the balance-sheet day;
- special drawing rights (SDR);
- reserve position in the International Monetary Fund;
- cash, current accounts and foreign exchange in convertible currencies including:
 - current accounts and accounts with agreed maturity held at foreign banks, valued in accordance with the nominal value on the balance-sheet day;
 - securities issued by foreign entities, quoted at the liquid market, valued in accordance with the average market price on a balance-sheet day;
 - foreign currencies held at the NBP vaults, valued in accordance with the nominal value on a balance-sheet day;
- other claims, which comprise the balances of claims on reverse repo transactions (purchase of securities under repurchase agreement), evidenced in books as extended loans and valued in accordance with the amount outstanding on a balance-sheet day.

The National Bank of Poland accounting data is the source on the official reserve assets.

Table 15. Official Reserve Assets

The official reserve assets have been described in point 4 of the International Investment Position (Table 14).

Table 16 and 17. Poland: External Debt

The National Bank of Poland reports information on Poland's external debt in accordance with the following definition: "Gross external debt at the end of a given period is the amount, of disbursed and outstanding contractual liabilities of residents of a country to non-residents, to repay principal, with or without interest, or to pay interest, with or without principal". This definition was defined as the core definition.

The above definition refers to gross debt, i.e. it refers to the particular foreign liabilities of Poland (with no deduction of Polish assets abroad). The term "contractual liabilities" denotes a formal obligation to make a specific payment (principal installment and/or interest). It excludes equity participations from external debt. The phrase "principal with or without interest" means that the concept of external debt also includes non-interest-bearing liabilities, as these also involve a "contractual" obligation for payment. The phrase "interest with or without principal" signifies that the concept of external debt also incorporates liabilities with no stated maturity (e.g. undated bonds). The term "disbursed and outstanding" excludes potential liabilities, e.g. the undrawn parts of existing credit facilities.

The distinction between domestic and external (foreign) debt is based solely on the criterion of residence, regardless of the currency involved.

The following categories of financial instrument have been included in the concept of external debt:

- loans of direct investors;
- current accounts and accounts with agreed maturity held by non-residents at Polish banks;
- debt securities held by foreign portfolio investors;
- trade credits;
- other loans and credits (including financial leases);
- other foreign liabilities (arrears of principal and interest).

Figure 7. Monthly growth of monetary aggregates against inflation

Inflation is the monthly rate of changes in the prices of consumer goods and services. Source of data – the Central Statistical Office.

Figure 8. Annual percentage growth of monetary aggregates against inflation

Inflation is the annualized rate of changes in the prices of consumer goods and services. Source of data – the Central Statistical Office.
